

## **FUNDAMENTAL ICT SKILLS**

TUESDAY: 3 December 2024. Morning Paper.

D.

**EEPROM** 

This paper consists of fifty (50) Multiple Choice Questions. Answer ALL questions by indicating the letter (A, B, C or D) that represents the correct answer. Each question is allocated two (2) marks. Do NOT write anything on this paper.

1.	In a s	preadsheet, the equation designed by a user is known as			
	A.	a formula			
	B.	an expression			
	C.	an argument			
	D.	a function	(2 marks)		
2.	Whic	h one of the programming languages is non-procedural and allows a programmer to define what	at has to be		
	done	instead of how the task is to be completed?			
	A.	Machine			
	В.	Low level			
	C.	High level			
	D.	Fourth generation	(2 marks)		
_			NA		
3.		h one of the following statements <b>BEST</b> defines the term software version?			
	A.	Set of digits that represent the release date and specific changes to the program			
	В.	Software update that resolves a security issue or otherwise that impacts an organisation's asset	S		
	C.	The distribution of the final or latest of a software to the users			
	D.	Set of high-level criteria that defines when a product increment is complete	(2 marks)		
4.	Which one of the following advantages applies to a mouse?				
	A.	Requires a flat and open surface			
	В.	Heavily relies on a battery			
	C.	Requires very little training			
	D.	There is need for human interventions to act and react	(2 marks)		
5.	Whic devic	th one of the following types of software enables communication between an operating system and	d peripheral		
	A.	Device driver			
	В.	Utility software			
	C.	Firmware			
	D.	Language translator	(2 marks)		
6.	Whic	h one of the following printers produces a single page print in one pass?			
	A.	Dot matrix printer			
	В.	Laser printer			
	C.	Chain printer			
	D.	Line printer	(2 marks)		
	D.	Zino printer	(2 marks)		
7.		h one of the following computer memories can be programmed only once after manufacturing?			
	A.	EPROM			
	В.	ROM			
	C	PR∩M			

(2 marks)

Time Allowed: 2 hours.

8.	Whic	th one of the following statements about CD-RW discs is <b>TRUE</b> ?  They can be written to only once	
	B.	They are not rewritable	
	C.	They can be rewritten multiple times	
	D.	They require a special player to read	(2 marks)
9.		ch one of the following benefits applies to a Command Driven Interface?	
	A.	It requires less memory	
	В.	It allows for more complex operations	
	C.	It is easier for novice users	(2
	D.	It relies heavily on graphical representations	(2 marks)
10.	select		cell, range or object
	A.	Menu bar	
	В.	Name box	
	C. D.	Title bar Formula bar	(2 marks)
	υ.	Formula bai	(2 marks)
11.	A har A.	rdware device that allows a computer to be connected to an external network is known as network interface card	a
	В.	switch	
	C.	repeater	
	D.	router	(2 marks)
			(,
12.		ch one of the following types of operating systems is used in mobile phones?	
	A.	Windows 10	
	B. C.	Mac OS Symbion	
	C. D.	Symbian Google Chrome	(2 marks)
	D.	Google Chilothe	(2 marks)
13.	The f	feature that allows computer users to perform calculations using formulae in a spreadshed	et program is referred
	to as		
	A.	autocomplete	
	B.	conditional formatting	
	C.	function library	(2 1 )
	D.	pivot table	(2 marks)
14.		software created by people who are willing to give it away for the satisfaction of share	ring or knowing they
	helpe	ed to simplify other people's lives is known as?	
	A.	Freeware	
	В.	Shareware	
	C.	System software	
	D.	Antivirus	(2 marks)
15.	Whic	ch one of the following presentation software features enables a user to align objects on a	slide?
	A.	Pixels	
	В.	Guides	
	C.	Plasma	(0 1 )
	D.	Slates	(2 marks)
16.		ch one of the following word processing features allows a computer user to create a list of	of document headings
		apdate automatically when changes are made?	
	A.	Reference table	
	В.	Index catalogue	
	C.	Table of contents	(0 1 )
	D.	Abstract catalogue	(2 marks)

17.	Whic	h one of the following features of accounting software helps in tracking money owed by custome	rs?
17.	A.	Accrued expenses	45.
	В.	Accounts payable	
	C.	Accrued receivable	
	D.	Accounts receivable	(2 marks)
	ъ.	recounts receivable	(2 marks)
18.		h one of the following areas is a way of using computers at home?	
	A.	For entertainment	
	B.	For automatic diagnosis of diseases	
	C.	For sales forecasting	
	D.	For creating commercial publications	(2 marks)
19.	Whic	h one of the following statements gives the purpose of a file extension?	
	A.	To determine the file's physical location	
	B.	To identify the file's owner	
	C.	To indicate the file's content or format	
	D.	To prevent unauthorised access to the file	
		. [	(2 marks)
20.	Whic	h one of the following is a type of user account that allows computer users to change system set	` /
	not af	ffect other users or the security of the computer?	· <b>8</b> ~ ··· * ~
	A.	Administrator account	
	B.	Standard user account	
	C.	Guest account	
	D.	Remote account	(2 marks)
21.	Which	h one of the following statements is <b>TRUE</b> about information?	
	A.	It is unprocessed facts and figures	
	B.	It does not make sense to the user	
	C.	It can be used to make decisions	Š
	D.	Accuracy and timeliness are not important	(2 marks) the
			MAN
22.		h one of the following types of systems is BEST defined as an integrated system that is	formed as a
	comb	ination of computer hardware and software for a specific function?	
	A.	Digital	
	B.	Mainframe	
	C.	Analogue	
	D.	Embedded	(2 marks)
23.	Which	h one of the following media is a twisted 4 pair sheathed copper wire cable that can support	data transfer
23.		of up to 1 gigabits (1,000 megabits)?	data transici
	A.	Cat 5 cable	
	В.	Cat 6 cable	
	C.	Fibre optic cable	
	D.	Coaxial cable	(2 marks)
	υ.	Coaxiai Cable	(2 marks)
24.		h one of the following devices is a type of router that is designed for high throughput, low	latency and
		oility to handle the massive traffic in backbone networks?	
	A.	Edge router	
	B.	Distribution router	
	C.	Core router	
	D.	Access router	(2 marks)
25.	Whic	h one of the following statements <b>BEST</b> describes the purpose of a firewall in network security?	
	A.	To increase network speed	
	B.	To block unauthorised access	
	C.	To store backup data	
	D.	To manage network traffic	(2 marks)

26.		h one of the following network topologies has direct connection to every other node creati	ng redundant and
		t network structure?	
	A.	Ring	
	В.	Bus	
	C.	Mesh	
	D.	Star	(2 marks)
27.	The	critical component in a computer system that is responsible for interpreting and execu	ting most of the
		nands is known as	
	A.	system unit	
	B.	power supply unit	
	C.	central processing unit	
	D.	backing storage device	(2 marks)
28.	A au	ick-repair job to a software designed to resolve functionality issues, improve security or ad	ld new features is
20.	know		ia new reatures is
	A.	patch	
	В.	upgrade	
	C.		
		debug	(2
	D.	code	(2 marks)
29.	Whic	h one of the following features is an advantage of using pre-written software?	
	A.	Greater flexibility and customisation options	
	B.	More control over the software's functionality	
	C.	Lower cost and quicker implementation	
	D.	Better compatibility with other applications	(2 marks)
20	***		6.1
30.		h one of following data security goals ensures that data is not altered without the permission	of the owner?
	A.	Data confidentiality	
	B.	Data integrity	
	C.	Non-repudiation	
	D.	Data confidentiality Data integrity Non-repudiation Data availability	(2 marks)
31.	Whic	h one of following network components converts digital data from a computer to an an	alogue signal for
01.		mission over telephone lines?	
	A.	Hub	
	В.	Modem	
	В. С.		
	C. D.	Router Multiplexer	(2 marks)
	Δ.	Manapiener	(2 marks)
32.		h one of the following statements is a reason why plotters are still being used despite the a	vailability of high
	_	ty printers?	
	A.	Plotters are more affordable than printers	
	В.	Plotters offer better accuracy and precision for large drawings	
	C.	Printers cannot handle graphical outputs	
	D.	Plotters have faster printing speed than printers	(2 marks)
33.	Whic	h one of the following is an advantage of fibre optic cables over traditional copper cables?	
	A.	Lower cost	
	B.	Higher bandwidth	
	C.	Simplicity of installation	
	D.	Flexibility	(2 marks)
24	****		
34.		h one of the following statements is a characteristic of Random Access Memory (RAM)?  It is non-volatile	
	A.		
	B.	Its capacity can be increased	
	C.	It forms a minor portion of computer memory	(2 1 )
	D.	Data can only be read from it but cannot be written on it	(2 marks)

35.		h one of the following Microsoft Excel functions can be used to find the lowest score by ematics paper?	students in the	
	A.	Max()		
	В.	Min()		
	C.	Average()		
	D.	Low()	(2 marks)	
36.	opera	h one of the following statements <b>BEST</b> describes the process of starting a computer ting system?	and loading the	
	A.	Activating		
	В.	Booting		
	C.	Rebooting	(2 1 )	
	D.	Restarting	(2 marks)	
37.		h one of the following computer network evaluation factors measures the number of units of work can process in a given amount of time?	information that	
	A.	Reliability		
	В.	Speed of transmission		
	C.	Throughput		
	D.	Latency	(2 marks)	
38.	What	is the function of the 'Esc' key in the slide show mode in a PowerPoint presentation?		
	A.	To start the slide show		
	В.	To exit the slide show		
	C.	To edit the slide		
	D.	To print the presentation	(2 marks)	
39.	Which one of the following types of network topologies is characterised by network devices connected to a single hub through a cable?			
	A.	Star topology	Sh	
	В.	Mesh topology	, WW.	
	C.	Ring topology	4	
	D.	Bus topology	(2 marks)	
40.		h one of the following statements describes the purpose of disk defragmentation utility?		
	A.	Scanning for viruses and malware		
	В.	Creating backups of files		
	C.	Organising disjointed data on the hard drive		
	D.	Compressing files to save disk space	(2 marks)	
41.	FORT	FRAN, BASIC and COBOL are examples of		
	A.	high level programming languages		
	В.	low level programming languages		
	C.	assembly languages		
	D.	application software	(2 marks)	
42.		h one of the following security measures <b>BEST</b> describes the data security process that enably nage who is authorised to manipulate corporate data and resources?	les organisations	
	A.	Encryption		
	A. B.	Access control		
	Б. С.	Access control Authorisation		
	C. D.	Filtering	(2 marks)	
	D.	Thering	(2 marks)	
43.		nain part of a computer that contains all the essential hardware components is known as	·	
	A.	system unit		
	B. C.	monitor		
	C. D.	processor	(2 marks)	
	υ.	power supply	(Z marks)	

14.	Which one of the following is measured using "dots per inch"?			
	A.	Screen size		
	B.	Data speeds for modems		
	C.	Resolution of an image		
	D.	Processing speed	(2 marks)	
45.		tailed document that outlines how an organisation responds effectively to an unplanned incident ness operations is known as	and resume	
	A.	disaster recovery plan		
	B.	software development plan		
	C.	backup strategic plan		
	D.	maintenance strategy	(2 marks)	
16.		ch one of the following file systems allows files to be stored across multiple locations, yet accessed	ed as if they	
		on a local system?		
	A.	Hierarchical file system		
	B. C.	New technology file system		
		Distributed file system	(2 )	
	D.	Extended file allocation table	(2 marks)	
<b>1</b> 7.		ch one of the following control measures is MOST effective in mitigating the risk of a ransomware	attack?	
	A.	Turn off automatic system server updates		
	В.	Regular data backups and offline storage		
	C.	Disabling antivirus software for 24 hours		
	D.	Using one strong password for all accounts	(2 marks)	
48.	Whic	ch one of the following statements describes the role of a switch in a Local Area Network (LAN)?		
	A.	Filters and forwards data packets		
	В.	Provides internet access		
	C.	Encrypts data		
	D.	Connects different networks	(2 marks)	
19.	A per	rson who writes computer software for running the hardware of a computer is called a	·	
	A.	systems analyst		
	В.	programmer		
	C.	systems designer		
	D.	data processor	(2 marks)	
50.	The	fundamental concept in modern computing which allows a system to use more memory the	nan what is	
	physi	ically available on the machine is known as		
	A.	virtual memory		
	B.	random access memory (RAM)		
	C.	read only memory (ROM)		
	D.	cache memory	(2 marks)	

## FUNDAMENTAL ICT SKILLS

TUESDAY: 20 August 2024. Morning Paper.

This paper consists of fifty (50) Multiple Choice Questions. Answer ALL questions by indicating the letter (A, B, C or D) that represents the correct answer. Each question is allocated two (2) marks. Do NOT write anything on this paper.

- 1. The origin of all the different generations of computers is characterised by a significant technological development in their components. Which computer generation first used Integrated Circuits (ICs)?
  - A. Second
  - B. Fourth
  - C. First
  - D. Third (2 marks)
- 2. Identify the network topology shown in the diagram below.

www.dlopi.co.ke

Time Allowed: 2 hours.

- A. Ring
- B. Tree
- C. Bus
- D. Mesh (2 marks)
- 3. Which one of the following can be referred to as the brain of a computer?
  - A. Artificial Intelligence Unit (AIU)
  - B. Graphics Processing Unit (GPU)
  - C. Central Processing Unit (CPU)
  - D. Random Access Memory (RAM)

(2 marks)

- 4. Which one of the following refers to the type of computer that has more than one CPU, can store very large volumes of data and uses vector arithmetic in its operations?
  - A. Supercomputer
  - B. Microcomputer
  - C. Minicomputer
  - D. Mainframe computer

(2 marks)

- 5. Which one of the following **BEST** describes a firewall in the context of computer security?
  - A. Type of malware
  - B. Hardware component of a computer
  - C. Program that enhances computer performance
  - D. Guideline that determines how traffic is allowed or blocked on a network
- 6. Which one of the following is a computer input device?
  - A. Headphones
  - B. Projector
  - C. Scanner
  - D. Plotter

(2 marks)

(2 marks)

7.		nputer device responsible for converting digital data into analog signals that can be sent over a te	lephone line
	is kno	own as	
	A.	modem	
	B.	router	
	C.	CPU	
	D.	hard drive	(2 marks)
8.	Whic	h one of the following cannot be classified as a type of ICT?	
٠.	A.	Telnet	
	В.	Multimedia	
	C.	Broadcasting technologies	
	D.	Telephony	(2 marks)
0	XX71- : -:	h and of the fellowing statements DECT describes the second of the second of	
9.		h one of the following statements <b>BEST</b> describes shareware software?	
	A.	A software that respects users' freedom and community	
	В.	A commercial software that is distributed free to its users but with some conditions	
	C.	A computer software package that performs a specific function directly for an end user	
	D.	A proprietary software that is released without charge to the public	(2 marks)
10.		esolution of an inkjet printer is commonly measured in units known as	
	A.	pixels Per Inch (PPI)	
	B.	dots Per Inch (DPI)	
	C.	prints Per Page (PPP)	(2 1 )
	D.	ink Per Minute (IPM)	(2 marks)
11.	Whic	h one of the following is a positive impact of Information Communication Technology (ICT) on	the society?
	A.	Increased social isolation	
	B.	Decreased privacy	
	C.	Increased cybercrime	
	D.	Increased access to information	(2 marks)
12.	Which	h approachant function displays the approach data only?	
12.		h spreadsheet function displays the current date only?	
	A.	Today()	
	В.	Date()	
	C.	Now()	(2 1 )
	D.	IsDate()	(2 marks)
13.	Whic	h one of the following statements will differentiate bespoke software from off-the-shelf software	?
13.	A.	Bespoke software is cheaper	•
	В.	Bespoke software is customisable	
	C.	Off-the-shelf software is always more reliable	
	D.	Off-the-shelf software is designed for specific businesses	(2 montra)
	υ.	On-the-shell software is designed for specific businesses	(2 marks)
14.		h one of the following is a type of social engineering attack where attackers focus on creating	a fabricated
	scena	rio that they can use to steal someone's personal information?	
	A.	Phishing	
	B.	Pretexting	
	C.	Tailgating	
	D.	Baiting	(2 marks)
15.	The f	ollowing are characteristics of computer software:	
	(i)	Manages the resources of the computer	
	(ii)	Written in a high-level language	
	(iii)	Needs system software to run	
		Less interactive for the users	
	(iv)	Less interactive for the users	
		fy the specific characteristics for an application software.	
	A.	(i), (ii), (iii)	
	В.	(i) & (iv)	
	C.	(ii) & (iii)	
	D.	(i) & (iv)	(2 marks)

16.	Whic	ch one of the following is <b>TRUE</b> about first generation programming languages?		
	A.	They are easy to learn and use		
	В.	They require a shorter execution time		
	C.	They require a high level of abstraction		
	D.	They are platform-independent	(2 marks)	
17.	Whic	ch one of the following BEST describes a computer program that functions as an inter-	mediary between a	
	comp	outer user and the computer hardware?		
	A.	Driver program		
	B.	Off the shelf program		
	C.	In-house program		
	D.	Operating system	(2 marks)	
18.	What	t is the advantage of using a menu-driven interface in software applications?		
	A.	Requires less memory		
	B.	Allows for customisation		
	C.	Provides a consistent user experience		
	D.	Increases processing speed	(2 marks)	
19.	Whic active	ch one of the following keyboard shortcut keys can be used to close a computer progra	m that is currently	
	A.	Shift + F4		
	В.	Shift + Esc		
	C.	Alt + Esc		
	D.	Alt + E3c $Alt + F4$	(2 marks)	
	ъ.	7MC   1 T	(2 marks)	
20.	An environment that mimics a target for hackers and uses their intrusion attempts to gain information about			
	A.	recriminals is known as		
	A. B.	backtracing	Š	
	Б. С.	honeypot malware	A. Ohe	
	D.		(2 marks)	
	υ.	spyware	(2 marks)	
21.	The	act of moving from one website to another is known as		
	A.	attachment		
	В.	uploading		
	C.	browsing		
	D.	downloading	(2 marks)	
22.	The p	purpose of compressing a folder in a computer system is to		
	A.	reduce the file size		
	B.	create a backup		
	C.	organise files		
	D.	delete files	(2 marks)	
23.		ord processing, the feature that allows a user to separate words into parts on syllable boun	daries or join word	
	into a	a single word using a dash-like punctuation mark is known as		
	A.	wordart		
	В.	hyphenation		
	C.	watermark		
	D.	formatting	(2 marks)	
24.	To a	dd an attachment to an email you use icon.		
	A.	stationary		
	B.	emoji		
	C.	paper clip		
	D.	GIF	(2 marks)	

25.	Whic	ch one of the following is the access method used for hard disk drive?	
	A.	Sequential	
	В.	Direct	
	C.	Random	
	D.	Associate	(2 marks)
26.	Whic	ch feature of presentation software allows users to add text, images, and graphics to slides?	
	A.	Animation	
	B.	Slide transitions	
	C.	Slide layout	
	D.	Slide design	(2 marks)
27.	The p	purpose of the Autofill feature in spreadsheet software is to	
	A.	automatically correct spelling errors	
	B.	predict and extend a series of values	
	C.	create backups of the spreadsheet	
	D.	delete unnecessary data	(2 marks)
28.	The r	name of the cord that is used to connect devices together on a network to transfer broadband data	a is known as
	A.	network interface card	
	В.	microwave	
	C.	ethernet cable	
	D.	repeater	(2 marks)
29.	Whic	ch one of the following characters can be used when naming spreadsheet files?	
	A.	Forward slash (/)	
	В.	Backslash (\)	
	C.	Greater-than-sign (>)	
	D.	Underscore (_)	(2 marks)
30.	Whic	ch direction does a Quick Response (QR) code need to be scanned in order to be read correctly?	
	A.	Up-to-down	
	В.	Left-to-right	
	C.	Right-to-left	
	D.	Any direction	(2 marks)
31.	Whic	ch one of the following is network cable category that is widely used for 100Base-T and	1000Base-T
		orks that provide performance to allow data at 100 Mbps?	
	A.	Cat 4	
	B.	Cat 5	
	C.	Cat 3	
	D.	Cat 2	(2 marks)
32.	What	t does the term "Bug" mean in computer programming?	
	A.	Logical errors in the program	
	B.	Software error	
	C.	Syntax error in the program	
	D.	Runtime error	(2 marks)
33.	A net	twork topology that is least susceptible to network failures and traffic congestion is known as	•
	A.	bus	
	B.	ring	
	C.	star	
	D.	mesh	(2 marks)
34.	Whic	ch one of the following illustrates a formula with absolute row references and relative column refe	erences?
	A.	=\$A12+\$B12	
	B.	=A\$12+B\$12	
	C.	=\$A\$12+\$B\$12	
	D.	=A12+B12	(2 marks)

35.	Which	one of the following statement describes a utility program?	
	A.	System programs which provide a useful services to the user of the computer	
	В.	System software that manages computer hardware and software resources	
	C.	Operates or controls a particular type of device that is attached to computer	
	D.	Provides the interface between the user and the computer	(2 marks)
36.	includi A.	work operating system, identify the user account that provides full permissions to make ng those that will affect other users?  Guest	system changes
	В.	Local user	
	C.	Administrator	
	D.	Regular user	(2 marks)
37.	Which A. B.	one of the following is an advantage of Command Line Interface (CLI)?  A user must have prior knowledge of the command and its outcome  The learning curve of CLI is steep since users will have to learn all the commands and h	now and where to
	C	use them	
	C.	It requires much less Random Access Memory in order to use	
	D.	The command has to be typed precisely the way it should and if it has any spelling of won't execute	or syntax error it (2 marks)
38.		software allows a personal computer to be used as a publishing and design tool facilitatiality document internally while reducing printing costs?  Word processing  Desktop publishing  Operating system	ng production of
	D.	Presentation	(2 marks)
39.	Which A. B.	one of the following printers prints one line at a time?  Laser printers  Drum Printers	a dha
			MANA
	C.	Inkjet Printers	(2
	D.	Chain printers	(2 marks)
40.		one of the following is a disadvantage of a laser printer?	
	A.	Higher cost per page	
	B.	Slower printing speed	
	C.	Limited color options	
	D.	Lower resolution	(2 marks)
41.		imple of device used to provide hard copies is a	
	A.	computer monitor	
	B.	cathode ray tube	
	C.	printer	
	D.	card reader	(2 marks)
42.		one of the following is a security technique that regulates who or what one can view or uting environment?	ise resources in a
	A.	Authorisation	
	B.	Authentication	
	C.	Access control	
	D.	Biometric control	(2 marks)
43.	manage	one of the following is a network component that connects two or more packet-swest raffic between these networks and allows multiple devices to use the same Internet connects.	
	A.	Switch	
	В.	Repeater	
	C.	Router	(2 1 )
	D.	Bridge	(2 marks)

44.	Which one of the following information system security goals is protected by data encryption?				
	A.	Confidentiality			
	B.	Integrity			
	C.	Accessibility			
	D.	Non-Repudiation	(2 marks)		
45.		ch one of the following is a point-to-point connectivity medium that can transmit data ations?	without distance		
	A.	Coaxial cable			
	В.	Fiber optic cable			
	C.	Twisted pair cable			
	D.	Cat 6 cable	(2 marks)		
46.	Whic	ch one of the following is <b>NOT</b> a data backup device?			
	A.	Solid state drive			
	B.	External hard drive			
	C.	Internal memory cards			
	D.	Network drive	(2 marks)		
47.		ch one of the following types of networks can connect several Local Area Networks (LANs offices in Uganda, Kenya and Burundi.  Metropolitan area network  Personal area network  Wide area network  Distributed area network	) for a company  (2 marks)		
48.	The t	refers to processed data.			
	A.	field			
	B.	file			
	C.	information			
	D.	field file information record	(2 marks)		
49.	Ident	ity the computer generation based on Very Large Scale Integrated (VLSI) technology?			
	A.	4 <sup>th</sup>			
	B.	5 <sup>th</sup>			
	C.	$2^{\mathrm{nd}}$			
	D.	3 <sup>rd</sup>	(2 marks)		
50.		A malicious software that enters a user's computer, gathers data from the device and user, and sends it to third			
	-	es without their consent is known as?			
	A.	Spyware			
	В.	Worm			
	C.	Time Bomb			
	D.	Logic Bomb	(2 marks)		

#### FUNDAMENTAL ICT SKILLS

TUESDAY: 23 April 2024. Morning Paper.

Time Allowed: 2 hours.

This paper is made up of fifty (50) Multiple Choice Questions. Answer ALL questions by indicating the letter (A, B, C or D) that represents the correct answer. Each question is allocated two (2) marks. Do NOT write anything on this paper.

- 1. Which of the following statements **BEST** describes a computer?
  - A set of programs, associated documentation and data
  - B. The study or use of systems for storing, retrieving, and sending information
  - C. An electronic device that transforms data to information
  - D. A group of interrelated elements that act according to a set of rules to form a unified whole (2 marks)
- 2. The following technology support communication **EXCEPT** \_\_\_\_\_
  - A. Blogs
  - B. Social media
  - C. Email

D.

Database

(2 marks) (2 marks) (2 marks) (2 marks)

- 3. Choose a characteristic of third generation of computers.
  - Use of medium scale integrated circuits A.
  - B. Use of large scale integrated circuits
  - C. Use of artificial intelligence
  - D. Use of transistors as basic technology

(2 marks)

- 4. The following are disadvantages of computer networks, **EXCEPT** 
  - Increased security concerns A.
  - B. Increased virus and malware attacks
  - C. Increased storage capacity
  - Lack of independence D.

(2 marks)

- 5. Choose a logical control measure that is **NOT** used in Information Communication Technology (ICT) security.
  - Passwords A.
  - B. Vetting employees
  - C. Firewall
  - D. Intrusion detection systems

(2 marks)

6. Identify the device below:

	A.	Hard disk drive	
	B.	DVD drive	
	C.	Floppy drive	
	D.	Zip drive	(2 marks)
			(=)
7.	The fol	lowing are hardware requirements when setting up a computer network:	
,.	(i)	Bridge	
	(ii)	Ethernet cables	
	(iii)	Satellite	
	(iv)	Switch	
	(v)	Network interface card	
	Identify	the hardware that is necessary when setting up a local area network (LAN).	
	Α.	(i), (ii) & (iii)	
	B.	(i), (iii) & (v)	
	C.	(ii), (iii) & (iv)	
			(2 mortes)
	D.	(ii), (iv) & (v)	(2 marks)
0	C1		
8.		a characteristic of high-level computer programming languages.	
	A.	They are machine dependent	
	B.	Their source code is written using mnemonics	
	C.	They require the longest coding time	
	D.	They are machine independent	(2 marks)
		· · · · · · · · · · · · · · · · · · ·	( 22 27
9.	Choose	the computer keyboard shortcut key that can be used to switch between open applications.	
<i>)</i> .	A.	Alt + Tab	
	B.	Ctrl + Tab	
	C.	Alt + A	
	D.	Ctrl + P	(2 marks)
		- · · V	
10.	The foll	owing are characteristics of non-impact printers <b>EXCEPT</b>	
	A.	They are fast printers	
	B.	They use laser technology to provide printouts	
	C.	They produce good quality printouts	
	D.	They are noisy printers	(2 marks)
	Σ.	They are noisy princers	(2 marks)
11.	Which	of the following spreadsheet functions will help in rearranging data in ascending or descending	order?
11.			order:
	A.	AutoFill	
	B.	Conditional formatting	
	C.	Filter function	
	D.	Sort function	(2 marks)
12.	Which l	PowerPoint tool will allow computer users to view and edit different slides simultaneously?	
	A.	Presentation Master	
	B.	Slide Sorter	
	C.	Slide Master	
	D.	Outline Viewer	(2 marks)
	D.	Outline Viewer	(2 marks)
12	3371. 1. 1.		
13.		of the following statements describes a function of a file extension?	
	A.	It determines the file type	
	В.	It encrypts the file contents	
	C.	It compresses the file size	
	D.	It changes the file permissions	(2 marks)
14.	A small	, portable wireless device that provides users with a permanent WiFi hotspot wherever they g	o is referred
-	to as		
	A.	PDA .	
	В.	GPS	
	C.	MiFi	(2 1 )
	D.	USB	(2 marks)

15.	Whic	h of the following keys can be used to adjust a document margin in Microsoft word?	
	A.	Backspace	
	В.	Spacebar	
	C.	Indent	
	D.	Enter	(2 marks)
16.	Ident A.	ify a keyboard shortcut that can be used to insert a new sheet in the current workbook in Microso Shift + F9	ft Excel.
	В.	Shift + F11	
	C.	Shift + F10	
	D.	Shift + F12	(2 marks)
	D.	Shift + 1.17	(2 marks)
17.	math	h of the following Microsoft Excel functions can be used to find the lowest score by stuematics paper?	idents in the
	A.	Max()	
	В.	Min()	
	C.	Average()	
	D.	Low()	(2 marks)
18.	tables	h of the following statements is <b>NOT</b> an activity that can be performed by computer users whe s in Microsoft word?	en formatting
	A.	Aligning text in cells	
	B.	Resizing columns and rows	
	C.	Adding borders	
	D.	Adding folders	(2 marks)
19.		h of the following types of Microsoft Excel charts uses vertical bars to represent data?	
	A.	Pie charts	
	В.	Line charts	
	C.	Column charts	900
	D.	Vertical charts	(2 marks)
20.	Whic	h of the following devices <b>CANNOT</b> be classified as a document reader?	
	A.	Optical character reader	
	B.	Bar code reader	
	C.	Graphics tablet reader	
	D.	Magnet ink character recognition	(2 marks)
21.	Ident	ify a special visual effect that is used to introduce a slide during a slide show.	
	A.	Slide transition	
	В.	Slide timing	
	C.	Slide animation	
	D.	Slide preview	(2 marks)
22.	Choo	se an advantage of using pre-written software.	
	A.	Greater flexibility and customisation options	
	В.	More control over the software's functionality	
	C.	Lower cost and quicker implementation	
	D.	Better compatibility with other applications	(2 marks)
23.	Whic	h type of software is specifically designed to manage financial transactions and record keeping?	
	A.	Enterprise resource planning (ERP) software	
	В.	Customer relationship management (CRM) software	
	C.	Accounting software	
	D.	Project management software	(2 marks)
24	TI.		
24.		component of Microsoft Windows operating system that provides the ability to view and changes is known as	ange system
	A.	Control Panel	
	В.	Computer Manager	
	C.	Recycle Bin	
	D.	Network	(2 marks)

23.		iny a type of operating system that enables computer users to load several applications in the	o computer
		ory and use them either simultaneously or at different intervals.	
	A.	Multi-user operating system	
	В.	Multi-tasking operating system	
	C.	Real time operating system	
	D.	Timesharing operating system	(2 marks)
26.	The f	following are examples of an operating system <b>EXCEPT</b>	
	A.	Windows 10	
	B.	Linux	
	C.	Android	
	D.	Apache Spark	(2 marks)
27.		ype of computer user account that enables a user to change system settings and that does not is referred to as	affect other
	A.	Standard User account	
	B.	Administrator account	
	C.	Programmer account	
	D.	Guest account	(2 marks)
28.	Whic	h of the following statements is a characteristic of in-house software?	
	A.	It is readily available	
	B.	It allows internal specialists to master their skills in software development	
	C.	It does not solve the user's unique needs	
	D.	It is characterised by low acquisition cost	(2 marks)
29.		is an input device.	
	A.	Floppy disk	
	B.	Touch screen	
	C.	Projector	
	D.	Braille embosser	(2 marks)
30.	Whic	h type of network can be used to connect a bluetooth earpiece to a smartphone?	
	A.	Local area network (LAN)	
	B.	Personal area network (PAN)	
	C.	Metropolitan area network (MAN)	
	D.	Wide area network (WAN)	(2 marks)
31.	The f	ollowing are reasons why a computer file should be given a unique name <b>EXCEPT</b>	
	A.	To appear organised	
	B.	To be able to count number of files	
	C.	To makes it easier to identify it	
	D.	To be able to retrieve it later	(2 marks)
32.	The	following are suitable measures used to protect an organisation against computer misuse	EXCEPT
	A.	Close down chat rooms	
	В.	Reduce email spamming	
	C.	Regular backups and security	
	D.	Restriction of unauthorised access	(2 marks)
33.	Whic	h of the following statements describes the purpose of disk defragmentation utility?	
	A.	Scanning for viruses and malware	
	B.	Creating backups of files	
	C.	Organising disjointed data on the hard drive	
	D.	Compressing files to save disk space	(2 marks)
34.	The f	ollowing are features of star network topology <b>EXCEPT</b>	
	A.	Fault detection is easily manageable	
	B.	Chances of collision of data are relatively lower	
	C.	A cut cable will affect many nodes	
	D.	Failure of the central connectivity device will affect the entire network	(2 marks)

35.	Whic	h one of the following statements <b>BEST</b> describes a remote user in networking?			
	A.	A user who is operating from an off-site location			
	В.	A person operating in a remote location away from civilisation			
	C.	A primitive user who has no knowledge of computer			
	D.	A user account with limited privileges that will be used for general tasks such as readin	a amail and		
	<b>D</b> .		-		
		surfing the Web	(2 marks)		
36.	A qui	ick-repair job to a software designed to resolve functionality issues, improve security or add ne	w features is		
	know	n as			
	A.	Patch			
	B.	Upgrade			
	C.	Debug			
	D.	Code	(2 marks)		
37.	A svs	stem within a computer or device, consisting of a connector or set of wires, that provides trans	nortation for		
		is known as	p 01 <b>000</b> 1011 101		
	A.	Ethernet			
	В.	Cable			
	C.	Bus			
	D.		(2 montes)		
	<b>D</b> .	Port	(2 marks)		
38.		ify the type of computer memory that improves the system's overall performance by freeing up nhances the overall system functionality.	RAM space		
	A.	Cache memory			
	B.	Random access memory (RAM)			
	C.	Read only memory (ROM)			
	D.	Virtual memory	(2 marks)		
20	Identify the program that translates mnomenies into machine notation for use by a computer system				
39.		ify the program that translates mnemonics into machine notation for use by a computer system.			
	A.	Interpreter	, gai		
	В.	Compiler	WW.		
	C.	Assembler	4		
	D.	Converter	(2 marks)		
40.	The f	following are characteristics of a mainframe computer <b>EXCEPT</b>			
	A.	It has a higher memory capacity than supercomputer			
	В.	It is larger in size than minicomputers			
	C.	It is more expensive than a mini computer			
	D.	Supports multiprocessing	(2 marks)		
4.1	*****				
41.		h of the following is <b>NOT</b> a type of social engineering attack?			
	A.	Baiting			
	В.	Phishing			
	C.	Denial of service	(2 1 )		
	D.	Scareware	(2 marks)		
42.	Which of the following statements <b>BEST</b> describes an attack campaign in which an intruder establishes an illicit,				
		term presence on a network in order to mine highly sensitive data?			
	A.	Man in the middle attack			
	B.	Denial of service threat			
	C.	Advanced persistent threat			
	D.	Malware attack	(2 marks)		
43.	The o	data communication component that filters network addresses in a network environment is re	eterred to as		
	A.	Repeater			
	В.	Bridge			
	C.	Hub			
	D.	Router	(2 marks)		

44.		is a type of intrusion detection system.	
	A.	Stand-alone based intrusion detection system	
	В.	Computer-based intrusion detection system	
	C.	Host-based intrusion detection system	
	D.	User-based intrusion detection system	(2 marks)
45.	The t	ype of data backup where all files that have changed since the last backup occurred are backet	l up is referred
	to as		_
	A.	Full backup	
	B.	Incremental backup	
	C.	Differential backup	
	D.	Complete backup	(2 marks)
46.	The f	ollowing are types of keyboard <b>EXCEPT</b>	
	A.	Mechanical	
	B.	Non mechanical	
	C.	Ergonomic	
	D.	Wireless	(2 marks)
47.	Whic	h category of CAT cables offers better performance than CAT 6?	
	A.	CAT 5	
	B.	CAT 5e	
	C.	CAT 6a	
	D.	CAT 3	(2 marks)
48.	Ident	ify a reason why plotters are still being used despite the availability of high quality printers.	
	A.	Plotters are more affordable than printers	
	B.	Plotters offer better accuracy and precision for large drawings	
	C.	Printers cannot handle graphical outputs	
	D.	Plotters have faster printing speeds than printers	(2 marks)
49.		smission media is a pathway that carries the information from sender to receiver. It can be boun	nd or unbound.
	Whic	h of the following is <b>NOT</b> a type of unbound transmission media?	
	A.	Twisted pair	
	В.	Bluetooth	
	C.	Infrared	
	D.	Microwave	(2 marks)
50.	The f	ollowing are characteristics of an antivirus software EXCEPT	··
	A.	Searches for known threats and monitors the behaviour of all programs	
	B.	Seeks to block or remove malware as quickly as possible	
	C.	Helps protect your computer against malware and cybercriminals	
	D.	Manages the hardware components connected to a computer	(2 marks)

#### FUNDAMENTAL ICT SKILLS

**TUESDAY: 5 December 2023. Morning Paper.** 

This paper is made up of fifty (50) Multiple Choice Questions. Answer ALL questions by indicating the letter (A, B, C or D) that represents the correct answer. Each question is allocated two (2) marks. Do NOT write anything on this paper.

- 1. In a spreadsheet application, what is the name of the alphanumeric value used to identify a specific cell?
  - A. Cell reference
  - B. Cell location
  - C. Cell coordinate
  - D Cell number (2 marks)
- 2. Which of the following statements is **CORRECT** with reference to Random Access Memory (RAM) and Read Only Memory (ROM)?
  - A. RAM is permanent memory while ROM is temporary memory
  - B.
  - C.
  - RAM is used to store startup programs while ROM is used to store application programs being executed and the store startup programs while ROM is used to store application programs being executed and the store application programs being executed as the store application programs are stored as the stored application are stored as the stored application are stored as the stored application are stored as the stored as the stored application are stored as the stored as the stored application are stored as the stored as the stored application are stored as the stored application are stored as the stored as the stored application are stored as the sto D.

Time Allowed: 2 hours.

- 3. Which of the following is **NOT** an example of an application software?
  - A. Corel Draw
  - В. Microsoft Word
  - C. Device driver
  - D. Microsoft Excel (2 marks)
- 4. The computer program that acts as an interface between computer users and computer hardware is referred to as?
  - Utility program A.
  - Operating system В.
  - C. User program
  - Database application D.

(2 marks)

- 5. Which of the following is **NOT** an important feature in a word processing software?
  - Spell checker and grammar A.
  - В. Search and replace
  - C. Filtering
  - D. Insert table (2 marks)
- 6. Which of the following is **NOT** an example of a computer security threat?
  - A. Malware
  - B. Spyware
  - C. Adware
  - D. Firmware (2 marks)
- 7. The following are advantages of command line interface (CLI) **EXCEPT?** 
  - It is possible to automate the most frequently used commands A.
  - B. The CLI system uses fewer system resources
  - C. It is efficient and fast
  - D. It is designed to be used by all levels of users from basic end users to system administrators (2 marks)

8.	There are various types of input devices used in a point of sale (POS) system in supermarkets or la Which one of the following is <b>NOT</b> applicable in a POS?  A. Optical character reader  B. Barcode reader  C. Card reader  D. Mouse	rge stores. (2 marks)
9.	The following are advantages of using a flash disk for data storage <b>EXCEPT?</b> A. Volatile memory  B. Readily available  C. Increased durability  D. Fast transfer speeds	(2 marks)
10.	Which of the following is <b>NOT</b> a feature of an accounting software?  A. Tax preparation  B. Cloud accounting  C. Mining accounting  D. Expense tracking	(2 marks)
11.	Which of the following is <b>NOT</b> an attribute that makes a server ideal in an organisation?  A. Reliable B. Versatile C. Attractive D. Diligence	(2 marks)
12.	The following are methods that a network engineer can use to connect a user to the Internet <b>EXCEPT?</b> A. Dial up  B. Ethernet  C. Router  D. Wireless	(2 marks)
	Identify the name of the input device shown below:	
	A. Bar code reader B. MICR reader C. Scanner	(2
14.	<ul> <li>D. Printer</li> <li>A hardware device that allows a computer to be connected to an external network is known as</li></ul>	(2 marks)
15.	<ul> <li>D. Router</li> <li>Which generation of computers introduced transistors as a replacement for vacuum tubes?</li> <li>A. First generation</li> <li>B. Second generation</li> <li>C. Third generation</li> <li>D. Fourth generation</li> </ul>	(2 marks)
16.	Which of the following computers is characterised by high cost, fast processing speeds, large physical large storage capability?  A. Midrange computer  B. Mainframe computer  C. Microcomputer  D. Minicomputer	

- 17. Which of the following is a characteristic of the first-generation programming languages? Easy to read and understand A. B. Portability across different systems C. Utilises binary codes D. Supports interactive debugging (2 marks) 18. Which of the following can be classified as a benefit of graphical user interface (GUI)? It allows for easier navigation and interaction B. It requires less memory and processing power C. It provides a command line interface D. It offers higher security measures (2 marks) 19. The feature that allows computer users to perform calculations using formulas in a spreadsheet program is referred A. Autocomplete B. Conditional formatting C. Function library D. Pivot table (2 marks) 20. Which of the following is a two-axis spreadsheet chart that displays a series of data points with straight line segments connecting them with the space underneath the line segments shaded? Line chart A. B. Area chart C. Bar chart Pie chart D. (2 marks) 21. From the table shown below, select the cell reference for the formula that can be used to find the total price of mangoes. В C D 1 2 UNIT PRICE **ITEM NAME ITEM UNITS TOTAL PRICE** 3 30 Oranges 20 4 Mangoes 60 35 5 **Pinneaples** 58 80 6 **Apples** 45 72 A. =D3\*C3В. =C4\*D4=C5\*D5C. D. =D6\*C6 (2 marks) 22. Which of the following is **NOT** a feature of the slide sorter PowerPoint presentation view? It shows small versions of all the slides arranged in horizontal rows B. It enables slides to be easily deleted or rearranged quickly It simultaneously displays the slide, the outline and notes C. Transition and sound effects can be added to several slides simultaneously D. (2 marks) 23. Which of the following is a PowerPoint program feature that removes all formatting and styles from a text selection? A. Delete formatting В. Clear formatting
  - C. Clear text
  - D. Edit formatting

(2 marks)

- 24. Which of the following elements of PowerPoint application offers an efficient way of applying formatting and design elements consistently to every slide in a presentation?
  - A. Slide sorter
  - B. Slide editor
  - C. Slide formatting
  - D. Slide master

(2 marks)

25.		h of the following is an input device?  Monitor	
	A. B.	Speaker	
	C.	Microphone	
	D.	Printer	(2 marks)
			(2 marks)
26.	Whic A.	h of the following is <b>NOT</b> an advantage of fiber-optic cable?  Highly scalable	
	В.	Difficult to tap	
	C.	High bandwidth	
	D.	Easy to work with	(2 marks)
27.	Whic	h of the following network topology has direct connection to every other node creating redu	ndant and robust
		ork structure?	
	A.	Ring	
	B.	Bus	
	C.	Mesh	
	D.	Star	(2 marks)
28.	comn A.	use of messaging systems to send multiple unsolicited messages to large numbers of nercial advertising is known as?  Pop-ups	f recipients for
	B.	Spamming	
	C.	Cookies	(2 1 )
	D.	Jamming	(2 marks)
29.	The n	network device that regenerates signals as they travel over long distances is referred to as?	
	A.	Repeater	
	B.	Bridge	
	C.	Modem	
	D.	Firewall	(2 marks)
30.		h type of connector is commonly used with CAT6 cable?	
	A.	RJ-45	
	B.	SATA	
	C.	USB	
	D.	HDMI	(2 marks)
31.	The t	ype of computer network that connects computers in a global setup is known as?	
	A.	Local area network	
	B.	Wide area network	
	C.	Metropolitan area network	
	D.	Personal area network	(2 marks)
32.	Whic	h of the following is <b>NOT</b> a property of a folder?	
J2.	A.	Space occupied	
	В.	Location	
	C.	Date created	
	D.	Path	(2 marks)
33.	Whic	h of the following gives the purpose of a file extension?	
33.			
	A. B.	To determine the file's physical location To identify the file's owner	
	в. С.	To indicate the file's content or format	
	C. D.		(2 montra)
	υ.	To prevent unauthorised access to the file	(2 marks)
34.		h of the following <b>BEST</b> describes the security measure that can be used to verify the authors are transfer?	enticity of a user
		int creator?	
	A.	Asking for a recent utility bill	
	B.	Requesting a fingerprint scan	
	C.	Sending a verification code to a registered phone number or email address	(2 1 -)
	D.	Offering a secret handshake	(2 marks)

35.		software created by people who are willing to give it away for the satisfaction of sharing or the satisfaction or the satisfaction of sharing or shar	or knowing they
	A.	Freeware	
	В.	Shareware	
	C.	System software	
	D.	Antivirus	(2 marks)
2.5			,
36.		type of user account that enables computer users to have full control of the computer resource	es is referred to
	Α.	Full control account	
	B.	Standard user account	
	C.	Administrative account	
	D.	End user account	(2 marks)
37.	The s	security policy that dictates how network traffic is authorised to pass in each direction is referr	ed to as
	A.	Data security	
	B.	Firewall security	
	C.	Authentication security	
	D.	Encryption security	(2 marks)
38.	gener A. B.	ch of the following refers to the assurance that the owner of a signature key pair that rating an existing signature corresponding to certain data cannot convincingly deny having sig Non-repudiation Integrity	
	C.	Confidentiality	
	D.	Authentication	(2 marks)
39.		ch of the following terms refers to a system that can be setup to lure cyber attackers so as to ing attempts to gain unauthorised access to information systems?  Backtracing	detect and study
	В.	Encryption	SWW.
	C.	Honeypots	4
	D.	Access control	(2 marks)
40.	Whic	ch of the following is <b>NOT</b> a type of computer backup?	
	A.	Incremental backup	
	В.	Full backup	
	C.	Differential backup	
	D.	Half backup	(2 marks)
41.		th of the following BEST describes the type of data security process that enables organisation	tions to manage
		is authorised to access corporate data and resources?	
	A.	Access encryption	
	B.	Access control	
	C.	Data authentication	(2 1 )
	D.	Firewall	(2 marks)
42.		ch of the following is <b>NOT</b> a service provided by an operating system?	
	A.	Program execution	
	В.	Repairing hardware devices	
	C.	File management	
	D.	Communication	(2 marks)
43.		ch of the following is a program that will translate high level language source code to mament by statement manner?	chine code in a
	A.	Assembler	
	B.	Compiler	
	C.	Interpreter	
	D.	Mnemonic	(2 marks)

14.		time required to locate and retrieve stored data from a storage unit in response to a program vn as?	instruction is
	A.	Access time	
	В.	Latency time	
	Б. С.	Transfer time	
	D.		(2 marks)
	υ.	Storage time	(2 marks)
45.	The s as?	social engineering attack where victims are bombarded with false alarms and fictitious threats	is referred to
	A.	Baiting	
	В.	Phishing	
	C.	Scareware	
	D.	Pretexting	(2 marks)
<del>1</del> 6.	Whic	ch of the following is <b>NOT</b> an advanced persistent threat (APT) feature?	
	A.	Lateral movement	
	В.	Reconnaissance	
	C.	Corruption of operations	
	D.	Exploitation	(2 marks)
			(= 11111113)
17.	Consi	sider the following features of a computer booting process	
	•	Not very common	
	•	Can severely affect the system causing data loss	
	•	Power- on self- test is not included	
	The a	above features refer to which type of the booting process?	
	A.	Cold	
	В.	Hot	
	C.	Dump	
	D.	Warm	(2 marks)
18.	Whic	ch of the following is <b>NOT</b> a physical threat to data in an organisation?	
	A.	Theft and loss of devices	
	В.	Environmental factors	
	C.	Malicious employees	
	D.	Hacking	(2 marks)
	Σ.	Thioling	(2 marks)
19.	Which	ch of the following is <b>NOT</b> a characteristic of off-the-shelf software?	
	A.	They are readily available	
	В.	They satisfy the unique needs of users	
	C.	They are well documented	
	D.	They are well tested	(2 marks)
50.	The o	computer network device that manages traffic between these networks by forwarding data	a packets and
		wing multiple devices to use the same internet connection is referred to as	r r r r r r r r r r r r r r r r r r r
	A.	Bridge	
	В.	Hub	
	C.	Gateway	
	D.	Router	(2 marks)
	-		()

#### FUNDAMENTAL ICT SKILLS

**TUESDAY: 22 August 2023. Morning Paper.** 

This paper is made up of fifty (50) Multiple Choice Questions. Answer ALL questions by indicating the letter (A, B, C or D) that represents the correct answer. Each question is allocated two (2) marks. Do NOT write anything on this paper.

- 1. Which of the following devices would you recommend for the marking of multiple choice examination questions?
  - A. OCR
  - B. MICR
  - C. OMR
  - D. Document scanner (2 marks)
- 2. The Basic Input Output System (BIOS) is an example of?
  - A. Software
  - B. Firmware
  - C. Driver
  - D. Battery

(2 marks) tool.co

(2 marks)

Time Allowed: 2 hours.

- 3. Which of the following is **NOT** a characteristic of Read Only Memory (ROM)?
  - A. ROM is volatile
  - B. ROM stores startup programs
  - C. ROM is permanent memory
  - D. ROM is non volatile
- 4. Baraka was given the task of classifying computers by their processing power. He realised that computer A was more powerful than computer B. Computer C was less powerful than computer B, but more powerful than computer D. State the name of computer C:
  - A. Microcomputer
  - B. Mini-computer
  - C. Mainframe computer
  - D. Supercomputer (2 marks)
- 5. Mary found a computer that had the following specification:

"HP All-in-One 27-dp0208nh Core i5 8GB 1TB W10 Pro 27"-2D4Z6EA". Explain the meaning of 27".

- A. Horizontal width of the screen is 27 inches
- B. Vertical height of the screen is 27 inches
- C. Diagonal length of the screen is 27 inches
- D. Orthogonal length of screen is 27 inches (2 marks)
- 6. Which of the following statements **BEST** describes a public domain software?
  - A. Public domain software is written and sold by professionals
  - B. Public domain software is provisioned from the company's infrastructure
  - C. On-premises software is hosted on a remote server in a remote facility
  - D. Public domain software is freely available without license requirements (2 marks)

7.	Which	of the following <b>BEST</b> describes the cost savings brought about by cloud computing?	
	A.	A business does not have to invest in managing hardware, software and networking resources	
	В.		
		A business does not have to predict the capacity requirements for its customers	
	C.	A business has more control over its hardware, software and networking resources	
	D.	A business does not have to worry about internet connectivity and related issues	(2 marks)
			, , ,
8.	Which	of the following components will issue out instructions to synchronise the activities of a comput	ter system?
	A.	Arithmetic and Logic Unit (ALU)	
	В.	Control unit	
	C.	Input device	
	D.	Command unit	(2 marks)
0	Which	of the following is NOT a characteristic of indexed acquential file argenization mathod?	
9.		of the following is <b>NOT</b> a characteristic of indexed sequential file organisation method?	
	A.	It is characterised by high and low hit rates	
	В.	It supports sequential data accessibility	
	C.	It supports selective data accessibility	
		**	(2 )
	D.	Data is not organised in a particular order within the file	(2 marks)
10.	Which	of the following is a security measure that involves the conversation of data into codes before tr	ansmission?
	A.	Digital certificate	
	В.	Encryption	
	C.	Passwords	
	D.	Digital signature	(2 marks)
		8	(=)
11.	Which	of the following devices is designed to offload communication processing task from the host of	computer so
	that the	host computer can be dedicated for application of data processing tasks.	
	A.	Modem	
	B.	Front end processor	
	C.	Router	
	D.	Switch	(2 marks)
10	3371 1 1	CALCILL' NOTE 1 ( COLUMN )	
12.		of the following is <b>NOT</b> an advantage of cloud computing?	
	A.	Data accessibility without regional barriers	
	B.	Cost savings and scalability	
	C.	Better data backup and recovery	
			(21 .)
	D.	Reliable data security	(2 marks)
13.	Which	programming language requires the programmer to use magmonics when writing the source code	la program?
13.		programming language requires the programmer to use mnemonics when writing the source cod	ie program?
	A.	Machine code language	
	В.	High level language	
	C.	Second generation language	
	D.		(2 mortes)
	D.	Fourth generation language	(2 marks)
14.	Which	network topology is characterised by all nodes being attached to the same cable?	
	A.	Star	
	В.	Ring	
		· · ·	
	C.	Bus	
	D.	Mesh	(2 marks)
15.	Which	of the following is the keyboard shortcut that is used to select all the text in a word processing a	nnlication?
15.			ppiication:
	A.	Ctrl + S	
	В.	Ctrl + A	
	C.	Ctrl + V	
	D.	Ctrl + P	(2 marks)
16.	Which	of the following is an advantage of star topology?	
	A.	It allows for isolation of each device within the network	
	В.	Data passes through each workstation attached	
	C.		
		Cable length restricts the number of devices connected	(0 : `
	D.	A central server is not required for its management	(2 marks)

17.	Whic A. B.	h of the following cables does <b>NOT</b> expose signals to electromagnetic interference and noise?  Fiber optic  Twisted pair	
	C.	Coaxial	
	D.	Wireless	(2 marks)
18.	A.	h of the following is <b>NOT</b> a reason why an organisation should implement data security systems' To ensure confidentiality of data	?
	B. C.	To ensure data integrity To ensure data is easily accessible	
	D.	To facilitate data modularity	(2 marks)
19.	An ii	nteractive business providing a space where multiple buyers and suppliers can engage in e-c	commerce is
		red to as?	
	A.	Electronic marketplace	
	B. C.	Electronic business	
	C. D.	Digital marketing	(2 marks)
	Ъ.	Affiliate marketplace	(2 marks)
20.	Whic A.	h of the following is a measure of the resolution of a printed document or digital scanner?  Pixel	
	В.	Dots per inch	
	C.	Inch per dot	
	D.	Inch per pixel	(2 marks)
21.	The p	process of retaining of data at a secure place for long-term storage is known as?	
	Α.	Data archiving	
	B.	Archival Storage	
	C. D.	Disposal of Data Backup	(2 marks)
			(2 marks) no
22.		ype of computer software that controls the functioning of the computer system is referred to as?	4
	A.	Application software	
	В.	Application package	
	C. D.	System software Control software	(2 marks)
	υ.	Control software	(2 marks)
23.	Whic	h is the most appropriate chart in a spreadsheet for comparing the performance of sales of two pro	oducts?
	A.	Row chart	
	B.	Column chart	
	C.	Pie chart	(2 1 )
	D.	Line chart	(2 marks)
24.		h of the following topologies uses the least cable length?	
	A. B.	Star Mesh	
	В. С.	Ring	
	D.	Bus	(2 marks)
25.	Whic	h of the following threats will keep track of every online activity the victim engages in, compile	s all the data
	in the	background and sends it to a third party?	
	A.	Adware	
	В.	Malware	
	C.	Spyware	
	D.	Orgware	(2 marks)
26.	The p	process of improving a website in order to increase its visibility is referred to as?  Search engine optimisation	
	В.	Website call to action	
	C.	Social media marketing	
	D.	Software as a service	(2 marks)

		CM13 Page 4 Out of 6
	D. Dot matrix printer and Daisy wheel printer	(2 marks)
	C. Daisy wheel printer and laser printer	
	B. Inkjet printer and Dot matrix	
	A. Thermal printer and inkjet	
36.	Which of the following are impact printers?	
		(
	D. Control Delete	(2 marks)
	C. Shift Delete	
	B. Delete	
35.	Which key on the keyboard erases letters to the left of the cursor?  A. Backspace	
35	Which kay on the keyboard argon letters to the left of the aureau	
	D. Real time operating system	(2 marks)
	C. Multitasking operating system	
	B. Timesharing operating system	
	A. Multi user operating system	
	memory and execute them either simultaneously or at different intervals?	
34.	Which of the following is a type of operating system that allows computer users to loa	nd several programs into
		· · · · · · · · · · · · · · · · · · ·
	D. Medieval computers	(2 marks)
	C. Hybrid computers	
	B. Digital computers	
	A. Analog computers	
JJ.	is called?	ne omary number system
33.	The computer that performs computations using quantities represented as bits, usually in the	he hinary number exetem
	D. Supercomputer	(2 marks)
	C. Micro computer	<i>(</i> 2
	B. Mainframe computer	
	A. Mini computer	
32.	Which of the following is a computer with very high processing and large storage capability	ties?
		,
	D. Satellite communication	(2 marks)
	C. Twisted pair cable	
	B. Coaxial cable	
	A. Fiber optic cable	
31.	Which of the following is a transmission medium that can reliably transmit signals up to 10	00m?
	D. Data fragmentation	(2 marks)
	C. Data compression	
	B. Data defragmentation	
50.	A. Data optimisation	as:
30.	The reduction in file size to reduce download times and storage requirements is referred to	. 257
	D. The size of the data bus	(2 marks)
	C. The available hard disk space	(2 1 )
	B. The size of Read Only Memory	
	A. Microprocessor clock speed	
29.	Which of the following is <b>NOT</b> a factor that determines the processing power of a digital of	computer?
	D. Overhead projectors	(2 marks)
	C. Optical computing	
	B. Virtual reality	
	A. Quantum computing	
28.	Which of the following is <b>NOT</b> a key advancement in computer hardware?	
	D. Storing the backup copy near to its original site is best strategy	(Z marks)
	C. The more important the data, the greater the need for backing it up D. Storing the backup copy near to its original site is best strategy	(2 marks)
	B. A backup is as useful as its associated restore strategy  The magnificant the data the greater the most for healing it up	
	A. Automated backup and scheduling is preferred over manual operations	
27.	Which of the following is <b>NOT</b> true about data backups?	
~=	Will be a company to the company to	

27	XX 71 · 1	CALCELL TO NOT	
37.		n of the following is <b>NOT</b> an example of an operating system?	
	A.	FORTRAN	
	B.	LINUX	
	C.	WINDOWS	
	D.	UNIX	(2 marks)
38.		n of the following is <b>NOT</b> a direct access storage device?	
	A.	CDROM	
	В.	DVD	
	C.	Hard disk	
	D.	Magnetic tape	(2 marks)
39.	The so	oftware that allows internet users to surf the web is called?	
	A.	Internet website	
	B.	Web browser	
	C.	Home page	
	D.	Uniform resource locator	(2 marks)
40.	Which	n of the following is a bi-directional transmission mode that uses two channels?	
то.	A.	Simplex mode	
	В.	Half duplex mode	
	В. С.		
		Full duplex mode	(2 1 )
	D.	Parallel mode	(2 marks)
41.	Which of the following is a type of computer network hardware that connects two or more network segments that		
		signed using the same network hardware and configured using the same communication protocol	s?
	A.	Gateway	
	В.	Bridge	
	C.	Router	gho
	D.	Repeater	(2 marks)
42.	The ty	ppe of internet service that allows two or more people who are simultaneously connected to the	
		ive, interactive conversations is known as?	
	A.	Internet telephony	
	В.	Telnet	
	C.	Chatting	
	D.	Usenet newsgroup	(2 marks)
	D.	Oscilet newsgroup	(2 marks)
43.		n of the following is the technology that allows computing devices to communicate via short-ran	ige wireless
	signal		
	A.	Infrared technology	
	B.	Wifi technology	
	C.	Microwave systems	
	D.	Satellite systems	(2 marks)
44.	Which	n of the following is <b>NOT</b> a symptom of a computer virus?	
	A.	Slow computer performance	
	В.	Unexpected pop-up windows	
	C.	Frequent computer restarts	
	D.	Blue screen	(2 marks)
45.	The ty	pe of computer network that connects computers in a limited geographical area is referred to as?	
	A.	Metropolitan area network	
	B.	Wide area network	
	C.	Local area network	
	D.	Personal area network	(2 marks)
			(=)

	hich of the following terms describe the commissioning of non-illegal acts through t stem?	no ase of a compact
A.	1	
B.	1	
C.		
D.	Computer theft	(2 marks)
	ne word processing feature that allows computer users to quickly apply the same formule and size or border style to multiple pieces of text or graphics is referred to as?	matting such as color, font
A.		
B.	1	
C.		
D.	Pre-formatting Pre-formatting	(2 marks)
48. W	hich of the following <b>BEST</b> describes the type of presentation view that displays the	e notes, slide and outline?
A.	Slide sorter view	
B.	Normal view	
C.	Slide view	
D.	Outline view	(2 marks)
	a spreadsheet application, which of the following are cell references that change aut pied?	omatically when they are
A.		
B.	Relative references	
C.	Filter references	
D.	Worksheet references	(2 marks)
50. Th	ne following are popular communication internet applications <b>EXCEPT</b> .	
A.	Team viewer	
B.	Google Meet	
C.	Zoom	
D.	WhatsApp	(2 marks)
	ne following are popular communication internet applications <b>EXCEPT</b> .  Team viewer Google Meet Zoom WhatsApp	

## FUNDAMENTAL ICT SKILLS

TUESDAY: 25 April 2023. Morning Paper.

D.

Quantum computing

This paper is made up of fifty (50) Multiple Choice Questions. Answer ALL the questions by indicating the letter (A,B,C) or (D) that represents the correct answer. Each question is allocated two (D) marks. Do NOT write anything on this paper.

1.	Whic	n one of the following is a shared peripheral device?	
	A.	Keyboard	
	B.	Flash disk	
	C.	Mouse	
	D.	Monitor	(2 marks)
2.	Whic	n of the following is a <b>KEY</b> feature that describes proprietary software?	
	A.	Software continually evolving	
	В.	Regular updates available	
	C.	No vendor lock-in	
	D.	Source code open to the public	(2 marks)
3.	Whic	n of the following interface on the motherboard is not used to connect hard disk storage?	iw.cho.
	Α.	IDE	NA
	В.	SATA	
	C.	PS/2	
	D.	EIDE	(2 marks)
	D.	EIDE	(2 marks)
4.	Which of the following statements is <b>FALSE</b> about a computer folder?		
	A.	A folder occupies a certain amount of memory	
	B.	A folder can be shared on a network	
	C.	A folder does not have extension	
	D.	A folder is a way to organise files into groups	(2 marks)
5.	Whic	n of the following helps execute commands, open programs or documents quickly?	
	A.	Text	
	В.	Voice	
	C.	Image	
	D.	Icon	(2 marks)
	D.	icon	(2 marks)
6.		are thousands of file extensions associated with one or more applications.  n of the following is <b>NOT</b> a valid picture file extension?	
	A.	.bmp	
	B.	.gif	
	C.	.jpg	
	D.	.prg	(2 marks)
7	<b>XX71_:</b> -1	invention analysed the advertion of commutes size and therefore because a constitution	
7.		n invention enabled the reduction of computer sizes and therefore becoming more affordable?	
	A.	Logic gates	
	В.	Vacuum tubes	
	C.	Transistors	

(2 marks)

Time Allowed: 2 hours.

8.		ollowing are common features of a presentation software, <b>EXCEPT?</b>		
	A.	Animation effects		
	B. C.	Table of contents		
	C. D.	Slide master Transitions effects	(2 marks)	
			(2 marks)	
9.	Which A.	n of the following is <b>NOT</b> a component of system unit?  Processor		
	В.	Random access memory		
	C.	Flash disk		
	D.	Power supply unit	(2 marks)	
10.		graphical user interface (GUI), what is the name of the row of buttons, often near the top of ow, which controls software functions?	an application	
	A.	Task bar		
	B.	Title bar		
	C.	Tool bar	(2	
	D.	Status bar	(2 marks)	
11.	A.	is the name of a small, battery-backed memory bank in a computer that holds configuration set RAM	tings?	
	B.	ROM		
	C. D.	Cache CMOS	(2 marks)	
	Ъ.	CMOS	(2 marks)	
12.	Which	n of the following statement <b>BEST</b> gives the function of a computer software?		
	A.	To direct all of the peripheral devices on a computer		
	B.	To store information for future reference		
	C.	To introduce data for processing	(2	
	D.	To produce a hard copy of output for filing	(2 marks)	
13.	The following are secondary storage devices, <b>EXCEPT?</b>			
	A.	Floppy		
	B. C.	Magnetic tape Cache		
	D.	Flash disk	(2 marks)	
14.	What	is the name of settings associated with computer files that grant or deny certain rights to hove	v a user or the	
		ting system can access that file?	, a door or the	
	A.	File names		
	B.	File attributes		
	C.	File extensions		
	D.	File system	(2 marks)	
15.		nputer designed to process requests and deliver data to another computer over the interork is known as?	net or a local	
	A.	Client		
	B.	Server		
	C. D.	Node Workstation	(2 marks)	
16.		was the technology that was used in the second-generation computers?	(2 marks)	
10.	A.	Transistors		
	B.	Integrated circuits		
	C.	Vacuum tubes		
	D.	Large scale integrated circuits	(2 marks)	
17.	Updates or fixes to software programs, often released by the program's developers to address bugs or security			
		are known as?		
	A.	Operating systems		
	B. C.	Firmware Patches		
	D.	Applications	(2 marks)	
		11		

18.	The following are common formatting features in Ms Word, <b>EXCEPT?</b> A. Font Style, Size and Colour				
	В.	Set a page layout			
	C.	Add Word Art			
	D.	Spelling and Grammar	(2 marks)		
10			(=)		
19.		th computer control measure is defined as the ability to monitor and react to computer misuse?			
	A.	Intrusion detection			
	B. C.	Firewall			
	C. D.	Encryption	(2 montra)		
	υ.	Honeypot	(2 marks)		
20.	In	the ownership of the software remains with the creator.			
	Α.	Closed software			
	В.	Open source software			
	C.	Proprietary software			
	D.	Processing software	(2 marks)		
21.	Whic	h of the following statement explains the term device driver?			
	A.	It is a permanent software that is embedded in the computer's read only memory			
	В.	It is a software that helps to maintain the proper and smooth functioning of a Computer Syste			
	C.	It is a software that converts a program written in high-level language and assembly language	ge to a form		
		that the computer can understand			
	D.	It is the type of software that controls specific hardware, which is attached to a computer	(2 marks)		
22.	The following are ways in which computers are used at homes, <b>EXCEPT?</b>				
	A.	For entertainment.			
	В.	For automatic diagnosis of diseases			
	C.	For calculating and keeping home budgets	e)DC		
	D.	For shopping purposes	(2 marks)		
23.	Whic	h of the following is an example of a mobile operating system?			
	A.	Palm OS			
	В.	Windows 2019			
	C.	Unix			
	D.	Mac OS	(2 marks)		
24.	The f	following are some types of computers:			
	•	Robots used in a manufacturing industry for production only			
	•	Mobile phones used for communication only			
	•	Computers used in Digital watches			
	•	Computers used in Petrol pumps			
	The a	above computers can be classified as?			
	A.	General purpose			
	В.	Analogue			
	C.	Hybrid			
	D.	Special purpose	(2 marks)		
25.	A do	cument reader is an input device, which can read data directly from source documents.			
	Whic	Which one of the following is <b>NOT</b> a document reader?			
	A.	Scanner			
	B.	Optical character reader			
	C.	Optical mark reader	(2 : )		
	D.	Keyboard	(2 marks)		
26.		cuit board installed in a computer that provides a dedicated network connection to the computer i	s known as?		
	A. B.	Network interface card Modem			
	Б. С.	Port			
	D.	Network interface cable	(2 marks)		

27.	Which of the following can be used to summarise, analyse, explore and present summary data of a company?  A. Pie chart			
	В.	Line chart		
	C.	Pivot Table		
	D.	Bar chart	(2 marks)	
28.	Which of the following is <b>NOT</b> an important factor that a buyer who is intending to acquire an application package should consider?			
	A.	Speed of the computer processor		
	В.	Whether there is maintenance support from the suppliers		
	C.	Portability of the package		
	D.	Whether easy to learn and use	(2 marks)	
29.	Which of the following is defined as a copy of computer data taken and stored elsewhere so that it may be used to restore the original after a data loss event?			
	A.	Disaster plan		
	В.	Recovery		
	C.	Backup		
	D.	Copyright	(2 marks)	
30.		following are some of the attributes that make computers widely accepted and used in the day-to r society, <b>EXCEPT?</b>	o-day activities	
	A.	Computers operate at very high speeds		
	В.	Computers store large amounts of data or instructions in a very small storage space		
	C.	Computers are usually not consistent		
	D.	Computers can be used in different places to perform a large number of different jobs	(2 marks)	
31.	Which of the following can be used to provide references for text in a document?			
	A.	Letters and mailings		
	В.	Headers and footers		
	C.	Columns and margins		
	D.	Footnotes and endnotes	(2 marks)	
32.	Which of the following software is <b>NOT</b> contained in Microsoft office suite?			
	A.	Word		
	B.	Publisher		
	C.	Outlook		
	D.	Sage	(2 marks)	
33.	The following are sources of computer viruses, <b>EXCEPT?</b>			
	A.	Freeware and shareware		
	B.	Use of pirated software		
	C.	Fake games		
	D.	Dirty computer environment	(2 marks)	
34.	The following are some features of a mobile phone			
	I.	It is portable		
	II.	It is an electronic device		
	III.	It is programmable		
	IV.	It is cheap		
	V.	It is easy to use		
	Which of the features above make a mobile phone be regarded as a computer?  A. I & II			
	В.	II & III		
	C.	III & IV		
	D.	IV & V	(2 marks)	
			,	

35.	Whic	h of the following is <b>NOT</b> a type of a server?	
	A.	Print server	
	B.	File server	
	C.	Monitor server	
	D.	Database server	(2 marks)
			` ′
36.	What	is the unit of measuring micro-computer processor's speed?	
	A.	Hertz	
	B.	MIPS	
	C.	Watts	
	D.	BPs	(2 marks)
37.	Whic	h symbol in a spreadsheet indicates absolute cell references in formulas?	
	A.	\$	
	B.	%	
	C.	=	
	D.	&	(2 marks)
38.	What	is the name of the access control method used to verify the identity of an individual who is	attempting to
		access into an information asset?	1 0
	Ä.	Accountability	
	B.	Authorisation	
	C.	Authentication	
	D.	Non-repudiation	(2 marks)
		•	(=,
39.	The f	following are some characteristics of a programming language:	
	•	They are not very easy to understand	
	•	They are not portable	
	•	They always require a translator	
	Whic	h programming language is this?	, ch
	A.	Machine	TANKA!
	В.		4
		Low level	
	C.	High level	(2 montra)
	D.	Fourth generation	(2 marks)
40.		h type of a user interface is text-based and is used to run programs, manage computer files and	interact with
	the co	omputer?	
	A.	Graphical	
	В.	Menu based	
	C.	Command line	
	D.	Voice	(2 marks)
41.	An e	lectrical cable with a copper conductor, an insulator shielding around it and a braided me	tal mesh that
	preve	ents signal interference and cross talk is known as	
	A.	Unshielded twisted pair	
	B.	Shielded twisted pair	
	C.	Optical fibre	
	D.	Coaxial	(2 marks)
42.	What	is the name of the flaws in software, firmware, or hardware that can be exploited by an attack	er to perform
		thorised actions in a system called?	Perioni
	A.	Vulnerabilities	
	В.	Threats	
	C.	Malware	
	D.	Risks	(2 marks)
			()

		h of the following statements <b>BEST</b> describes the main purpose of a firewall?	
	A.	To protect digital data confidentiality as it is stored on computer systems and transmitt	ted using the
		internet or other computer networks	
	В.	To allow non-threatening traffic in and to keep dangerous traffic out	
	C.	To facilitate secure electronic communication and data exchange between people, systems	, and devices
		online	,
	D.	To detect and remove viruses and other kinds of malicious software from a computer	(2 marks)
44.	Whic	h of the following is <b>NOT</b> an advantage of high-level programming languages?	
	A.	They are much easier to write	
	B.	They are portable	
	C.	They are easy to learn	
	D.	They can directly communicate with hardware devices	(2 marks)
45.	The f	ollowing are different types of files which can be created in recent versions of Microsoft Word, l	EXCEPT?
	A.	Word Document	
	B.	Bitmap File Format	
	C.	Portable Document Format	
	D.	Rich Text Format	(2 marks)
46.		is a common unit for measuring the speed of data transmission.	
	A.	Bytes per second	
	В.	Bits per second	
	C.	Baud	
	D.	Nibbles per second	(2 marks)
47.	Whic	h of the following is <b>NOT</b> a component of system software?	
	A.	Operating system	
	В.	Device driver	
	C.	Programming language	
	D.	Utility program	(2 marks)
			(2 marks)
48.	Whic	h of the following is the correct order of the four major functions of a computer?	
	A.	Input, a Process, an Output, Storage	
	В.	Process, an Output, an Input, Storage	
	C.	Input, Output, a Process, Storage	
	D.	Process, Storage, Input, Output	(2 marks)
49.	Whic	h of the following contain portable computers?	
	A.	Micro computers	
	B.	Super computers	
	C.	Mini computers	
	D.	Desktop computer	(2 marks)
50.	A me	chanism where a computer consumes little power and remembers the current state is known as_	
	A.	Restart	
	B.	Shutdown	
	C.	Sleep	
	D.	Hanging	(2 marks)
	ν.		

## FUNDAMENTAL ICT SKILLS

This paper is made up of fifty (50) Multiple Choice Questions. Answer ALL the questions by indicating the letter (A, B, C

TUESDAY: 6 December 2022. Morning Paper.

or D	that rep	resents the correct answer. Do NOT write anything on this paper.	
1.	A per A. B. C. D.	Systems analyst Programmer Systems designer Data processor	(2 marks)
_			(2 marks)
2.		purpose of computer software is to turn data into	
	A. B.	Information	
	Б. С.	Program Knowledge	
	D.	Object	(2 marks)
2		•	, , , , , , , , , , , , , , , , , , ,
3.		of parallel wires or electronic pathway used to transmit data, address and control signals in bother components of the motherboard are known as	etween the CPU
	A.	Bus	'A' 'C)
	В.	Register	AA.
	C.	Processor	
	D.	Port	(2 marks)
4.	Ident	ify an advantage of information communication technology (ICT) in the education sector.	
	A.	ICT use in the classroom can be a distraction	
	B.	ICT can detract students from social interactions	
	C.	ICT use motivates learning	
	D.	ICT can foster cheating	(2 marks)
5.		ype of an operating system which allows a single CPU to execute what appears to be more the same time is called	nan one program
	A.	Multiprocessing	
	В.	Multiprogramming	
	C.	Multiuser	
	D.	Parallel	(2 marks)
6.	Whic	th of the following is <b>NOT</b> part of a Computer processor?	
	A.	Register	
	В.	Cache	
	C.	Bus	
	D.	RAM	(2 marks)
7.		is the name given to a computer network for interconnecting electronic devices within an incespace?	dividual person's
	A.	Personal area network (PAN)	
	B.	Metropolitan area network (MAN)	
	C.	Wide area network (WAN)	
	D.	Virtual private network (VPN)	(2 marks)

Time Allowed: 2 hours.

8.	The f	ollowing are basic file operations by an operating system EXCEPT	
	A.	Create	
	B.	Read	
	C.	Delete	
	D.	Manage	(2 marks)
9.	Whic	h of the following is <b>NOT</b> a feature of third generation of computers?	
	A.	Technology used was of integrated circuits	
	B.	Smaller, cheaper, more efficient and faster than second generation computers	
	C.	Single-chip processor and the single-board computer emerged	
	D.	Used high-level programming languages	(2 marks)
10.	Whic	h of the following devices converts analogue signals to digital signals and vice versa?	
	A.	Hub	
	В.	Modem	
	C.	Router	
	D.	Switch	(2 marks)
11.		h of the following refers to a security measure system that acts as a trap for hackers and can ng attempts on a system?	be used to study
	A.	Honeypots	
	B.	Encryption	
	C.	Backups	
	D.	Controls	(2 marks)
12.	Whic	h of the following terms refer to a computer animation technique used to convert images fi	rom one form to
12.	anoth		0110 101111 00
	A.	Modeling	
	B.	Framing	
	C.	Morphing	
	D.	er? Modeling Framing Morphing Scarping	(2 marks)
13.	Identi	ify two advantages of using new technology in businesses.	
10.	I.	Easier, faster and more effective communication	
	II.	Increased dependency on technology	
	III.	Require regular updates	
	IV.	Ability to develop new, innovative approaches	
	A.	I and II	
	В.	II and III	
	В. С.	I and IV	
	D.	II and IV	(2 marks)
14.	A sat	of step-by-step instructions, used to solve a problem or perform a computation is known as _	
14.	A set	Algorithm	·•
	В.	Flowchart	
	C.	Artefact	
	D.	Accumulator	(2 marks)
15.	Whic	h one of the following is <b>NOT</b> an example of an antivirus software?	
13.	A.	Kaspersky	
	В.	McAfee	
	Б. С.	Acrobat	
	C. D.	Acrobat Avira	(2 marks)
	υ.	Ανιια	(Z IIIai KS)
16.		nain part of the computer that contains all the essential hardware components is known as	·
	A.	System unit	
	В.	Monitor	
	C.	Processor	(0 1
	D.	Power supply	(2 marks)

17.	A	consists of two or more computers connected together.	
	A. Ne	etwork	
	B. Se		
	C. Cl	ient	
	D. Ca	ıble	(2 marks)
18.	Whic	h of the following devices can be used to input sound into a device?	
	A.	Speakers	
	В.	Sound card	
	C.	Microphone	
	D.	Earphones	(2 marks)
19.	The I	nternet is an example of a	
	A.	Metropolitan Area Network	
	B.	Campus Area Network	
	C.	Wide Area Network	
	D.	Local Area Network	(2 marks)
20.		h of the following attacks involve a hacker intercepting and relaying messages between two ve they are communicating with each other?	parties who
	A.	Advanced persistent threats	
	B.	Man-in-the-middle attack	
	C.	Drive-by attacks	
	D.	AI powered attacks	(2 marks)
21.	Whic	h of the following statements is <b>CORRECT</b> ?	
	A.	A translator translates object code to source code	
	B.	Interpreter translates entire program before execution	
	C.	Interpreter saves the object program	<b>~</b> C
	D.	Interpreter is effective in statement by statement error correction	(2 marks ch
22.	Whic	h of the following is <b>NOT</b> an advantage of command line interface?	7
	A.	Command line interface can handle repetitive tasks easily	
	В.	Command line interface requires less memory than other interfaces	
	C.	Command line interface does not require windows and a low-resolution monitor can be used	
	D.	Command line interface is very user friendly	(2 marks)
23.	Whic	h of the following statements is correct as used in ICT?	
	A.	Machine language use mnemonics	
	В.	Machine language use abbreviations	
	C.	Machine language use binary notation	
	D.	Assembly language use binary notation	(2 marks)
24.	What	is the function of uninterruptible power supply (UPS)?	
	A.	It is a device that stores chemical energy and converts it to electrical energy	
	В.	It provides enough electricity to a computer during a power outage so that the user can save shutting down the computer	files before
	C.	It is a device which converts mains AC to low-voltage regulated DC power for the internal con a computer	mponents of
	D.	It means electric energy or capacity supplied by an electric utility to replace electric energy	v ordinarily
	Σ.	generated by a qualifying facility's own electric generation equipment during an unschedule the qualifying facility	
25.	Whic	h of the following software acquisition statements is <b>FALSE</b> ?	
	A.	Off-the-shelf software is cheap	
	B.	Off-the-shelf software is less error prone	
	C.	Off-the-shelf software has high quality documentation	
	D.	Off-the-shelf software rarely gives an organisation competitive advantage	(2 marks)

- 26. Which of the following is the major limitation of bus topology?
  - A. Uses a lot of cabling in comparison to other topologies
  - B. Failure of the central cable will bring the whole network down
  - C. Failure of the central computer will cause the network to break down
  - D. Easy to detect faults and to add new sites to the network

(2 marks)

- 27. Which of the following artificial intelligence technologies, incorporates the use of voice recognition, voice synthesis and language comprehension systems?
  - A. Virtual reality systems
  - B. Natural language processing
  - C. Computer aided detection
  - D. Magnetic resonance imaging

(2 marks)

- 28. Which of the following statements **BEST** explains "wireless fidelity" (Wi-Fi)?
  - A. A set of standards for facilitating wireless networks in a local area, enabling devices to connect to the Internet when in range of an access point.
  - B. A website or similar online resource which allows anyone to set up a resource in which content can be created collectively
  - C. A worldwide Interoperability for Microwave Access, a telecommunication technology aimed at providing wireless data over long distances.
  - D. It is a computer network connecting millions of computers all over the world and provides communications to governments, businesses, universities, schools and homes. (2 marks)
- 29. Which of the following features is **NOT** part of a database?
  - A. Tables
  - B. Records
  - C. Fields
  - D. Worksheets

(2 marks)

- 30. Identify the statement which **BEST** defines throughput as used in computing?
  - A. The volume of work or information flowing through a system.
  - B. The execution of more than one program, apparently at the same time, on a computer.
  - C. It is a measure of the number of pixels or small dots displayed on a computer display screen, printer or scanner.
  - D. The process and outcome of successfully adapting to difficult or challenging life experiences especially, through mental, emotional, and behavioral flexibility and adjustment to external and internal demands.

(2 marks)

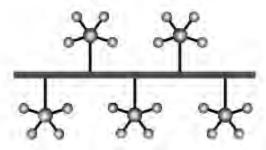

- 31. Select the **BEST** statement that defines a computer chipset
  - A. A device for storing and processing data, typically in binary form, according to instructions given to it in a variable program.
  - B. A technique through which multiple operating systems can be kept within the boot sequence on the same computer.
  - C. A collection of integrated circuits which are designed to function together as a unit, especially to perform a particular task within a computer system.
  - D. A printed circuit board containing the principal components of a computer or other device, with connectors for other circuit boards to be slotted into. (2 marks)
- 32. State the function of name box feature found in a spreadsheet window.
  - A. To display the active cell address or the name of the selected cell, range, or object.
  - B. To enter information or formulas into a cell.
  - C. To display various messages as well as the status of the Num Lock, Caps Lock, and Scroll Lock keys on your keyboard.
  - D. To display the name of the program and the name of the current workbook.

(2 marks)

- 33. Which one of the following is **NOT** a function of a computer network?
  - A. Users can easily share or exchange information
  - B. The computers in a network can share resources such as printers and scanners
  - C. Enhances user's security
  - D. Data backup can be achieved easily

(2 marks)

34. What is the name of the network topology shown below?

- A. Star
- B. Bus
- C. Ring
- D. Tree (2 marks)
- 35. Which of the following network devices can connect similar types of local area networks, while keeping local data inside its own network?
  - A. Bridges
  - B. Repeaters
  - C. Routers
  - D. Switches (2 marks)
- 36. Which of the following is **NOT** a reason for parallel lines not being used for long distance data transmission?
  - A. Cost factor
  - B. Signal attenuation
  - C. Number of transmission channels
  - D. Low speed

(2 marks)

- 37. All of the following are techniques B2C e-commerce companies use to attract customers, with the exception of?
  - A. Registering with search engines
  - B. Virtual marketing
  - C. Viral marketing
  - D. Online ads

(2 marks)

- 38. Which of the following statements **BEST** describes the function of magnetic ink character recognition (MICR) method of capturing data?
  - A. Converts the physical action to be measured into an electrical equivalent and processes it so that the electrical signals can be easily sent and further processed.
  - B. Verifies the legitimacy or originality of paper documents, especially bank cheques.
  - C. Converts an image of text into a machine-readable text format.
  - D. Scans and captures the optical marks on such documents as the multiple choice scoring sheets. (2 marks)
- 39. The following are examples of system software **EXCEPT**?
  - A. Operating system
  - B. Word processor
  - C. Utility
  - D. Device driver

(2 marks)

- 40. Which of the following is **NOT** a back up storage device?
  - A. Hard disk
  - B. DVD
  - C. Cache
  - D. CD

(2 marks)

- 41. FORTRAN, BASIC, COBOL are examples of?
  - A. High level programming languages
  - B. Low level programming languages
  - C. Assembly languages
  - D. Application software

(2 marks)

42.	Which of the following is measured using "dots per inch"?						
	A.	Screen size					
	В.	Data speeds for modems					
	C.	Resolution of an image					
	D.	Processing speed	(2 marks)				
43.	Whic	h one of the following statements, <b>BEST</b> describes the function of a slide master view?					
	A.	It allows you edit and create your own layouts.					
	В.	It shows the layout of your presentation as it is printed out on paper.					
	C.	It allows to change the layout for every single notes section in your project.					
	D.	It allows a colourful presentation to be shown.	(2marks)				
44.	Whic	h <b>ONE</b> of the following is <b>NOT</b> an example of an operating system?					
	A.	MacOS					
	B.	Android					
	C.	Oracle					
	D.	Linux	(2 marks)				
4.5	D : .						
45.		ers can be impact or non-impact. Which one of the following is a non-impact printer?  Dot Matrix					
	A.						
	В.	Daisy Wheel					
	C.	Chain printer	(2 1 )				
	D.	Inkjet printer	(2 marks)				
46.	Selec	Select from the list below one disadvantage of a client-server network?					
	A.	When server is not on, clients do not power up.					
	B.	Clients cannot connect wirelessly to the server					
	C.	Dependent on server if server goes down clients stop working					
	D.	Clients are more expensive than the server	(2 marks)				
47.		h ONE of the following is neither an input nor output device?					
	A.	Flash disk					
	В.	Mouse					
	C.	LaserJet					
	D.	Sensor	(2 marks)				
48.	Whic	h of the following is <b>NOT</b> an ethical issue in computing?					
	A.	Privacy					
	В.	Security					
	C.	Tomography					
	D.	Cyberslacking	(2 marks)				
49.	Whic	h of the following refers to a grid in spreadsheet software consisting of cells, rows and columns?					
	A.	Worksheet					
	В.	Workbook					
	C.	Gridlines					
	D.	Workflow	(2 marks)				
	٥.		(= 11141110)				
50.		ection at the bottom of a page reserved for displaying information that is common to the whole	document i				
		ed to as?					
	Α.	Footnote					
	В.	Task bar					
	C.	Footer					
	D.	Endnote	(2 marks)				

#### PILOT PAPER

## FUNDAMENTAL ICT SKILLS

November 2021. Time Allowed: Two Hours

This paper has three sections. Section One has forty (40) multiple choice questions. Section Two has twenty (20) short response questions. Section Three has one (1) essay question. All questions are compulsory.

## **SECTION ONE [40 MARKS] [40 MINUTES]**

- 1. Name the process of determining what the authenticated entity is allowed to access and what operations they are allowed to perform. (1 mark) 2. Identify the science of measuring physiological characteristics that include hand prints, fingerprints, voice, or the entire face. (1 mark) 3. Name a Microsoft Word feature used that allows one to send copies of the same letter to multiple recipients. (1 mark) 4. A device that uses the best possible path to forward data packets from one network to another is. (1 mark) 5. Data and instructions inside the computer are represented using two states of electricity, that is, on and off. This is referred to as: (1 mark) 6. Name the software that uses rows and columns to manipulate numerical data. (1 mark)
- 7. Which generation of computers supports artificial intelligence? (1 mark)
- 8. State true or false: Absolute references are cell references that change when a formula is copied from one cell to another. (1 mark)
- 9. State true or false: System software includes programs designed to help end users solve specific problems or perform specific tasks using the computer. (1 mark)
- 10. State true or false: Linux, Windows and Android are examples of application software. (1 mark)
- 11. State true or false: Cut and paste is used to move the original content from one document to a new location without creating a duplicate. (1 mark)
- 12. State true or false: A standard user account gives full control access and permissions including installing applications and changing security settings. (1 mark)
- 13. State true or false: A compiler executes the source program line by line. (1 mark)
- 14. State true or false: A router broadcasts data to all connected devices. (1 mark)
- 15. State true or false: In a peer to-peer network, each workstation can act both as a client and server share all or part of its resources. (1 mark)
- 16. State true or false: Device drivers are used to convert fragmented files into contiguous files to enable faster loading of files. (1 mark)

17.	In a computer network, a switch can be used to:  (a) Deliver data packets to the intended destination port.  (b) Ensure data packets use the best possible route to get to the destination.  (c) Translate data from one kind of protocol to another.  (d) Link two or more network segments together.	(1 mark)
18.	You have been advised to purchase a Category 6 cable to connect your laptop to a router. This caexample of:  (a) Fibre optic cables  (b) Shielded twisted pair cables  (c) Unshielded twisted pair cables  (d) Coaxial cables.	able is an (1 mark)
19.	The gap between those who have and those who do <b>NOT</b> have the ability to use technology is call (a)  Grid computing (b)  Internet of things (c)  Radio Frequency Identification (d)  Digital divide	illed. (1 mark)
20.	The Slide Master view in power point allows a user to:  (a) Encrypt a PowerPoint document  (b) Make uniform changes to all the slides in the presentation  (c) Check for compatibility issues  (d) Insert a SmartArt graphic in a document.	(1 mark)
21.	(c) Check for compatibility issues (d) Insert a SmartArt graphic in a document.  One limitation of Server based networks is: (a) Scalability (b) Increased costs (c) Centralised administration (d) Multiple users may share files on the server.	(1 mark)
22.	The fastest computers used by large organisations to execute computationally demanding tasks in very large data sets are.  (a) Mainframe computers (b) Minicomputers (c) Supercomputers (d) Microcomputers.	nvolving (1 mark)
23.	Mary wants to transfer data from a laptop to a tablet computer using unguided media. Select the to use for this purpose from the following:  (a) Bluetooth  (b) Microwave transmission  (c) Fiber optic cables  (d) Coaxial cables.	best option (1 mark)
24.	Instructions needed when starting the computer are stored in the:  (a) Random Access Memory  (b) Read Only Memory  (c) Processor  (d) Joystick.	(1 mark)

25. Viruses, trojans and worms are examples of: (1 mark) Firewalls (a) (b) Malware Social engineering (c) (d) Natural hazards. 26. Laptops, desktops and thin clients are examples of: (1 mark) (a) Mainframe computers (b) Supercomputers (c) Minicomputers (d) Microcomputers. 27. The following are functions of an operating system **except**: (1 mark) (a) Data backup (b) File management Loading application software (c) (d) Provides security. 28. Which of the following is an example of an output device? (1 mark) Mouse (a) (b) Speakers Processor (c) Flash disk. (d) 29. Utility software includes: (1 mark) Random access memory (a) (b) Central processing unit (c) Honeypots (d) Antivirus. 30. One characteristic of third generation computers is the use of: (1 mark) (a) **Transistors** (b) Integrated circuits Vacuum tubes (c) (d) Parallel processing.

From questions $31 - 35$ , match the five items on the left with their definition or example on the right:				
31.	Peripheral devices	Hard disks, Memory cards and DVD drives	(1 mark)	
32.	Storage devices	Random access memory	(1 mark)	
33.	Input devices	Used to produce hardcopy output	(1 mark)	
34.	Primary storage	Touch screen, Microphones and Light pens	(1 mark)	
35.	Printers	Keyboard, Speakers and Scanners	(1 mark)	

From questions 36 – 40, match the five items on the left with their definition on the right:					
36.	Firewalls	Scrambling and altering of data to prevent unauthorised access.	(1 mark)		
37.	Digital certificates	Used to verify the identity of a user or device, and establish authent online transactions.	icity of (1 mark)		
38.	Encryption	The process of verifying the real identity of a user, for example, passwords.	by using (1 mark)		
39.	Computer forensics	Used to filter incoming and outgoing network traffic based on predesecurity rules.	etermined (1 mark)		
40.	Authentication	Investigation and analysis of data held in computers as evidence in law.	a court of (1 mark)		

# SECTION TWO [40 MARKS] [1 Hour]

# You are advised not to exceed forty words in answering each question.

41.	Distinguish between the following terminologies:	
	(a) A Workbook and Worksheet in Microsoft Excel.	(2 marks)
	(b) Command line interface and Graphical user interface.	(2 marks)
	(c) Antivirus and Backups	(2 marks)
	(d) Denial-of-service attacks and Distributed Denial-of-Service attacks.	(2 marks)
	(e) Personal area network and Wide area network.	(2 marks)
42.	Identify two benefits of:	
	(a) Accounting software.	(2 marks)
	(b) Presentation software	(2 marks)
43.	Highlight two causes of hardware obsolescence.	(2 marks)
44.	List two icons found on a Windows desktop.	(2 marks)
45.	Identify two to factors to consider when selecting a printer.	(2 marks)
46.	State two options available when aligning text in Microsoft Excel.	(2 marks)
47.	Explain two factors to consider when selecting an operating system.	(2 marks)
48.	Highlight two computer application areas.	(2 marks)
49.	In Word processing software, page orientation can be displayed in two ways. O	
		(2 marks)
50.	Explain two basic features of accounting software.	(2 marks)
51.	Outline two disadvantages of low-level languages.	(2 marks)
52.	Explain two ways in which information technology has transformed organisation	ons. (2 marks)
53.	Discuss the impact of cyber security education.	(2 marks)
54.	Describe the role of hyperlinks in Microsoft Word.	(2 marks)
55.	Explain two ways that can be used to make a Microsoft PowerPoint presentation	n attractive. (2 marks) (Total: 40 marks)

# **SECTION III**

# [20 MARKS] [20 MINUTES]

56. Create a new blank workbook in Microsoft Excel. Name the workbook *Westlands Sales Report*. Enter the data as it appears below: (1 mark)

MONTH	Jan	Feb	Mar	Apr	May	Total Sales
SALESPERSON	N ]					
Renee	356	900	566	890	380	
Talia	860	680	590	650	760	
Moses	345	560	210	745	120	
Rose	240	320	380	740	900	

(a)	Insert a row before the first row and type WESTLANDS SALES REPORT in cell A1.				
(b)	Insert a new row between Talia and Moses. In the new row, type in the following: John 890 211 340 691 720	(1 mark)			
(c)	Calculate the Totals in Column G.	(2 marks)			
(d)	Type the word Minimum in cell I2. Calculate the Minimum Sales.	(2 marks)			
(e)	Type the word Maximum in cell J2. Calculate the Maximum Sales.	(2 marks)			
(f)	Merge and Center cell A1 to J1.	(1 mark)			
(g)	Save the document as Westlands Sales report.				
(h)	Create a 2-DClustered column chart showing the Total sales for each Sales person.	(3 marks)			
(i)	Edit the Title of the chart to display the data WESTLANDS SALES REPORT.	(1 mark)			
(j)	Insert data labels on the <i>Inside end</i> showing the Total sales for each Sales person.	(2 marks)			
(k)	Move the chart to Sheet 2, pasting it in cell B2.	(2 marks)			
(1)	Rename Sheet 1 as Sales Data and Sheet 2 as Chart.	(2 marks) (Total: 20 marks)			
	••••••				

## FUNDAMENTAL ICT SKILLS

TUESDAY: 2 August 2022. Morning paper.

This paper is made up of fifty (50) Multiple Choice Questions. Answer ALL the questions by indicating the letter (A, B, C or D) that represents the correct answer. Do NOT write anything on this paper.

1.		is a type of memory that can speed up computer processing.	
	A.	Random Access Memory	
	B.	Read Only Memory	
	C.	Cache Memory	
	D.	Programmable Read Only Memory	(2 marks)
2.		is the number of bytes in a Kilobyte.	
	A.	1000	
	B.	8	
	C.	2024	
	D.	1024	(2 marks)
3.	Select	the appropriate storage capacity of the following storage media:	
	Floppy	disk, DVD, Blu-ray disk, Compact disk	
	A.	Floppy disk-25GB, DVD-4.7GB, Blu-ray disk-1.44MB, Compact disk-650MB	
	B.	Floppy disk-1.44MB, DVD-4.7GB, Blu-ray disk-25GB, Compact disk-650MB	
	C.	Floppy disk-1.44MB, DVD-650MB,Blu-ray disk-4.7GB, Compact disk-25GB	
	D.	Floppy disk-650MB, DVD-4.7GB, Blu-ray disk -25GB, Compact disk-1.44GB	(2 marks)
4.		is a device for converting handwritten impressions into coded characters and	positional
	coordi	nates for input to a computer.	F
	A.	Wand	
	В.	Mouse	
	C.	Writing tablet	
	D.	Touch panel	(2 marks)
5.	Ontica	1 Mark Recognition (OMR) devices sense the input based on	
	A.	Handwritten document	
	В.	Printed magnetic ink	
	C.	Text present on paper	
	D.	Presence or absence of mark such as a pencil mark	(2 marks)
6.	Which	computer screen is not good for your health (eye strain, headache)?	
•	A.	LCD	
	В.	TFT	
	C.	CRT	
	D.	OLED	(2 marks)
	ъ.	OLLD	(2 marks)
7.		is another name for main memory.	
	A.	Immediate access storage	
	B.	Auxiliary storage	
	C.	Backing storage	(2
	D.	Secondary storage	(2 marks)

Time Allowed: 2 hours.

8.		disks, optical disks and floppy disks are all types of	
	Α.	Serial access storage	
	B.	Direct access storage	
	C. D.	Volatile access storage Non-impact access storage	(2 marks)
9.		is the process of reading data from main memory and writing it to a secondary stora	ige.
			C
	A.	Writing the data	
	B.	Reading the data	
	C.	Saving the data	
	D.	Loading the data	(2 marks)
10.	Ident	ify the component of CPU responsible for comparing the contents of two pieces of data.	
	A.	ALU	
	В.	Register	
	C.	Control unit	
	D.	Bus	(2 marks)
11.	Utilit	y program is an example of	
	A.	Firmware	
	В.	Operating system	
	C.	Application software	
	D.	System software	(2 marks)
12.	Whic	th of the following is equal to a Terabyte	
12.	A.	512 GB	
	В.	1024GB	
	C.	1024MB	
	D.	1024KB	(2 marks)
13.		is used to measure processor speed	(2 marks)
13.	 A.	is used to measure processor speed.  Nanoseconds	7
	В.	Kilo-second	
	C.	Gigahertz	
	D.	Megabyte	(2 marks)
	ъ.	Megabyte	(2 marks)
14.		ider the following path C:\ICT\Module\Module1.exe. What is the name of the file in this path?	
	A.	ICT	
	B.	Module	
	C.	Module1.exe	(a 1 )
	D.	С	(2 marks)
15.	In a p	presentation of PowerPoint, the special effects used to introduce slides are known as	·
	A.	Custom animation	
	В.	Transitions	
	C.	Annotations	
	D.	Slide	(2 marks)
16.	A set	of instructions that a computer follows in order to perform a particular task is known as	•
	A.	Program	
	B.	Hardware	
	C.	Firmware	
	D.	Code	(2 marks)
17	g	sty has some to rely beguilty on commuteer. Which of the faller in the first section of	
17.		ety has come to rely heavily on computers. Which of the following is a disadvantage of computers?	
	A.	Increases user productivity	
	B.	Stores vast amounts of information	
	C. D.	Helps sort, organise, and search through information Increases waste affecting the environment	(2 marks)
	ν.	mercases waste affecting the chyllullicht	(2 marks)

18.	are lined across the top of the keyboard and act as shortcuts, performing certain tasks, like					
	savin	g files, printing data, or ref	reshing a page.			
	A.	Alphabetic keys				
	B.	Navigation keys				
	C.	Function keys				
	D.	Special keys		(2 marks)		
19.	Whic	h one of the following is N	OT a characteristic of second generation computers?			
	A.	Main electronic compo				
	B.	Supported machine and				
	C.	Main memory was of n				
	D.		cluded punched cards and magnetic tape.	(2 marks)		
20.		work technology that conn	ects computers via cables to each other and to the Internet is	known as?		
	A.	Ethernet				
	В.	Intranet				
	C.	Extranet				
	D.	Wi-Fi		(2 marks)		
21.	_		roduce and manipulate artwork. Which one of the following	is an example of this		
	packa					
	A.	Corel Draw				
	B.	Page Maker				
	C.	Power Point		(2		
	D.	Ms Word		(2 marks)		
22.			evices one which is NOT a magnetic storage device.			
	A.	Floppy disk				
	B.	Hard disk				
	C.	Zip disk				
	D.	Flash disk		(2 marks)		
23.	Whic	_	management utility available in Windows operating system?	,		
	A.	Windows Explorer				
	В.	Notepad				
	C.	Internet Explorer				
	D.	Paint		(2 marks)		
24.	Α	is a small pie	ce of information you may be asked to accept when connec	cting to certain servers		
	via a	web browser.				
	A.	Cookie				
	В.	Shopping cart				
	C.	Spam				
	D.	Virus		(2 marks)		
25.	Ident	ify the statement below wh	ich best describes a remote user in networking.			
	A.	A person situated far fr	om the main centres of population.			
	В.	A user who is operating	g a hardware device or accessing software from an off-site lo	ocation.		
	C.	A primitive user who h	as no knowledge of computers.			
	D.	A user account with l surfing the Web.	imited privileges that will be used for general tasks such	as reading email and (2 marks)		
26.	One o	One of the typical accounting modules that is available in accounting software packages is accounts receivable.				
-0.			OT handled by this module?			
	A.	Invoicing of customers				
	В.	Processing of customer				
	C.		vendors, discounts and payment.			
	D.		ows money due to the business by the customers	(2 marks)		
	₽.	- 151115 10Port Willell Bill	Industy due to the oddiness by the editionies	(2 marks)		

27.		t is a physical docking point on which an external device can be connected to the computer for exa Port. Which device is connected through VGA port?	ample
	A.	Monitor	
	B.	Printer	
	C.	Keyboard	
	D.	Mouse	(2 marks)
28.		h one of the following is the keyboard shortcut keys to permanently delete a file from folder?	
	A. B.	Shift + Delete Ctrl + Delete	
	Б. С.	Alt + Delete	
	D.	Shift + End	(2 marks)
	D.	SHIRT + Linu	(2 marks)
29.	Which A.	h utility tool allows a user to remove files that are no longer needed or that can be safely deleted? Disk cleanup	
	B.	Disk defragmenter	
	C.	Disk management	
	D.	Antivirus	(2 marks)
30.	Which	h one of the following statements <b>BEST</b> describes a computer worm?	
	A.	A malicious piece of code intentionally inserted into a software system that will set off a malic	ious
		function when specified conditions are met	
	В.	A malicious program that replicates itself, automatically spreading through a network	
	C.	A malicious code or program written to alter the way a computer operates and is designed to spone computer to another	oread from
	D.	A malicious code or software that looks legitimate but can take control of your computer	(2 marks)
31.	Whiel	h of the following can be used to improve the security of a system?	
011	A.	Audit log	
	В.	Dumpster diving	HOR
	C.	Shoulder surfing	WW.O.
	D.	Threat monitoring	(2 marks)
32.		is a type of channel that moves data relatively slowly.	
	A.	Narrowband channel	
	B.	Wideband channel	
	C.	Voiceband channel	
	D.	Broadband channel	(2 marks)
33.	Passw	ords enable users to perform which of the following tasks?	
	A.	Get into the system quickly	
	В.	Retain confidentiality of files	
	C.	Simplify file structures	
	D.	Make efficient use of time	(2 marks)
34.	Which	h of the following shortcut keys is used to change line height to 1.5 in word processing application	1?
	A.	Ctrl + 5	
	B.	Ctrl + 3	
	C.	Ctrl + 2	
	D.	Ctrl + 1	(2 marks)
35.		is the name of a program designed to destroy data on your computer which can travel to "in	nfect" other
	comp		
	A.	Virus	
	В.	Torpedo	
	C.	Hurricane	

D.

Disease

(2 marks)

36.	A.	oxy server is used for which of the following?  To provide security against unauthorised users					
	В. С.	To process client requests for database access To provide TCP/IP					
	D.	To process client requests for web pages	(2 marks)				
			(= 11141115)				
37.		h of the following is an invalid edition of Microsoft PowerPoint?					
	A. B.	MS PowerPoint 2001 MS PowerPoint 2010					
	Б. С.	MS PowerPoint 2007					
	D.	MS PowerPoint 2003	(2 marks)				
•			,				
38.		h of the following do NOT harm computer resources?					
	A. B.	Virus					
	Б. С.	Trojan horse Firewall					
	D.	Computer worm	(2 marks)				
39.		is a network that is part of your intranet but is extended to users outside you accessible from the internet.	r organisation				
	A.	An internet					
	В.	An extranet					
	C.	Virtual private network					
	D.	Wide area network	(2 marks)				
40	****						
40.		h type of network needs "terminator" to function correctly?					
	A. B.	Ring Mesh					
	C.	Star					
	D.	Bus	(2 marks)				
4.1	т						
41.	A.	se you accidentally delete a file you can it again from the Recycle Bin.  Retake					
	A. B.	Restore					
	C.	Recreate					
	D.	Share	(2 marks)				
42.		Which of the following would most likely <b>NOT</b> be a symptom of a virus?  A The Web browser opens to an unusual home page					
	A.	The Web browser opens to an unusual home page					
	B. C.	Odd messages or images are displayed on the screen The CD-ROM stops functioning					
	D.	Existing program files and icons disappear	(2 marks)				
			(=)				
43.	Which one of the following is checked by a computer for user names and passwords for a match before granting						
	acces						
	A. B.	Network Website					
	Б. С.	Backup file					
	D.	Database	(2 marks)				
			,				
44.		h of the following is placed at the end of a document?					
	A.	Foot Note					
	B. C.	Footer					
	C. D.	Header End Note	(2 marks)				
	ν.		(2 marks)				
45.		h of the following is the most used rule for backup?					
	A.	3-2-1 Rule					
	B. C.	4-3-1 Rule 4-2-1 Rule					
	D.	4-3-2 Rule	(2 marks)				
	-		,)				

46.	Whic	h of the following is the process of retaining or keeping of data at a secure place for long-term	i storage?
	A.	Archival Storage	
	В.	Disposal of Data	
	C.	Backup	
	D.	Data archiving	(2 marks)
47.		is not useful for the secure disposal of data.	
	A.	Destroy the data	
	B.	Destroy access	
	C.	Destroy the device	
	D.	Keep careful records	(2 marks)
48.		is a property indicating how much data a file contains.	
	A.	Executable	
	B.	File	
	C.	File size	
	D.	Extension	(2 marks)
49.		is the space left between the margin and the start of a paragraph.	
	A.	Indentation	
	В.	Spacing	
	C.	Gutter	
	D.	Alignment	(2 marks)
50.	Data	is converted into light and transferred at high speeds in	
	A.	Hub	
	В.	Modem	
	C.	Router	N. C.
	D.	Fibre optic cable	(2 marks) (2.50.1
			(2 marks) co.k
			A. T.

#### **FUNDAMENTAL ICT SKILLS**

TUESDAY: 5 April 2022. Morning paper.

		made up of a hundred (100) Multiple Choice Questions. Answer ALL questions by indicating the letter hat represents the correct answer. Do NOT write anything on this paper.
1.	Identi	fy the name of keys present on the top row of a typical keyboard.
	(a)	Navigation.
	(b)	Typewriter.
	(c)	Numeric.
	(d)	Function. (1 mark)

	(d)	Function.	(1 mark)
2.		is a device used to provide a hard copy.	
	(a)	Computer monitor.	

- (b) Cathode Ray Tube. Printer. (c) (d) Card reader.
- (1 mark) 3.
  - is a device used to connect two computers using a telephone line.
    - (a) Multiplexer. Router.
    - (b) Concentrator.
    - (c) (d) Modem.
- (1 mark)
- 4. is a light sensitive device that converts printed texts, drawings and other images into digital form.
  - Optical mark reader. (a)
    - (b) Optical character reader. (c) Scanner.

    - (d) Plotter. (1 mark)
- 5. Which of the following is **NOT** a pointing device?
  - (a) Touch screen.
  - (b) Magnetic Ink Character Reader.
  - (c) Light pen.
  - (d) Joystick.

(1 mark)

Time Allowed: 3 hours.

- 6. Which of the following file names is **NOT** properly matched with the proper application?
  - (a) Employee.zip Compressed file.
  - (b) Employee.jpg \_\_\_\_ picture.
  - \_\_\_ Web page. (c) Employee.htm
  - (d) Employee.Mdb Excel.

(1 mark)

- 7. Which of the following is NOT an advantage of database approach?
  - It is easy to design and develop a database. (a)
  - (b) There is data independence.
  - (c) There is controlled data redundancy.
  - (d) There is data integrity.

(1 mark)

- 8. Which of the following statements is NOT true about databases?
  - Relational database is of 1:1 relation. (a)
  - Network database is of 1: Many relationship. (b)
  - (c) Hierarchical database is of 1: Many relationship. (d) Network database is of Many: Many relationships.

(1 mark)

CM13 Page 1 Out of 11

18.		n of the following is NOT a feature of a firewall?					
	(a) (b)	Web creating. Intrusion prevention system.					
		Bandwidth control and monitoring.					
	(c) (d)	Malware filtering	(1 mark)				
10	3.4						
19.		h of the programming languages are described by the following statement: "They are procedural ed languages"?	and problem				
	(a)	Machine.					
	(b)	Assembly.					
	(c)	High level.					
	(d)	Fourth generation.	(1 mark)				
20.	top qu	Which software allows a personal computer to be used as a publishing and design tool facilitating production of top quality document internally while reducing printing costs?					
	(a)	Word processing.					
	(b)	Desktop publishing.					
	(c)	Operating system. Presentation.	(1)				
	(d)	and the second of the second	(1 mark)				
21.	Whice (a)	h of the following is <b>NOT</b> an accounting package?  Sage.					
	(b)	Quick books.					
	(c)	Tally.					
	(d)	Quattro pro.	(1 mark)				
22.		s very special type of high speed memory whose main function is to make the programs and dat					
<i>LL</i> ,	the C	PU very fast. Which of the following type of memory is described in this statement.	a available to				
	(a) (b)	Virtual memory. Cache memory.					
	(c)	Random access memory.					
	(d)	Register.	(1 mark)	.4			
23.		h of the following is <b>NOT</b> a physical security control measure?	4	4			
	(a)	Smart card,					
	(b)	Security Guard.					
	(c)	Closed-circuit Television Monitor.					
	(d)	Biometric Access Control.	(1 mark)				
24.	Name	the component which takes digital data from computer system and turns it into visible images.					
	(a)	Printer.					
	(b)	Keyboard.					
	(c)	Monitor.					
	(d)	Scanner.	(1 mark)				
25.	Whic	h one of the following is <b>NOT</b> a definite advantage of fiber optic cables over coaxial cables?					
	(a)	Greater bandwidth.					
	(b)	Faster speeds.					
	(c)	More flexibility for the future.					
	(d)	Lower cost of installation.	(1 mark)				
26.	Ident	ify the statement which best describes an information security risk?					
	(a)	The likelihood that something bad will happen that causes harm to an informational asset.					
	(b)	A weakness that could be used to endanger or cause harm to an informational asset.					
	(c)	Anything man-made or occurring naturally that has the potential to cause harm.					
	(d)	The act of ensuring that data is not lost when critical issues arise such as; natural disasters, computer/server malfunction, physical theft among others.	(1 mark)				
27.	W/L:-	h of the following is <b>NOT</b> a computer port?	( man)				
41.	(a)	Chipset.					
	(b)	Universal Serial Bus (USB).					
	(c)	Video Graphics Adapter.					
	(d)	Ethernet.	(1 mark)				
	1-1		(I mark)				

CM13 Page 3 Out of 11

38.	To execute an instruction, the CPU will first decode the instruction into a sequence of electrical signals controlling the connections amongst the logic gates.  Which of the following unit is responsible for generating such signals?					
	(a)	Register.	ssponsiole for generating such signals?			
	(b)	Control unit.				
	(c)	ALU.				
	(d)	Cache.	(1 mark)			
39.	Whic	h of the following is consi	dered to be the heart of a computer?			
	(a)	CPU.	tered to be the heart of a computer?			
	(b)	Memory.				
	(c)	I/O Unit.				
	(d)	Disks.	(1 mark)			
40	1000					
40.		h of the following is used:				
	(a)	Semiconductor memor				
	(b)	Random access memor	y.			
	(c) (d)	Magnetic field.				
	(d)	Magnetic tapes.	(1 mark)			
41.	Data	is a stream of	representing events occurring in an organisation?			
	(a)	Raw facts.				
	(b)	Meaningful information	1.			
	(c)	Information.				
	(d)	Numbers.	(1 mark)			
42.	Which of the following components could be upgraded to improve the performance of your computer?					
	(a)	Monitor.	and the second s			
	(b)	CPU.				
	(c)	Keyboard.				
	(d)	Printer.	(1 mark)			
43.	Whic	h of the following is a stor	age area used to store data to companyate for the difference in great at which the			
	Which of the following is a storage area used to store data to compensate for the difference in speed at which the different units can handle data?					
	(a)	Memory.				
	(b)	Accumulator.				
	(c)	Address.				
	(d)	Buffer.	(1 mark)			
	****					
44.		h of the following has the				
	(a)	Direct access from a m				
	(b)	Direct access from a flo				
	(c)	Direct access from a ca				
	(d)	Direct access from a ha	rd disk. (1 mark)			
45.	Which	n of the following best de	scribes an internal network designed to provide and disseminate information to			
	(a)	Extranet.	nd feel of the World Wide Web?			
	(b)	Local Area Network.				
	(c)	Intranet.				
	(d)	Internet.	11			
	(4)	internet.	(1 mark)			
46.	progra	ams and information that th	security features is the best in terms of preventing users on a network from using ey do not need to access?			
	(a)	Right of entry.				
	(b)	Password rights.				
	(c)	Access rights.				
	(d)	Protocol rights.	(1 mark)			
			CM13 Page 5

30.		of the following constitutes the major forms of multiplexing for computer networking?	
	(i)	Frequency Division Multiplexing (FDM).	
	(ii)	Time Division Multiplexing (TDM).	
	(iii)	Spread spectrum.	
	(iv)	Wavelength multiplexing.	
	(a)	(i) and (ii) only.	
	(b)	(i) and (iii) only.	
	(c)	(i), (ii) and (iii) only.	
	(d)	(i) and (iv) only.	(1 mark)
57.	Whiel	of the following best describes protecting the data from unauthorised access?	
	(e)	Data inaccessibility.	
	(f)	Data encryption.	
	(g)	Data security.	
	(h)	Data validity.	(1 mark)
58.	Which	n of the following software is generally used for what if analysis?	
7.7	(a)	Word-processing.	
	(b)	Spread sheet.	
	(c)	Presentation package.	
	(d)	Database management.	(1 mark)
59.		of the following best describes what software documentation refers to?	
	(a)	The linking of one document to another.	
	(b)	Anything written about how the software is designed or functions.	
	(c)	The documents which, the user has to sign before using the software legally.	
	(d)	The compatibility of the software with IBM-PC.	(1 mark)
60.	Identi	ty the computer generation based on Very Large Scale Integrated (VLSI) technology?	, WYW.
	(a)	5 <sup>th</sup> .	**
	(b)	4 <sup>th</sup> .	
	(c)	3 <sup>rd</sup> .	
	(d)	2 <sup>nd</sup> .	(1 mark)
61.	Whiel	of the following statements is true for the second generation computers?	
0.1.	(a)	They use vacuum tubes.	
	(b)	They use magnetic drum for data storage.	
	(c)	They use transistors.	
	(d)	They use small scale integrated circuit.	(1 mark)
62.	Centr	al processing unit is made up of the following components?	
02.	(a)	Main memory and control unit.	
	(b)	Arithmetic logic unit and control unit.	
	(c)	Main Memory, Control Unit and Arithmetic Logic Unit.	
	(d)	Main Memory and Arithmetic Logic Unit.	(1 mark)
63.	Whiat	of the following is NOT and the following in	
03.	(a)	of the following is <b>NOT</b> a pointing device?  Light pen.	
	(b)	Joystick.	
	(c)	Trackball.	
	(d)	Microphone.	44.77.44
	(u)	wicrophone.	(1 mark)
64.	_	is also known as a desktop computer?	
	(a)	Laptop.	
	(b)	Notebook.	
	(c)	Minicomputer,	
	(d)	Personal computer.	(1 mark)
			CM13 Page 7

74.		refers to moving from one website to another.	
	(a)	Attachment.	
	(b)	Uploading.	
	(c)	Browsing.	
	(d)	Downloading.	(1 mark)
75.		is used to add an attachment to an email?	
	(a)	Stationary icon.	
	(b)	Emoji icon.	
	(c)	Paper clip icon.	
	(d)	GIF icon.	(1 mark)
76.	What	is the easiest way to place some graphics in some place in all slides?	
	(a)	Place graphics in Notes Master.	
	(b)	Place graphics in Slide Master.	
	(c)	Place graphic in Handout Master.	
	(d)	Place graphic manually in all slides.	(1 mark)
77.		is the space between the margin and the start of a paragraph.	
	(a)	Indentation.	
	(b)	Alignment.	
	(c)	Spacing.	
	(d)	Gutter.	(1 mark)
78.	Sprea	dsheets capability to allow a pie chart to be generated is known as ?	( many
70.	(a)	dsheets capability to allow a pie chart to be generated is known as?  Function.	
	(b)	Charting.	
	(c)	Decoration.	
	(d)	Graphing.	(1 mark)
70			(1 mark)
79.	7.3	feature makes it easier to add repetitive data to worksheet?	
	(a)	Sort.	
	(b)	Filter.	
	(c)	Autosum.	
	(d)	Autocomplete.	(1 mark)
80.		fy network topology that uses a single cable to connect all the computers?	
	(a)	Star.	
	(b)	Ring.	
	(c)	Bus.	
	(d)	Mesh.	(1 mark)
81.	The d	ata in ring topology moves in direction(s)?	
	(a)	Two.	
	(b)	Three	
	(c)	Four.	
	(d)	One.	(1 mark)
82.		has an inner conductor and an outer conductor separated by insulation?	
	(a)	Twisted wires.	
	(b)	Coaxial wires.	
	(c)	Wire pairs.	
	(d)	Fiber optic cable.	(1 mark)
83.	What	is a multiplexer?	0.000
	(a)	A device that converts digital signals to analog signals.	
	(b)	A device that converts analog signals to digital signals.	
	(c)	A device that allow several devices to share a transmission line.	
	(d)	A device that performs communication processing in a network.	/1 month
	1	F F Formation processing in a network.	(1 mark)

CM13 Page 9 Out of 11

94.	Whic	h of these is NOT a characteristic of good information?	
	(a)	Up-to-date.	
	(b)	Relevant.	
	(c)	Complete.	
	(d)	Dynamic.	(1 mark)
95.	Whic	h data capture method would be the most appropriate for reading the codes on packages, books and	d tins?
	(a)	Optical Mark Reader.	
	(b)	Optical Character Reader.	
	(c)	Barcode reader.	
	(d)	Magnetic Ink Character Reader.	(1 mark)
96.	MICE	R is commonly used	
	(a)	Scanning products at supermarket counter.	
	(b)	To scan images printed with laser printer.	
	(c)	Read characters printed in a special ink used mostly in bank cheques.	
	(d)	Used for tracking hospital devices along with bar code.	(1 mark)
97.		is an intangible computer output represented on screen.	
	(a)	Desktop.	
	(b)	Softcopy.	
	(c)	Software.	
	(d)	Window.	(1 mark)
98.		is a language that is close to human language and it's easy to write, debug and maintain.	
	(a)	A high level language.	
	(b)	A low level language.	
	(c)	An algorithm.	á
	(d)	Machine code.	(1 mark) with
99.	Whic	h of the following programming language types was created first?	Mah
	(a)	Procedural.	
	(b)	Object oriented.	
	(c)	Machine.	
	(d)	Assembly.	(1 mark)
100.		is a proprietary software where the source code is <b>NOT</b> revealed to the public?	
	(a)	Open source.	
	(b)	Closed source.	
	(c)	Freeware.	
	(d)	Shareware.	(1 mark)

## **FUNDAMENTAL ICT SKILLS**

THURSDAY: 16 December 2021.

Time Allowed: 3 hours.

Out of 7

This paper has three sections. SECTION I has forty (40) multiple choice questions. SECTION II has twenty (20) short response questions. SECTION III has one (1) essay question. All questions are compulsory. Marks allocated to each question are shown at the end of the question.

		SECTION 1-40 MARKS				
1.	Which	n one of the following devices functions only as an input device?				
	(a)	Hard disk drive				
	(b)	Computer memory				
	(c)	Computer monitor				
	(d)	Scanner	(1 mark)			
2.	What	was the technology used in the third generation computers?				
	(a)	Integrated circuits				
	(b)	Vacuum tube				
	(c)	Transistor	41 15			
	(d)	Very large scale integration	(1 mark)			
3.		h type of software that is best defined by the following; "Software which allow their tasks"?	vs end users to perform and			
	(a)	Operating system				
	(b)	Application software				
	(c)	Utilities software				
	(d)	Programming software	(1 mark)			
4.	What	What is the name of a circuit board which connects most of the other devices on a computer?				
	(a)	Processor				
	(b)	Expansion slot				
	(c)	Motherboard				
	(d)	Monitor	(1 mark)			
5.	Whic	h of the following is a primary feature of an operating system?				
	(a)	Virus scanning				
	(b)	File management				
	(c)	Creating databases				
	(d)	Web browsing	(1 mark)			
6.	study	mpany needs to develop a computerised system to manage its sales. Who is the this company's requirements?	e most appropriate person to			
	(a)	Programmer				
	(b)	Web designer				
	(c)	Systems analyst	(1 only)			
	(d)	System administrator	(1 mark)			
7.	In gra	aphical user interface (GUI), what does the acronym WYSIWYG stand for?				
	(a)	What You See Is What You Get				
	(b)	Why you saw Is What You Got				
	(c)	Where You See Is Where You Got	7.			
	(d)	What You See Is What You Got	(1 mark)			
			CM13 Page 1			

8.	Consider the following devices:						
	X - I	X - Digital camera					
	Y - S	peaker					
	Z - H	ard disk	(1 mark)				
	Whic	h of the above is/are usually used as an output device/devices of a computer?					
	(a)	X only					
	(b)	Y only					
	(c)	X and Y only					
	(d)	Y and Z only	(1 mark)				
9.	In rel	ation to e-mail, what does RE: or Re: in the subject box stand for?					
	(a)	Receive					
	(b)	Reference					
	(c)	Reply					
	(d)	Remember	(1 mark)				
10.	Whic	h one of the following is <b>NOT</b> a symptom of internet addiction disorder?					
	(a)	Improved access to distance learning and online tutorials					
	(b)	Difficulty maintaining healthy relationships when not online					
	(c)	A sudden and drastic increase in your internet usage					
	(d)	Friends and family expressing concern for the amount of time you spend online	(1 mark)				
11.	Whic	h of the following is <b>NOT TRUE</b> about the Internet?					
	(a)	Nobody owns the Internet					
	(b)	There is no centralised control					
	(c)	It is a network of computer networks					
	(d)	All the information available is accurate and reliable	(1 mark)				
12.	Whic	chop					
	(a)	Marks obtained by students in a class	AND STANKE				
	(b)	Sorted list of marks obtained by students in a class	4				
	(c)	Maximum marks obtained by students in a class					
	(d)	Average marks obtained by students in a class	(1 mark)				
13.	What	is the function of the CTRL + Z keyboard shortcut?					
	(a)	Undo					
	(b)	Copy					
	(c)	Paste					
	(d)	Cut	(1 mark)				
14.	Whic	Which of the following input devices recognises the position of marks on paper?					
	(a)	MICR					
	(b)	OCR					
	(c)	MIDI ,					
	(d)	OMR	(1 mark)				
15.	Which of the following is <b>NOT</b> a network device?						
	(a)	Hub					
	(b)	Printer					
	(c)	Router					
	(d)	OMR	(1 mark)				
16.	Whic	h of the following is not a type of user interface?					
	(a)	Command driven interface					
	(b)	Menu driven interface					
	(c)	Efficient based interface					
	(d)	Direct manipulation interface	(1 mark)				
	\ /	1	()				

17.	The al	bility to combine names and addresses with a standard document is called  Document formatting	
	(a) (b)	Database management	
	(c)	Mail merge	
	(d)	Form letters	(1 mark)
18.		eadsheet function that displays only the data in column(s) according to specified criteria is call	ed a
	(a)	Formula	
	(b)	Sorter	
	(c)	Filter	(1 mark)
	(d)	Pivot	,
19.	What (a)	type of diagram would you use to compare performance of two employees in the year 2020?  Column chart	
	(b)	Line chart	
	(c)	Pie chart	(1 mark)
	(d)	Dot chart	(1 11.01.11)
20.	The		
	(a)	Auto Complete	
	(b)	Auto Fill	
	(c)	Fill Handle	(1 mark)
	(d)	Sorting	
21.		th type of field will you select if you need to enter long text in that field?	
	(a)	Text	
	(b)	Memo	
	(c)	Currency Hyperlink	(1 mark)
	(d)	**	
22.		columns in a database application table are also called	
	(a)	Rows	
	(b)	Records Fields	
	(c) (d)	Columns	(1 mark)
22		ch of the following factors is not used when determining the processing power of a computer?	
23.	(a)	Clock speed	
	(b)	RAM size	
	(c)	Register size	
	(d)	Computer price	(1 mark)
24.	Whi	ch of the following data transmission modes is not valid?	
2	(a)	Simplex	
	(b)	Double duplex	
	(c)	Full duplex	(1
	(d)	Half duplex	(1 mark)
25.	Whi	ch transmission medium is most appropriate to carry data in a computer network that tromagnetic interference?	is exposed to
	(a)	Unshielded twisted pair	
	(b)	Coaxial cable	
	(c)	Microwave	
	(d)	Optical fibre	(1 mark)
26.	W/h	ich of the following is a valid email address?	
20.	(a)	tunaweza@point.com	
	(b)	gmail.com	
	(c)	tunawezapoint@.com	(1 1)
	(d)	tunawezapoint@business	(1 mark)
			ON #40 D 2

27.		n of the following types of software best represents the software designed to perform a speci	fic task?	
	(a)	Application software		
	(b)	Synchronous software		
	(c)	Package software		
	(d)	System software	(1 mark)	
28.		h network topology requires a central hub?		
	(a)	Bus		
	(b)	Star		
	(c)	Mesh		
	(d)	Ring	(1 mark)	
29.		process of linking of computers with a communication system is called		
	(a)	Networking		
	(b)	Pairing		
	(c)	Interfacing		
	(d)	Assembling	(1 mark)	
30.		h of the following statements about asynchronous transmission is <b>NOT</b> correct?		
	(a) (b)	Each character is framed with a start bit and a stop bit		
	(c)	Transmission medium is idle during time intervals between transmitting characters  Data is transmitted a block of characters at a time		
	(d)	It is slow		
	, ,		(1 mark)	
31.		N stands for		
	(a)	Wire Lost Area Network		
	(b)	Wireless Local Ambiguity Network		
	(c)	Wired Local Area Network		
	(d)	Wireless Local Area Network	(1 mark)	
32.	Which of the following is an example of a system software?			
	(a)	Microsoft Excel	Aya,	
	(b)	Microsoft Word		
	(c)	Microsoft Windows		
	(d)	Opera	(1 mark)	
33.	Whiel	of the following items are part of information technologies?		
	(i)	Digital camera		
	(ii)	Mobile phone		
	(iii)	Internet		
	(a)	(i) and (ii)		
	(b)	(ii) and (iii)		
	(c)	(i) and (iii)		
	(d)	(i), (ii) and (iii)	(1 mark)	
34.	What is the name of a network that uses a server to meet the needs of the other computers on the network?			
	(a)	Local area network	ctwork.	
	(b)	Client/server network		
	(c)	Immediate network group		
	(d)	Groupware network	(I mark)	
35.	Which	of the following is used as a primary storage device?		
	(a)	Hard disk		
	(b)	Magnetic tape		
	(c)	PROM		
	(d)	Floppy disk	(1	
	(4)		(1 mark)	

	M	s Word			
	N	tepad			
	So	ftware	File extension		
46.	Wri	te the appropriate file extension against the following	software:		
You	are adv	ised not to exceed forty words in answering questi	ons number 46 to 60.		
45.	Sha shar	eware is any copyrighted software, application or proed.	ogram that may be freely downloaded, insta	lled, used and (1 mark)	
44.		r-optic cable is a media of choice for backbone netwo		(1 mark)	
43.	Exp	ension Slot is an interface on a computer to which you	connect a device.	(1 mark)	
42.	Seco	nd Generation Computers used integrated circuits for	their internal operations.	(1 mark)	
41.	Info	mation Communication Technology refers to the nunication links carrying data, sound and video.	technology that merges computing with	high speed (1 mark)	
In qu	estions	11 to 45, indicate whether the statement is True or	False.		
		SECTION II -	- 40 MARKS		
	(c) (d)	Temporary, permanent Cheap, expensive		(1 mark)	
	(b)	Slow, fast			
40.	The (a)	Permanent, temporary	y 15		
		ifference between memory and storage is that memory	ry is and storage is		
	(c) (d)	Dots per square inch Type of ink used		(1 mark)	
	(b)	Dots printed per unit time			
39.	Whic (a)	of the following best describes the measure of the o Dots per inch	utput quality of a printer?		
	(d)	It controls the auxiliary storage unit			
	(c)	It is controlled by the input data entering the syste	m	(1 mark)	
	(b)	It controls all input, output and processing.			
38.	Whick (a)	of the following best describes the Central Processin It is operated from the control panel.	ng Unit?		
	(d)	Meaningful and useful to information systems		•	
	(c)	Meaningless and useless to information systems		(1 mark)	
	(b)	Meaningful and useful to human being			
37.	Information is a set of data that have been shaped into a form that is:  (a) Meaningless and useless to human being				
	(d)	Assembler	Ali na lina		
	(c)	Loader		(1 mark)	
	(b)	Compiler			
	(a)	Operating system

# **SECTION III – 20 MARKS**

61.	(i)	Outline the steps followed to create a folder called <b>KASNEBCAMICT</b> on the desktop.	(4 marks)
	(ii)	Outline the procedure of creating a word processing file called "KasnebExams" on the deskt	top. (4 marks)
	(iii)	Using four short sentences, demonstrate the following features of a word processor program underline, bullet and italics.	; bold, double (4 marks)
	(iv)	Describe three ways of starting a spreadsheet program.	(6 marks)
	(v)	Using a simple illustration, describe a slide in the context of presentation application.	(2 marks)

### **FUNDAMENTAL ICT SKILLS**

TUESDAY: 31 August 2021. Time Allowed: 3 hours. Answer any FIVE questions. ALL questions carry equal marks. **QUESTION ONE** Highlight four advantages of using open source software in a business environment. (4 marks) (b) State four uses of a super computer in a business environment. (4 marks) (2 marks) (c) Explain two commonly supported features in a word processing software. (d) List four application areas of intelligent systems in business. (4 marks) Citing two examples, define a digital product in the context of an e-commerce environment. (3 marks) (e) State three hardware specifications that would appear in an invitation to tender document for a graphic design (f) (3 marks) more company. (Total: 20 marks) **OUESTION TWO** Highlight three uses of information communication technology (ICT) in business. (3 marks) (a) As an accountant, explain two ways you could benefit from incorporating a spreadsheet into everyday tasks. (b) (4 marks) (c) Describe five features which make an accounting package superior than a spreadsheet in accounting functions. (5 marks) (d) Evaluate four reasons why it is important to manage computer files. (4 marks) Examine two positive and two negative impacts that information communication technology (ICT) has on (e) families. (4 marks) (Total: 20 marks) **OUESTION THREE** Outline four objectives of file organisation methods. (4 marks) (a) In each case, explain an application of the following methods of file access in business: (b) (i) Sequential file access. (2 marks) Random file access. (2 marks) (ii) (4 marks) (c) Highlight four disadvantages of computer use. Using a well labelled diagram, explain the major elements of a computer system. (8 marks) (d) (Total: 20 marks)

> CM13 Page 1 Out of 3

QUEST (a)	FION FO Explain	<b>DUR</b> two reasons why source data entry techniques are preferred to the keyboard mode of data of	entry. (4 marks)	
(b)	Using a	n illustration, differentiate between "command line interface" and "graphical user interface	.". (4 marks)	
(c)	(i)	Describe three characteristics of a good information system.	(6 marks)	
	(ii)	List three components of an information system.	(3 marks)	
(d)	Draw	and label parts of a typical computer mouse.  (T	(3 marks) otal: 20 marks)	
QUEST (a)	FION FI Highlig	VE ht three main services offered by the internet.	(3 marks)	
(b)	Explain	four negative impacts of the internet on the society.	(4 marks)	
(c)	Identify	four security threats likely to face an information system.	(4 marks)	
(d)	With th	e aid of a diagram, describe the following types of network transmission media:		
	(i)	Coaxial cable.	(2 marks)	
	(ii)	Twisted pair cable.	(2 marks)	
	(iii)	Fibre optic.	(2 marks)	
(e)	Explain	the following controls as used in information system:		
	(i)	Biometrics.	(1 mark)	
	(ii)	Encryption.	(1 mark)	
	(iii)	Passwords. (T	(1 mark) otal: 20 marks)	
QUEST (a)	FION SE Describ	e four advantages of using star topology when setting up a local area network.	(4 marks)	
(b)	Describ	e the following file characteristics:		
	(i)	Growth.	(2 marks)	
	(ii)	Volatility.	(2 marks)	
	(iii)	Hit rate.	(2 marks)	
(c)		There is no information system that is one hundred per cent secure. Therefore, organisations need to come up with contingency measures to help in data recovery.		
	With re data.	ference to the above statement, explain three data recovery procedures that could assist in	recovery of lost (6 marks)	
(d)	The bes	t way to have a secure password is to create a strong password.		
	Formula	ate four guidelines on how to create a strong password.  (T	(4 marks) otal: 20 marks)	

# QUESTION SEVEN (a) Distinguish be

(a)	Distinguish between the following types of computers:				
	(i)	"Special purpose computer" and "general purpose computer".	(2 marks)		
	(ii)	"Digital computer" and "analogue computer".	(2 marks)		
(b)	Give t	wo reasons why operating systems were developed.	(2 marks)		
(c)	List th	ree things that accompany a newly purchased software.	(3 marks)		
(d)	Using	an illustration, explain a slide layout as used in presentation software.	(2 marks)		
(e)		ABC Ltd. intends to acquire input devices for it's firm. The firm has approached you to give your input on the requirements.			
	Explai	n four factors to be considered when selecting input devices.	(4 marks)		
(f)		(Garbage in Garbage Out) is the concept that flawed, or nonsense input produces nons, the quality of output is determined by the quality of input.	sense output. In other		
	In rela	tion to the above statement, describe five ways to minimise errors during data input.	(5 marks) (Total: 20 marks)		

### **FUNDAMENTAL ICT SKILLS**

TUESDAY: 18 May 2021. Time Allowed: 3 hours. Answer any FIVE questions. ALL questions carry equal marks. **OUESTION ONE** List two technological trends of each of the following computer generations: (i) Second generation. (2 marks) (ii) Third generation. (2 marks) (iii) Fourth generation. (2 marks) (b) Highlight seven components of a computer's motherboard. (7 marks) Outline four functions of uninterrupted power supply (UPS) device in a computer system. (c) (4 marks) (d) Identify three ways in which information communication technology (ICT) could be used in the efficient running of a hospital. (3 marks) (Total: 20 marks) **QUESTION TWO** Describe the following types of information systems: (i) Transaction processing system. (1 mark) (ii) Management information system. (1 mark) (iii) Decision support system. (1 mark) (iv) Executive support system. (1 mark) State five functions of an operating system. (b) (5 marks) (c) Analyse five benefits of using accounting software packages in an organisation. (5 marks) (d) Summarise six features of an ideal word processing software. (6 marks) (Total: 20 marks) **QUESTION THREE** Citing an example in each case, explain the following types of computer files: (i) Report file. (2 marks) (ii) Reference file. (2 marks) (iii) Backup file. (2 marks) Sort file. (iv) (2 marks) CM13 Page 1

(b)	emplo worke	Ujuzi Limited is a large manufacturing company with over 30 branches spread countrywide. The company employs a total of 1,000 casual employees who are paid weekly wages based on the actual number of hours worked and the employee job grade level. The company uses a centralised computer system in the processing of its payroll.				
	Requ (i)	ired:  List six types of data that you expect to find in the employee record stored in the pay	vroll's master file. (6 marks)			
	(ii)	Suggest three validation controls that should be applied to the input data of the payro	oll system. (3 marks)			
(c)		dium sized company is in the process of acquiring a computer software for use by one ually impaired.	of its employees who			
	Advis	e the company on three factors to consider in selecting the appropriate software.	(3 marks) (Total: 20 marks)			
-	STION F					
(a)	Descr	ibe the following components of a computer network:				
	(i)	Node.	(1 mark)			
	(ii)	Packet.	(1 mark)			
	(iii)	Network operating system.	(1 mark)			
(b)	(i)	Define a "mesh network topology".	(1 mark)			
	(ii)	Outline two advantages and two disadvantages of a mesh network topology.	(4 marks)			
(c)	The v	The world has become one global village through the use of the internet and increased adoption of social networking sites.				
	Discu	ss four ethical challenges posed by the increased adoption of social networking sites.	(4 marks)			
(d)	State	four advantages and four disadvantages of online banking.	(8 marks) (Total: 20 marks)			
QUES (a)	STION F Define	TIVE the following terms as used in data security:				
	(i)	Hacking.	(1 mark)			
	(ii)	Fraud.	(1 mark)			
	(iii)	Piracy.	(1 mark)			
	(iv)	Computer virus.	(1 mark)			

(b) Identify five signs of a computer infected with a virus.

(5 marks)

(c) Evaluate five ways in which an organisation could protect its computer systems from hacking.

(5 marks)

Joyce Mwamba owns and runs an auditing firm whose operations are manually based. Most of the related (d) businesses in the neighbourhood as well as her business associates have adopted computer based platforms for their operations. However, Joyce Mwamba is hesitant to follow suit in the adoption of computerisation.

Justify six reasons for Joyce Mwamba's fears.

# FUNDAMENTAL ICT SKILLS

TUESDAY: 24 November 2020. Time Allowed: 3 hours. ALL questions carry equal marks. Answer any FIVE questions. **QUESTION ONE** Contrast between "proprietary operating system software" and "open source operating system software" using the following criteria: (i) Security. (2 marks) (2 marks) (ii) Application platform. Highlight four major roles of data communication software. (4 marks) (b) (4 marks) State four functions of a mouse. (c) (4 marks List the four factors that an instant messaging system must address in order to fulfil its business objective. (4 marks) Highlight four uses of Information Communication Technology (ICT) in the health sector. (Total: 20 marks) **OUESTION TWO** State two commonly adopted e-commerce business model in the business environment today. (2 marks) (a) Explain three major file types that are supported by a file management system. (6 marks) (b) (4 marks) State four objectives of using wireless media in a network environment, (c) Highlight four properties found in a spreadsheet software for formatting chart objects. (4 marks) (d) State four computer hardware performance metrics. (4 marks) (e) (Total: 20 marks) QUESTION THREE The use of internet and internet related services has created concern over data privacy issues: (a) Required: (i) Explain the term "data privacy". (2 marks) (ii) Suggest two computer technologies that threaten the privacy stated in (a) (i) above. (2 marks) (iii) Recommend two measures that could be used to protect data privacy (2 marks) (2 marks) Citing two examples, explain the term "groupware". (b) Examine four major challenges faced by business from the use of management information systems. (8 marks) (c) Describe four tools needed to guarantee health safety of computer users involved in intensive typing. (4 marks) (d) (Total: 20 marks)

> CM13 Page 1 Out of 2

QUE (a)	STION I Expla	FOUR in the following information communication technology (ICT) terms:	
	(i)	Clipboard.	(2 marks
	(ii)	Gigabyte.	(2 marks
	(iii)	Netizen.	(2 marks
(b)	Distin	nguish between "multitasking" and "multiprogramming".	(4 marks)
(c)	Outlin	ne six common causes of data loss in a computer environment.	(6 marks
(d)	Give (MIS	two examples of transaction processing systems (TPS) and two examples of Management ).	Information Systems (4 marks (Total: 20 marks)
QUE (a)	STION I Expla	FIVE tin using an example, the term "commercial off-the-shelf (COTS)" software.	(2 marks
(b)	Ident	fy six technologies which make fifth generation of computers different from the fourth generation	eration computers. (6 marks
(c)	Highl	ight three factors that you would consider when selecting an input device.	(3 marks
(d)	Contr	ast between a website and a web portal using the following criteria; features, interaction and	d management. (6 marks
(e)	Descr	ribe three desktop computer operating systems from different software vendors.	(3 marks (Total: 20 marks
QUE (a)	STION S List f	SIX ive examples of computer file extensions citing the software which created the file.	(5 marks
(b)	Distin	nguish between "cold booting" and "warm booting".	(4 marks
(c)	Expla	in the following social media terms:	
	(i)	Hootsuite.	(1 mark
	(ii)	Snapchat.	(1 mark
(d)	State	four reasons why a commercial organisation should always use legally obtained and license	ed software. (4 marks
(e)		eason behind explosion in email, instant messages, wireless computing, wireless internet as esses and managers derive extraordinary business value from participating in communication	
		tired: nate five business value impacts of the telecommunication revolution.	(5 marks
QUE (a)		SEVEN  ing data through keyboards has been a major source of errors in computer inputs. Therefore ned to use technologies which reduce or eliminate the possibility of input errors.	e, systems should be
		tired: ribe three keyless data input devices.	(6 marks
(b)	Expla	in three types of user interface that could be used to interact with an information system.	(6 marks
(c)	Desc	ribe four factors that an organisation should consider when selecting a file organisation metl	nod. (8 marks (Total: 20 marks

# **FUNDAMENTAL ICT SKILLS**

		FUNDAMENTAL ICT SKILLS		
WED	NESDAY	: 27 November 2019.	Time Allowed: 3 hours.	
Answe	Answer any FIVE questions. ALL questions carry e			
QUES	QUESTION ONE			
(a)	(i)	Define the term "booting up process".	(1 mark)	
	(ii)	Explain why booting process is essential.	(2 marks)	
(b)	Exami	ne six threats to data security in a business environment.	(6 marks)	
(c)	State f	ive hardware components of a computer system.	(5 marks)	
(d)	Suggest six factors that could prevent small firms from actively adopting and using information communication technology (ICT) in their businesses.  (6 mar  (Total: 20 mar			
QUES (a)	TION T Descri	WO be three uses of information systems in an organisation.	(6 marks)	
(b)	(i)	Identify two general types of computer files.	(2 marks)	
	(ii)	Distinguish between a data file and a database.	(2 marks)	
(c)	(i)	State three input devices and two output devices in a point of sale system in a supe	ermarket. (5 marks)	
	(ii)	For each of the stated devices in (c) (i) above, explain why it is necessary in	the point of sale system. (5 marks) (Total: 20 marks)	
QUES (a)	TION T Differe	HREE entiate between a bit and a byte.	(2 marks)	
(b)	Explai	n the function of the following keyboard keys:		
	(i)	ESC.	(1 mark)	
	(ii)	Home.	(1 mark)	
	(iii)	End.	(1 mark)	
	(iv)	Insert.	(1 mark)	
(c)	Distin	guish between file maintenance and file updating.	(2 marks)	
(d)	Highli	ght five factors that determine the processing power of a computer.	(5 marks)	

(e)	Explai	n how the following applications are intended to help a computer user:	
	(i)	Word processor.	(1 mark)
	(ii)	Spreadsheet.	(1 mark)
	(iii)	Database.	(1 mark)
(f)	Exami	ne four factors that discourage the setting up of a network in an organisation.	(4 marks) (Total: 20 marks)
QUES (a)	TION F Outlin	OUR' e two disadvantages of each of the following:	
	(i)	Cache memory.	(2 marks)
	(ii)	Drum printer.	(2 marks
	(iii)	Laser printer.	(2 marks)
	(iv)	CRT monitor.	(2 marks)
(b)	Comp	uter software could be categorised into systems software and applications software.	
	Requi	red: Describe four types of systems software.	(8 marks
	(ii)	Distinguish between horizontal market software and vertical market software.	(4 marks (Total: 20 marks
QUES	STION F List fo	IVE our benefits associated with storing data in optical media over conventional magnetic disks.	(4 marks
(b)	Identii	y three application areas where you would recommend the use of a supercomputer.	(3 marks
(c)	Your friend has recommended you purchase a computer with the following specifications:		
	•	Processor – Dual core 2.4GHz + i5 or i7 series Intel processor RAM – 16GB Hard Drive – 256GB or larger solid state hard drive Graphics card – Any with display port/HDMI support Monitor – 23" wide screen LCD Backup Device – External hard drive and or USB flash Drive	
	<b>Requi</b> . Using	red: the above information:	
	· (i)	State the size of the screen.	(1 mark
	(ii)	State the processor speed.	(1 mark
	(iii)	Explain the meaning of Dual Core.	(1 mark
	(iv)	Write the abbreviation HDMI in full.	(1 mark
	(v)	Write the initials USB in full.	(1 mark
(d)		ight four qualities of good information.	(4 marks
	•		(4 marks
(e)	Outiir	te two advantages and two disadvantages of Bus network topology.	(Total: 20 marks
			CM13 Page 2

Out of 3

QUES (a)	STION S In eac	IX h case, state two implications associated with node increase in the following network topologies:			
	(i)	Star.	(2 marks)		
	(ii)	Bus.	(2 marks)		
	(iii)	Mesh.	(2 marks)		
(b)	(i)	Examine four benefits of computerisation.	(4 marks)		
	(ii)	Describe four roles played by information communication technology (ICT) in the globalis	sation process. (4 marks)		
(c)	Identi	fy four factors that contribute to the digital divide.	(4 marks)		
(d)	Outline two symptoms of repetitive strain injury (RSI). (2 (Total: 20 s				
QUES (a)	STION S Giving	EVEN g an example in each case, differentiate between "random access media" and "direct access media"	a". (4 marks)		
(b)	State t	State the unit of measurements for the following computer performance metrics:			
	(i)	Clock rate.	(1 mark)		
	(ii)	Cache size.	(1 mark)		
	(iii)	Word size.	(Limark)		
	(iv)	Bus width.	(I mark)		
(c)	Outlin	e four computing tools designed to facilitate online personal interaction.	(4 marks)		
(d)	One o	One of the basic functions of an operating system is device management.			
	Highli	ght two activities related to device management.	(2 marks)		
(e)	Descr	ibe three challenges related to internet oriented marketing. (T	(6 marks) otal: 20 marks)		

## **FUNDAMENTAL ICT SKILLS**

Time Allowed: 3 hours.

TUESDAY: 21 May 2019.

Explain two features of a presentation software.

(e)

Answer any FIVE questions.  ALL questions carry equal marks.			
QUESTION ONE  (a) Define the term "topology" in relation to computer networks.			(2 marks)
(b)	Differe	entiate between a "mini computer" and a "micro computer".	(4 marks)
(c)	Identif system	y four disadvantages to an organisation of using conventional file appro-	roach as compared to using a database (4 marks)
(d)	List tw	o examples of mobile operating system.	(2 marks)
(e)	Highlig	ght:	
	(i)	Two disadvantages of sequential file organisation.	(2 marks)
	(ii)	Two advantages of random file organisation.	(2 marks)
(f)	Differe	entiate between the following terms:	
	(i)	"System software" and "application software".	(2 marks)
	(ii)	"Warm booting" and "cold booting".	(2 marks) (Total: 20 marks)
QUES (a)	TION T' Highlig	WO ght two functions of a firewall.	(2 marks)
(b)	Descri	be two benefits associated with multiprocessing.	(2 marks)
(c)	Interne	et has contributed greatly to globalisation:	
	Requir	red: Highlight two benefits brought about by globalisation.	(2 marks)
	(ii)	List two challenges of globalisation.	(2 marks)
(d)	State to	wo functions of a "digitiser".	(2 marks)

(4 marks)

(f)	Disting	uish between the following terms:	
	(i)	"Source code" and "object code".	(2 marks)
	(ii)	"Interpreter" and "compiler".	(2 marks)
	(iii)	"Assembly language" and "high level language".	(2 marks) (Total: 20 marks)
QUES	TION TI	IREE	
(a)	State th	ree benefits of transmitting data in digital form as opposed to analog transmission of data.	(3 marks)
(b)	Outline	three advantages associated with the use of email compared to traditional mail.	(3 marks)
(c)	Evaluate four common barriers to the use of information communication technology (ICT) in small bus		n small businesses. (4 marks)
(d)	Giving	a reason in each case, state the most appropriate input device for each of the tasks below:	
	(i)	Entering electricity bills in the utility company's system.	(2 marks)
	(ii)	Processing book loans in a computerised library system.	(2 marks)
	(iii)	Entering a text description of repairing a car engine whilst carrying out the repair.	(2 marks)
(e)	List fou	ar actions which a company should take on a day-to-day basis to ensure data security.	(4 marks) (Total: 20 marks)
QUES'	ΓΙΟΝ FO Sugges	OUR two factors that are used to determine a file organisation method.	(2 marks)
(b)	Compa	re the first and third generation computers using the following characteristics:	
	(i)	Size.	(2 marks)
	(ii)	Programming languages used.	(2 marks)
(c)	State tv	yo wireless transmission media.	(2 marks)
(d)	Highlig	ht four reasons why it is important to manage computer files.	(4 marks)
(e)	Ann intends to purchase a desktop computer for her office work. She has approached you seeking advice regather computer to buy.		ng advice regarding
	Advice	Ann on four factors that she should consider in selecting the best desktop computer f	or her office work. (4 marks)
(f)	In mod	ern business perspectives, information systems have far reaching effects for smooth and effe	ective operations.
	Outline	four uses of information systems in business.	(4 marks) (Total: 20 marks)
QUES'	ΓΙΟΝ FI Explain	VE the following terms as used in a networking environment:	
	(i)	Network Interface Card (NIC).	(2 marks)
	(ii)	Hub.	(2 marks)
	(iii)	Router.	(2 marks)
			CM13 Page 2 Out of 3

(b) Explain two information systems which are classified based on the mode of data processing. (4 marks)  (c) Secondary storage hardware is frequently used by companies to store data:  (ii) Citing an example, explain the term "secondary storage". (2 marks)  (iii) Evaluate four reasons why secondary storage is used in a computer. (4 marks)  (4 marks)  (5 ABC Ltd. is a transport company with ten trucks. The company is considering replacing the current manual system being used with a computerised system.  (5 Outline four advantages to ABC Ltd. which would result from the above change. (7 marks)  (6 Marks)  (7 marks)  (8 Distinguish between the following pairs of terms:  (8 Pield and record. (2 marks)  (9 Marks)  (10 Data and information. (2 marks)  (10 List four security threats that computer users face today. (4 marks)  (10 List four security threats that computer users face today. (4 marks)  (10 Cotal: 20 marks)  (10 Described between the following pairs of terms:  (2 marks)  (3 Described between the following pairs of terms:  (4 marks)  (5 Described between the following terms:  (5 Define the meaning of the term "encryption" in the context of data security. (2 marks)  (5 Described between the following terms:  (6 Distinguish between the following terms:  (7 marks)  (8 Mr. Ramau is a small scale businessman dealing with clearing and forwarding of customer goods. Recently, a friend advised him to buy a computer to increase his productivity. However, after acquiring the computer hardware, he realised that after connecting all the components, he could not operate the computer since it did not have an operating system of (6 marks)  (8 Described that after connecting all the components, he could not operate the computer since it did not have an operating system of (6 marks)			•	
(i) Citing an example, explain the term "secondary storage". (2 marks)  (ii) Evaluate four reasons why secondary storage is used in a computer. (4 marks)  ABC Ltd. is a transport company with ten trucks. The company is considering replacing the current manual system being used with a computerised system.  Outline four advantages to ABC Ltd. which would result from the above change. (4 marks)  QUESTION SIX  (a) Distinguish between the following pairs of terms:  (i) Field and record. (2 marks)  (ii) Data and information. (2 marks)  (iii) Printer and plotter. (2 marks)  (iv) Hardware and firmware. (2 marks)  (b) Evaluate four ways in which businesses are using internet today. (4 marks)  (ii) For each threat identified in (e) (i) above, explain how the threat can be mitigated. (4 marks)  (7 total: 20 marks)  QUESTION SEVEN  (a) Describe one reason why an organisation would wish to leave a cookie on a customer's computer. (2 marks)  (b) (ii) Define the meaning of the term "encryption" in the context of data security. (2 marks)  (b) (iii) Explain why an organisation would wish to leave a cookie on a customer's computer. (2 marks)  (iii) Explain why an organisation would wish to encrypt their data. (2 marks)  (iii) Explain why an organisation would wish to encrypt their data. (2 marks)  (iii) A "dumb terminal" and an "intelligent terminal". (4 marks)  (iii) "Online storage" and "off-line storage". (4 marks)  (d) Mr. Kamau is a small scale businessman dealing with clearing and forwarding of customer goods. Recently, a friend advised him to buy a computer to increase his productivity. However, after acquiring the computer hardware, he realised that after connecting all the components, he could not operate the computer since it did not have an operating system for his computer.	(b)	Explain	two information systems which are classified based on the mode of data processing.	(4 marks)
(d) ABC Ltd. is a transport company with ten trucks. The company is considering replacing the current manual system being used with a computerised system.  Outline four advantages to ABC Ltd. which would result from the above change.  (4 marks)  Outline four advantages to ABC Ltd. which would result from the above change.  (5 marks)  QUESTION SIX (a) Distinguish between the following pairs of terms:  (i) Field and record.  (2 marks)  (ii) Data and information.  (2 marks)  (iii) Printer and plotter.  (2 marks)  (iv) Hardware and firmware.  (2 marks)  (b) Evaluate four ways in which businesses are using internet today.  (b) Evaluate four ways in which businesses are using internet today.  (c) (i) List four security threats that computer users face today.  (ii) For each threat identified in (c) (i) above, explain how the threat can be mitigated.  (4 marks)  QUESTION SEVEN  (a) Describe one reason why an organisation would wish to leave a cookie on a customer's computer.  (2 marks)  QUESTION SEVEN  (a) Describe one reason why an organisation would wish to encrypt their data.  (2 marks)  (ii) Explain why an organisation would wish to encrypt their data.  (2 marks)  (iii) Explain why an organisation would wish to encrypt their data.  (2 marks)  (3 marks)  (4 marks)  (5) Distinguish between the following terms:  (6) Distinguish between the following terms:  (7) A "dumb terminal" and an "intelligent terminal".  (8) Mr. Kamau is a small scale businessman dealing with clearing and forwarding of customer goods. Recently, a friend advised him to buy a computer to increase his productivity. However, after acquiring the computer hardware, he realised that after connecting all the components, he could not operate the computer since it did not have an operating system installed.  Explain three important factors that Mr. Kamau should consider when selecting the most suitable operating system for his computer.	(c)	Second	ary storage hardware is frequently used by companies to store data:	
ABC Ltd. is a transport company with ten trucks. The company is considering replacing the current manual system being used with a computerised system.  Outline four advantages to ABC Ltd. which would result from the above change.  (4 marks) (Total: 20 marks)  QUESTION SIX  (a) Distinguish between the following pairs of terms:  (i) Field and record. (2 marks)  (ii) Data and information. (2 marks)  (iii) Printer and plotter. (2 marks)  (iv) Hardware and firmware. (2 marks)  (b) Evaluate four ways in which businesses are using internet today. (4 marks)  (c) (i) List four security threats that computer users face today. (4 marks)  (d) For each threat identified in (c) (i) above, explain how the threat can be mitigated. (4 marks)  (Total: 20 marks)  QUESTION SEVEN  (a) Describe one reason why an organisation would wish to leave a cookie on a customer's computer. # FUNDAMENTAL ICT SKILLS

TUES	DAY: 27	November 2018.	Γime Allowed: 3 hours.	
Answe	er any Fl	VE questions.	ALL questions carry equal marks.	
QUES (a)	<b>TION C</b> Outlin	NE e four advantages of optical storage media over flash disks.	(4 marks)	
(b)	State the applications used to create the following files:			
	(i)	Employee.Docx	(1 mark)	
	(ii)	Salary.XIsx	(1 mark)	
	(iii)	Student.Pptx	(1 mark)	
	(iv)	Marks.Accdb	(1 mark)	
(c)	Highli	ght four ways that could be used to improve the performance of a computer.	(4 marks) ع	
(d)	Differ	entiate between email and instant messaging.	(2 marks)	
(e)	Expla	n six ways in which the use of social media could enhance the growth of a bu	rsiness organisation. (6 marks) (Total: 20 marks)	
QUES	STION T Comp	WO are pre-written software and bespoke software based on the following factors	:	
	(i)	Cost.	(2 marks)	
	(ii)	Ability to meet specific (unique) user's needs.	(2 marks)	
	(iii)	Documentation standards.	(2 marks)	
	(iv)	Error rate.	(2 marks)	
(b)	Outline two characteristics of each of the following storage medium:			
	(i)	Primary storage.	(2 marks)	
	(ii)	Secondary storage.	(2 marks)	
(c)	Expla	in the area of application of each of the following peripheral devices:		
	(i) (ii) (iii) (iv) (v) (vi)	Joystick. Light pen. Scanner. MICR. OCR. OMR.	(1 mark) (1 mark) (1 mark) (1 mark) (1 mark)	
(d)	Highl	ight two advantages of using a mouse as an input device over a keyboard.	(2 marks) (Total: 20 marks)	

CM13 Page 1 Out of 3

QUES	STION T Expla	THREE in the meaning of the following terms as used in computing:			
	(i)	Register.	(2 marks)		
	(ii)	Bus.	(2 marks)		
	(iii)	Cache memory.	(2 marks)		
(b)	Using	examples, explain three components of a computer system.	(6 marks)		
(c)	The Kenyan government has been promoting and setting up digital villages in the rural areas.				
	(i)	Define the term "digital village".	(2 marks)		
	(ii)	Describe two ways in which digital villages could benefit the youths.	(2 marks)		
(d)		has been concern over the need for your business to increase the protection and secur access by outside parties.	ity of your data from		
	Requi	ired: Outline two ways that outside parties could access your data illegally.	(2 marks)		
	(ii)	For each of the listed ways above, describe a measure you could put in place to prevent	the illegal access. (2 marks) (Total: 20 marks)		
QUES (a)	STION F	OUR e the term "dual core processor".	(2 marks)		
(b)		in the importance of computer boot process.	(2 marks)		
(c)	·	There are different types of application software that an organisation could use to increase productivity.			
(0)		g the use in each case, describe three of these software.	(6 marks)		
(4)		·			
(d)		ight three advantages and two disadvantages of installing a network in an organisation.	(5 marks)		
(e)		f the major functions of an operating system is resource management.			
	Outlir	ne three resources that are managed by an operating system.	(3 marks)		
(f)	Expla	in the meaning of the term "clock speed" as used in computing.	(2 marks) (Total: 20 marks)		
QUES (a)	STION F Descr	TIVE ibe the following software terms:			
	(i) (ii)	Open source software.  Integrated software.	(2 marks) (2 marks)		
(b)	List fo	our features of fifth generation computers.	(4 marks)		
(c)	Citing	Citing appropriate examples, explain the following types of computer files:			
	(i) (ii) (iii) (iv)	Flat file.  Master file.  Transaction file.  Reference file.	(2 marks) (2 marks) (2 marks) (2 marks)		
(d)	Expla	Explain the main function of the following parts of the central processing unit:			
	(i)	Arithmetic logic unit.	(2 marks)		
	(ii)	Control unit.	(2 marks) (Total: 20 marks)		

CMI3 Page 2 Out of 3

QUE:		Describe the following types of computers:				
	(i)	Digital computer.	(2 marks)			
	(ii)	Analog computer.	(2 marks)			
	(iii)	Hybrid computer.	(2 marks)			
(b)	Distin	guish between "tactical decisions" and "operational decisions" as used in information system	ms. (4 marks)			
(c)	Descr	Describe the following types of enterprise systems:				
	(i)	Supply chain management system.	(2 marks)			
	(ii)	Enterprise resource planning system.	(2 marks)			
	(iii)	Customer relationship management system.	(2 marks)			
(d)	Summ	narise the four major components of computer hardware.	(4 marks) ( <b>Total: 20 marks</b> )			
QUES (a)	STION S Descr	EVEN ibe three components of an e-mail address.	(3 marks)			
(b)	State t	hree factors that influence the choice of a back up device.	(3 marks)			
(c)	Expla	in the following elements of the data hierarchy:				
	(i)	Character.	(2 marks)			
	(ii)	Field.	(2 marks) door.			
	(iii)	Record.	(2 marks)			
	(iv)	Fite.	(2 marks)			
(d)	Explai	Explain the following internet related concepts:				
	(i)	Hot spot.	(2 marks)			
	(ii)	World Wide Web.	(2 marks)			
	(iii)	Web portal.	(2 marks) (Total: 20 marks)
