

MANAGEMENT ACCOUNTING

TUESDAY: 3 December 2024. Morning Paper.

Time Allowed: 3 hours.

Answer ALL questions. Marks allocated to each question are shown at the end of the question. Show ALL your workings. Do NOT write anything on this paper.

QUESTION ONE

(a) Define the following types of costs as used in decision making:

| (i) | Controllable costs. | (2 marks) |
|------|----------------------|-----------|
| (ii) | Discretionary costs. | (2 marks) |

(b) Maroon Paints Ltd. makes and sells high quality paints. The company has two departments namely; Mixing and Blending and uses a single production overhead absorption rate based on direct labour hours. The budget and actual data for the month of October 2024 are given below:

| Budget | Mixing | Blending | Total | . Ye |
|-------------------------------------|------------|------------|------------|--------------|
| Budgeted direct wages (Sh.) | 2,400,000 | 7,000,000 | 9,400,000 | . chopi.co.r |
| Budgeted direct labour hours | 40,000 | 100,000 | 140,000 | dior |
| Budgeted machine hours | 120,000 | 10,000 | 130,000 | AND. |
| Budgeted production overheads (Sh.) | 18,000,000 | 10,000,000 | 28,000,000 | 4 |

During the month of October 2024, a batch of product "Cyan Paint" was made and had the following costs:

Direct material cost per batch is Sh.630,000

| | Direct wages (Sh.) | Labour hours | Machine hours |
|----------|--------------------|--------------|---------------|
| Mixing | 726,000 | 1,200 | 4,600 |
| Blending | 2,490,000 | 4,150 | 380 |
| | <u>3,216,000</u> | <u>5,350</u> | <u>4,980</u> |

The Management Accountant has proposed that appropriate departmental overhead absorption rates per department be applied, that is, machine hours in mixing department and labour hours in blending department.

Required:

| (i) | The cost of the batch of Cyan Paint using a single company-wide overhead absorption rate. | (6 marks) |
|-----|---|-----------|
| | | |

- (ii) Departmental overhead absorption rates. (2 marks)
 - (iii) The cost of the batch of Cyan Paint using management accountant proposal. (4 marks)
 - (iv) During the month of October 2024, the actual overheads and other relevant data was as follows:

| Actual | Mixing | Blending | Total |
|-----------------------------------|------------|-----------|------------|
| Actual direct wages (Sh.) | 3,000,000 | 5,950,000 | 8,950,000 |
| Actual direct labour hours | 50,000 | 85,000 | 135,000 |
| Actual machine hours | 140,000 | 8,000 | 148,000 |
| Actual production overheads (Sh.) | 20,000,000 | 9,500,000 | 29,500,000 |

Using the management accounting proposal, calculate the over/under absorption of overhead per department. (4 marks)

(Total: 20 marks)

QUESTION TWO

(a) Distinguish between "joint products" and "by-products" as used in the costing methods.

(b) The following information relates to the unit manufacturing costs of product "TM" made by Timua Ltd.:

| | Sh. | Sh. |
|---------------------------|-----|-----|
| Selling price | | 200 |
| Less: | | |
| Variable production costs | 120 | |
| Variable selling cost | 10 | 130 |
| Contribution | | 70 |

Additional information:

- 1. The budgeted fixed production cost is Sh.4,200,000 per annum for a normal production of 140,000 units.
- 2. Budgeted fixed selling and administrative overheads are Sh.2,800,000 per annum.
- 3. The budgeted fixed costs are incurred evenly during the year.
- 4. There are two periods in a year, each of 6 months.
- 5. During the latest financial year, the following results were achieved:

| | Period 1 | Period 2 |
|--------------------|----------|----------|
| Production (units) | 75,000 | 65,000 |
| Sales (units) | 60,000 | 70,000 |

- 6. There was no opening inventory at the beginning of the year.
- 7. Fixed production costs and selling and administrative costs incurred during the year were equal to the budget.

Required:

Prepare profit or loss statements for each of the two periods using each of the following presentation methods:

| (i) | Marginal Costing. | (8 marks) |
|------|---------------------|--------------------------------|
| (ii) | Absorption Costing. | (8 marks) (Total: 20 marks) |

QUESTION THREE

(a) Explain the following terminologies as used in business decision making:

| (i) | Opportunity cost. | (2 marks) |
|------|----------------------|-----------|
| (ii) | Opportunity savings. | (2 marks) |

(b) Savanna Supermarket currently orders 1,000 units of stock item "Zedo" at a time. The management of Savanna Supermarket has decided that it may be better to use the Economic Order Quantity method to establish an optimal reorder quantity.

Information regarding stocks is given below:

- Annual demand 12,000 units
- Purchase price Sh.15 per unit
- Fixed cost per order Sh.200
- The cost of holding an item "Zedo" in stock for a year is made up of the following percentages:

| Obsolescence | 3% |
|------------------|------|
| Perpetual audit | 1.5% |
| Opportunity cost | 2% |
| Insurance | 1% |
| Storage | 0.5% |
| | |

The current annual total inventory costs are Sh.183,000, being the total of the purchasing costs, ordering costs and holding costs of stock item "Zedo".

Required:

- (i) Using appropriate calculations, show how annual demand of stock item "Zedo" amounts to Sh.12,000 units. (5 marks)
- (ii) Calculate the Economic Order Quantity.
- (iii) Using your answer in (b) (ii) above, calculate the revised annual total inventory costs of stock item "Zedo" and establish any cost gap/cost saving from pursuing the optimal policy. (3 marks)

(2 marks)

(c) T-shirt Ltd. is a company that manufactures games kits for secondary schools which are embossed with the school logo. A school has ordered a batch of 600 games kits. The following is the direct production batch cost of 100 games kit:

| | Sh. |
|--------------------|----------------|
| Direct materials | 60,000 |
| Direct labour | 20,000 |
| Machine setup cost | 6,000 |
| Design and logo | 30,000 |
| Prime cost | <u>116,000</u> |

Additional information:

- 1. T-shirt Ltd. absorbs production overheads at a rate of 20% of direct wages cost.
- 2. 5% is added to the total production cost of each batch to allow for selling, distribution and administrative overheads.
- 3. T-shirt Ltd. requires a notional profit margin of 25% on sales.

Required:

Calculate the selling price per unit for the 600 games kit.

(6 marks) (Total: 20 marks)

QUESTION FOUR

(a) The effectiveness of an organisation's budgetary control system relies significantly on having a well-designed budget that allocates resources efficiently and monitors expenditures consistently.

Required:

With reference to the above statement, discuss **FOUR** conditions for an effective budgetary control system. (8 marks)

- (b) Explain **TWO** ways in which advancements in technology could enhance the effectiveness of management accounting practices. (4 marks)
- (c) Alto Ltd. manufactures a single product branded "PQ". The following data relates to its operations for the month of October 2024:

| | Budget Units | Actual Units |
|------------------|-----------------|-----------------|
| Sales | 30,000 | 29,000 |
| Production | 30,000 | 30,000 |
| | Sh."000" | Sh."000" |
| Sales | 420,000 | 411,800 |
| Direct materials | 120,000 | 123,000 |
| Direct labour | 150,000 | 144,000 |
| Fixed overheads | 67,500 | 70,000 |
| Net income | 82,500 | 74,800 |

Required:

A flexible budget for the month of October 2024 for the actual sales of 29,000 units.

(8 marks) (Total: 20 marks)

QUESTION FIVE

(a) Variance analysis is the process of investigating the cause of differences between the actual amount of material, labour, sales and overheads and the expected budgeted amount. This results in either favourable variances or adverse variances.

Required:

| (i) | Identify FOUR causes of favourable material price variances. | (4 marks) |
|------|--|-----------|
| (ii) | Explain FOUR remedies to adverse material price variances. | (4 marks) |

(b) Maya Ltd. produces two products namely; Product M and Product Y. The following budget applies for the year ended 30 June 2024.

| | | Product M Sh. | Product Y Sh. | |
|-----------------------|---------------------|--------------------------|--------------------------------------|--------------------------------|
| Selling p | orice | 6 | 12 | |
| Variable | costs | 2 | 4 | |
| Contribu | tion margin | <u>4</u> | $\frac{4}{\underline{8}}$ | |
| Fixed co | osts (Sh.) | 96,400,000 | 200,000,000 | |
| Units so | ld (bags) | 70,000,000 | 30,000,000 | |
| Require (i) | | oints at current sales | mix. | (4 marks) |
| (ii) | The break-even po | oint at a proposed sal | es mix of 1:1. | (4 marks) |
| (iii) | Current margin of | safety. | | (2 marks) |
| (iv) | Sales units require | ed to earn a profit of s | Sh.299,000,000 at current sales mix. | (2 marks) (Total: 20 marks) |
| | ••••• | | | ••••• |

MANAGEMENT ACCOUNTING

TUESDAY: 20 August 2024. Morning Paper.

Time Allowed: 3 hours.

(2 marks)

(4 marks)

Answer ALL questions. Marks allocated to each question are shown at the end of the question. Show ALL your workings. Do NOT write anything on this paper.

QUESTION ONE

(a) With reference to cost classification, distinguish between the following types of costs:

| (i) | "Semi-variable costs" and "semi-fixed costs". | (2 marks) |
|-----|---|-----------|
|-----|---|-----------|

- (ii) "Prime costs" and "marginal costs".
- (b) Cost Database Management System (DBMS) is a computer based software system that is used in management accounting to manage costs.

Required:

Highlight **FOUR** benefits of implementing a cost database management system for inventory.

(c) Medico Ltd. is a pharmaceutical company which manufactures three types of medicines namely; Alpha, Beta and Zeta using absorption costing system.

The company has two grades of labour; skilled labour and semi-skilled labour.

The following profit statement relates to the operations of Medico Ltd.

| | Alpha Sh. | Beta Sh. | Zeta Sh. |
|--|--------------|-------------|--------------|
| Selling price per unit | <u>595</u> | <u>870</u> | <u>1,095</u> |
| Cost per unit: | | | |
| Direct material | 115 | 140 | 220 |
| Direct labour: | | | |
| Skilled labour (Sh.80 per hour) | 80 | 160 | 240 |
| Semi-skilled (Sh.60 per hour) | 60 | 120 | 110 |
| Fixed overhead cost (see note 1) | <u>100</u> | <u>100</u> | 100 |
| Total cost per unit | <u>355</u> | <u>520</u> | <u>670</u> |
| Net profit per unit | <u>240</u> | <u>350</u> | 425 |
| | Units | Units | Units |
| Expected maximum production and demand | 3,000 | 5,000 | 6,500 |

Additional information:

- 1. Fixed overhead costs are Sh.1,450,000 per annum.
- 2. Variable overheads are absorbed into production at a rate of 100% for skilled labour and 50% of the semiskilled labour. These variable overheads have not been absorbed in the profit statement above.
- 3. There is a maximum of 28,000 skilled labour hours available.
- 4. Deficit units can be outsourced from chemist suppliers at the following prices:

| Medicine | Alpha | Beta | Zeta |
|-------------------------|--------|--------|--------|
| Purchase price per unit | Sh.425 | Sh.650 | Sh.895 |

Required:

- Compute the shortfall in skilled labour hours. (i)
- (ii) Determine the optimal production mix and the number of units to be outsourced from chemist suppliers. (6 marks)
- (iii) Maximum net profit achievable for the period based on quantities determined in (c) (ii) above. (4 marks) (Total: 20 marks)

QUESTION TWO

- Identify **FIVE** challenges faced by a business in implementing a cost accounting system. (a) (5 marks)
- (b) Maziwa Ltd. is a small company that specialises in buying and selling of powdered milk. The milk tins are packaged in boxes.

The company started its operations on February 2024 with a capital of Sh.4,000,000. During the past period of six months, the following transactions have occurred:

| | Powdered milk purchases | | ses Sale of powdered milk | | |
|-----------------|-------------------------|-------------------|---------------------------|------------------|--------------------|
| Date of receipt | Quantity (boxes) | Total cost Sh. | Date of dispatch | Quantity (boxes) | Total sales Sh. |
| February 13 | 200 | 72,000 | March 10 | 500 | 250,000 |
| March 8 | 400 | 152,000 | May 20 | 600 | 270,000 |
| April 11 | 600 | 240,000 | July 25 | 400 | 152,000 |
| May 12 | 400 | 140,000 | | | |
| July 15 | 500 | 140,000 | | | |

Additional information:

- 1. The closing inventory counted on 31 July 2024 was 500 boxes.
- 2. General operating expenses paid during the period amounted to Sh.23,000.
- 3. The company uses LIFO method of inventory valuation.

Required:

Prepare:

- (i) A stores ledger account.
- Income statement for the company for the period ended 31 July 2024. (ii)
- (c) Konya Ltd. had a weekly minimum and maximum consumption of material Q at 250 and 750 units respectively. The re-order quantity as fixed by the company is 3,000 units. The material is received within a period of 4 to 6 weeks from the date of issue of supply order.

Required:

Calculate the:

| | (i) | Minimum stock level. | (2 marks) | | |
|------|----------------|--------------------------------------|--------------------------------|--|--|
| | (ii) | Maximum stock level. | (2 marks) (Total: 20 marks) | | |
| QUES | QUESTION THREE | | | | |
| (a) | (i) | Explain the term "budget committee". | (2 marks) | | |

Outline FOUR roles of a budget committee. (4 marks) (ii)

For Solutions/Answers WhatsApp: 0724 962 477

(5 marks)

(b) The following cost data has been obtained from the records of Komputa Ltd., an IT company based in industrial area. The firm specialises in assembly of computers.

| Month | Number of computers assembled | Total cost incurred Sh. '000' |
|-----------|-------------------------------|----------------------------------|
| January | 1,600 | 164,000 |
| February | 900 | 112,000 |
| March | 1,100 | 100,000 |
| April | 820 | 96,000 |
| May | 1,160 | 120,000 |
| June | 1,200 | 124,000 |
| July | 1,300 | 128,000 |
| August | 1,360 | 130,000 |
| September | 1,400 | 140,000 |
| October | 1,500 | 148,000 |
| November | 1,700 | 180,000 |

Required:

- (i) Using the high-low method, formulate an equation that can be used to estimate the future total cost in the form of y = a + bx. (4 marks)
- (ii) Using the least square method, formulate the cost function in the form of y = a + bx. (8 marks)
- (iii) Using the equations obtained in (b)(i) and (b) (ii) above, estimate the total cost to be incurred in December if 1,800 computers are expected to be assembled. (2 marks)

(Total: 20 marks)

(4 marks)

QUESTION FOUR

- (a) Highlight **FOUR** arguments for the use of marginal costing.
- (b) Aquatiq Ltd. manufactures water dispensers for both domestic and office use using absorption costing system. There are three models branded "regular", "medium" and "deluxe".

Selected data for the three products is as follows:

| Model | Regular | Medium | Deluxe |
|-------------------------------|-----------|-------------|-------------|
| Direct material cost per unit | Sh.2,500 | Sh.3,250 | Sh.5,500 |
| Direct labour hours per unit | 0.75hours | 1.5 hours | 1 hour |
| Machine hours per unit | 1.5 hours | 1 hour | 3 hours |
| Production volume | 800 units | 1,200 units | 4,800 units |

Additional information:

- 1. The total cost per unit is loaded a profit markup of 20% to determine the selling price.
- 2. Direct labour cost is Sh.2,100 per labour hour.
- 3. Currently, production overheads are absorbed based on a blanket-wise machine hour absorption costing basis. The rate for the period is Sh.1,500 per machine hour.
- 4. Budgeted annual production overheads for Aquatiq Ltd. amounted to Sh.25,200,000. Further analysis shows that the production overheads can be apportioned according to activity based costing (ABC) approach as follows:

| Cost pools | Apportionment | Cost driver |
|---------------------------|---------------|-------------------------|
| Set-up costs | 40% | Number of set-ups |
| Machine costs | 20% | Number of machine hours |
| Material procurement cost | 10% | Number of orders |
| Quality control cost | 30% | Number of inspections |
| | <u>100%</u> | |

5. The following cost drivers are associated with the models:

| Model | Regular | Medium | Deluxe |
|-------------------------|---------|--------|--------|
| Number of set-ups | 64 | 120 | 320 |
| Number of orders | 12 | 21 | 87 |
| Number of inspections | 120 | 180 | 456 |
| Number of machine hours | 1,200 | 1,200 | 14,400 |

Required:

Calculate for each model, the full cost and selling price per unit under:

| (i) | Blanket-wise absorption costing approach. | (8 marks) |
|------|---|-----------|
| (ii) | Activity based costing (ABC) approach. | (8 marks) |

OUESTION FIVE

The table below shows the type of cost classification base and an example of type of cost. (a) By giving one example in each, fill in the missing letters W, X, Y and Z.

| Cost classification Example: | | Example of cost | | |
|--|-----------------------|---------------------------------------|----------|--|
| Functional classification | | Production cost, Administrative cost. | | |
| (i) | On basis of time | W | (1 mark) | |
| (ii) | Х | Variable cost, fixed cost | (1 mark) | |
| (iii) | By nature of elements | Y | (1 mark) | |
| (iv) | Z | Opportunity cost, sunk cost | (1 mark) | |

- (b) Explain **THREE** benefits of standard costing and variance analysis to an organisation. (6 marks)
- (c) Saruji Ltd. manufactures a product branded "GemLime". The company operates several manufacturing processes. In the process I, joint products "Gem" and "Lime" are produced in the ratio of 5:3 by volume from the raw material input.

The following information relates to process I for the first week of the month of July 2024:

| Raw material input | 60,000 kilograms at a cost of Sh.3,810,000 |
|--------------------|--|
| Abnormal gain | 1,000 kilograms |

Other costs incurred upto the split off point:

| Direct labour cost | Sh.1,800,000 |
|----------------------|----------------------------|
| Direct expenses | Sh.540,000 |
| Production overheads | 110% of direct labour cost |

Additional information:

- 1. Normal loss in process I of 5% of the raw material input is expected. Losses have a realisable value of Sh.50 per kilogram.
- 2. The company holds no work-in-progress.
- 3. The joint costs are apportioned to the joint products using the physical volume measure basis at split off point.

Required:

- Prepare process I account for the first week of the month of July 2024 in which both the output volumes (i) and values for each of the joint products are shown separately. (6 marks)
- Saruji Ltd. can sell product Gem for Sh.20 per kilogram at the end of process I. It is considering a proposal (ii) to further process Gem in process II in order to create product "GemLime". The further processing in process II would cost Sh.4 per kilogram input from process I. In process II, there would be a normal loss in volume of 10% of the input to that process. This loss has no realisable value. Product "GemLime" could then be sold for Sh.26 per kilogram.

Determine based on financial considerations only, whether product Gem should be further processed to create product "GemLime". (4 marks)

(Total: 20 marks)

(Total: 20 marks)

MANAGEMENT ACCOUNTING

TUESDAY: 23 April 2024. Morning Paper.

Time Allowed: 3 hours.

Answer ALL questions. Marks allocated to each question are shown at the end of the question. Show ALL your workings. Do NOT write anything on this paper.

QUESTION ONE

(a) Cost classification is essential for easier cost ascertainment and cost control.

With reference to the above statement, explain the following bases of cost classification citing one example in each case:

| (i) | By time. | (2 marks) |
|-------|---------------|--|
| (ii) | By behaviour. | (2 marks) |
| (iii) | By function. | (2 marks), co.Xe |
| (iv) | By nature. | (2 marks), co ^{xe} (2 marks) |

(b) OJ Ltd. manufactures and sells mobile phones. The company's budgeted statement of profit or loss for the month of May 2024 is as follows:

| | Sh. | Sh. |
|--|--------------------|--------------|
| Sales (1,200 units at Sh.18,000 per unit) | | 21,600,000 |
| Less: Cost of sales: | | |
| Production (1,800 units at Sh.10,000 per unit) | 18,000,000 | |
| Less: Closing inventory (600 units at Sh.10,000 per unit) | <u>(6,000,000)</u> | (12,000,000) |
| Gross profit | | 9,600,000 |
| Less: Variable selling expenses (10% of sales) | | (2,160,000) |
| Fixed selling and distribution costs | | (1,705,000) |
| Net profit | | 5,735,000 |

Additional information:

- 1. The budget was prepared using absorption costing principle.
- 2. If the budgeted production in May 2024 had been 2,000 units, then the total production cost would have been Sh.18,800,000.

Required:

Using high-low method, calculate:

| (i) | The variable production cost per unit. | (2 marks) |
|------|--|-----------|
| (ii) | The total monthly fixed production cost. | (2 marks) |

(c) Assuming the budget of OJ Ltd. for the month of May 2024 had been prepared using marginal costing principle, calculate:

| (i) | The net profit. | (5 marks) |
|------|--|---|
| (ii) | The break-even point (BEP) in sales value. | (3 marks) (Total: 20 marks) |
| | | |

CA25 Page 1 Out of 5

QUESTION TWO

(a) Describe **THREE** roles of management accounting in an organisation.

(b) Dynamok Ltd., manufactures bicycles. The company uses job costing to allocate costs to individual products provided to its customers. The company has three production departments T, Q and M.

The company has commenced the preparation of its fixed production overhead cost budget for the next financial year and has identified the following costs:

| Overhead cost | Sh."million" | Basis of apportionment |
|-------------------------|--------------|---|
| Depreciation | 660 | Net book value of equipment |
| Indirect labour | 900 | Direct labour hours |
| Repairs and maintenance | 110 | 30% to T, 50% to Q and 20% to M |
| Heating and lightning | 90 | Floor area |
| Consumable supplies | 30 | Direct labour hours |
| General overheads | | 20% of direct wages cost of each department |

The costs are apportioned to the individual production departments; T, Q and M as follows:

| Production department | Т | Q | Μ |
|---|-------|-------|-------|
| Direct labour hours | 5,000 | 3,000 | 2,000 |
| Direct wages cost (Sh. Million) | 150 | 210 | 100 |
| Number of employees | 25 | 15 | 10 |
| Floor area in square metres (M ²) | 5,000 | 4,000 | 1,000 |
| Net book value of equipment (Sh. Million) | 80 | 50 | 90 |

Required:

- (i) The primary allocation of production overhead costs to the three departments. (6 marks)
- (ii) Calculate the overhead absorption rate (OAR) for each department based on direct labour hours. (3 marks)

(iii) A quotation for a job made as batch BQ23 has the following estimated information:

| Direct material cost | Sh.140,000,000 |
|----------------------|---------------------------|
| Direct labour hours | 550 hours in department T |
| | 890 hours in department Q |
| | 160 hours in department M |
| | |

Required:

Using the OAR computed in (b) (ii) above, compute the total cost of job batch BQ23. (5 marks) (Total: 20 marks)

QUESTION THREE

(a) Management accounting is a discipline that communicates economic information to various parties known as "end-users".

With reference to the above statement, outline **TWO** user information needs of the following end-users:

| (i) | Executives. | (2 marks) |
|-------|-------------------------|-----------|
| (ii) | Production managers. | (2 marks) |
| (iii) | Management accountants. | (2 marks) |

(b) Luxury Weekend County Park is an entertainment park that offers individual and family entry tickets. The tickets include a meal, three types of beverages and unlimited use of the swimming pools. Luxury Weekend County Park has the following ticket prices and variable costs for the year 2024:

| Ticket class | | | |
|----------------------------|-------------------|---------------|--------------|
| | Individual Sh. | Family Sh. | Total Sh. |
| Selling price per ticket | 2,400 | 3,000 | |
| Variable cost per ticket: | | | |
| Cost of meal | (740) | (800) | |
| Direct labour | (600) | (600) | |
| Variable cost of beverages | (240) | (250) | |
| Swimming cost | (220) | (250) | |
| Contribution margin | 600 | <u>1,100</u> | |

| | Sh. | Sh. | Sh. |
|--------------------------------------|-----------|-----------|-----------|
| Apportioned annual fixed costs (Sh.) | 3,375,000 | 4,125,000 | 7,500,000 |
| Expected tickets to be sold | 6,000 | 4,000 | 10,000 |

Additional information:

- 1. All the assumptions of cost volume profit (CVP) analysis are valid.
- 2. Total sales mix is currently generated by the two type of tickets in the following proportions:
 - Individual 60%
 - Family 40%

Required:

•

- (i) Compute the weighted average contribution margin at the current sales mix assumed above. (2 marks)
- (ii) Calculate the total number of tickets that Luxury Weekend County Park must sell to break-even. (2 marks)
- (iii) The margin of safety in units for Luxury Weekend County Park. (2 marks)
- (iv) Calculate the number of individual tickets and the number of family tickets that Luxury Weekend County Park must sell to break-even. (2 marks)
- (c) Ufanisi Enterprises outsource one of its raw materials branded "Oxla" externally. The annual sales demand for material "Oxla" is 30,000 units. The company is planning to switch its purchasing system to a just-in-time (JIT) purchasing system to improve efficiency.

The following information is provided:

| | Current system | Proposed system |
|-------------------------------|----------------|-----------------|
| Purchase cost per unit (Sh.) | 400 | 400 |
| Ordering cost per order (Sh.) | 80,000 | 28,000 |
| Inventory holding cost | 12% | - |

Additional information:

1. Inventory holding cost per annum is given as a percentage of purchases cost per unit.

2. Under the proposed JIT system, the company does not hold any inventory whatsoever.

3. The re-order quantity under the proposed JIT system is 4,000 units per order.

Required:

Advise the management of Ufanisi Enterprises on whether or not to switch to the proposed system. (6 marks) (Total: 20 marks)

QUESTION FOUR

- (a) Summarise **FOUR** features of process costing.
- (b) Vuna Ltd. are the manufacturers of chemicals for use in agricultural farms. One of their products passes through two processes; P and Q before it is completed and taken to a warehouse.

The following data relates to process Q for the month of march 2024:

1. Opening work-in-progress 4,000 units Degree of completion and cost:

| Degree of con | ipietion and cost. | Sh."000" |
|----------------|--------------------|--------------|
| Materials | 100% | 240,000 |
| Labour | 60% | 144,000 |
| Overheads | 60% | 72,000 |
| Unite received | from message D wa | ma 10 000 at |

2. Units received from process P were 40,000 at a cost of Sh.1,700,550,000

3. Additional cost during the period in process Q:

| | Sh."000" |
|----------------|------------------|
| Materials | 759,000 |
| Labour | 1,355,760 |
| Overheads | 640,220 |
| Closing work i | n nrograde was 2 |

4. Closing work-in-progress was 3,000 units with the following degree of completion: Materials 100% Labour and overheads 50% www.dtopi.co.k

| Total fixed overheads (Sh.)4,510,0005,220,000Required: (i)Sales price variance. | Total fixed overheads (Sh.)4,510,0005,220,000Required: (i)Sales price variance.(ii)Sales volume profit variance. | Variab | le cost per unit (Sh.) | 1,000 | 1,000 |
| Required: (i) Sales price variance. | Required: (i) Sales price variance. (ii) Sales volume profit variance. | Output | t and sales (units) | 8,200 | 8,700 |
| Required: (i) Sales price variance. | Required: (i) Sales price variance. (ii) Sales volume profit variance. | Total fi | ixed overheads (Sh.) | 4,510,000 | 5,220,000 |
| (i) Sales price variance. | (i) Sales price variance.(ii) Sales volume profit variance. | | · · · | | |
| | (ii) Sales volume profit variance. | Requir | red: | | |
| (ii) Sales volume profit variance. | | (i) | Sales price variance. | | |
| | | (ii) | Sales volume profit v | variance. | |
| | (iii) Fixed overhead volume variance. | | I I I I I I I I I I I I I I I I I I I | | |

(b) A flexible budget is known to be more appropriate for control purposes than a fixed budget.

Required:

- (i) By distinguishing between a "fixed budget" and a "flexible budget", explain whether you agree or disagree with the above statement. (3 marks)
- (ii) Outline **THREE** benefits of budgetary control system in an organisation. (3 marks)
- (c) The following information relates to the projected activities of Detrix Ltd., a local manufacturing company for the year 2024:

| | Wages Sh."000" | Materials purchased Sh."000" | Overhead cost Sh."000" | Sales Sh."000" |
|----------|-------------------|---------------------------------|---------------------------|-------------------|
| January | 18,000 | 60,000 | 30,000 | 90,000 |
| February | 24,000 | 90,000 | 36,000 | 120,000 |
| March | 30,000 | 75,000 | 48,000 | 180,000 |
| April | 27,000 | 105,000 | 42,000 | 150,000 |
| May | 36,000 | 90,000 | 54,000 | 210,000 |
| June | 30,000 | 75,000 | 48,000 | 180,000 |
| July | 27,000 | 75,000 | 42,000 | 150,000 |
| August | 27,000 | 90,000 | 42,000 | 150,000 |

Additional information:

- 1. It is expected that cash balance on 30 April 2024 will be Sh.66,000,000.
- 2. Wages are paid within the month they are incurred.
- 3. Creditors for raw materials are paid three months after receipt.
- 4. Debtors are expected to pay two months after delivery.
- 5. Included in the overhead figure is Sh.6,000,000 per month which represents depreciation.
- 6. There is a one-month delay in paying the overhead expenses.
- 7. 20% of the monthly sales are on cash basis.

CA25 Page 4 Out of 5

- 8. A commission of 5% is paid to agents on all the sales on credit, but this is not paid until the month following the sales to which it relates. This expense is not included in the overhead figure.
- 9. The company intends to repay a loan of Sh.75,000,000 on 31 May 2024.
- 10. A delivery is expected in the month of June 2024 of a new machine costing Sh.135,000,000 of which Sh.45,000,000 will be paid in each of the following months.
- 11. The company has an overdraft facility with banks.

Required:

A cash budget for the months of May, June and July 2024.

MANAGEMENT ACCOUNTING

TUESDAY: 5 December 2023. Morning Paper.

Answer ALL questions. Marks allocated to each question are shown at the end of the question. Show ALL your workings. Do NOT write anything on this paper.

QUESTION ONE

- (a) Discuss **THREE** essential features of a budget.
- (b) Godoro Ltd. supplies high quality mattresses. The company outsources these mattresses from a supplier in town. Godoro Ltd. estimates that the total inventory holding cost of one mattress per annum is as follows:

| Cost | Percentage of purchase price per unit per annum (%) |
|-------------------|---|
| Opportunity cost | 5 |
| Obsolescence cost | 4 |
| Storage charges | 3 |
| Handling cost | 2 |
| Insurance cost | \mathbf{O} $\frac{1}{2}$ |
| | <u>15</u> |

Additional information:

- 1. The annual sales demand of the mattresses is 480 mattresses.
- 2. Each mattress costs Sh.4,000 to purchase from the supplier.
- 3. The ordering cost is Sh.6,250 per order.
- 4. The supplier offers a 3% discount for orders of 120 mattresses and a discount of 5% for orders of 180 mattresses.

Required:

| (i) The economic order quantity (EOQ) of the mattresses. (2 mar | (2 marks) |
|---|-----------|
|---|-----------|

- (ii) The cost minimising order size from the supplier.
- (c) Jeffy Ltd. has been manufacturing and selling three textile products. The following details are available for each of the three products:

| Product | Cotton Sh. per unit | Linen Sh. per unit | Polyester Sh. per unit |
|--------------------------------|------------------------|-----------------------|---------------------------|
| Direct material | 350 | 365 | 255 |
| Direct labour | 480 | 240 | 210 |
| Variable production overheads | 150 | 115 | 205 |
| Fixed production overheads | 300 | 300 | 300 |
| Total cost per unit | 1,280 | 1,020 | 970 |
| Selling price | 1,600 | <u>1,340</u> | 1,300 |
| Net profit | 320 | 320 | 330 |
| Budgeted annual demand (units) | 1,600 | 2,400 | 3,000 |

Additional information:

1. Each direct labour hour is charged at Sh.120 for cotton, Sh.120 for linen and Sh.70 for polyester.

2. The direct labour force is threatening to go on strike for two weeks. This means that only 10,100 hours will be available for production rather than the expected 20,200 hours.

Required:

If the strike goes ahead as planned, advise the management of Jeffy Ltd. on the product(s) that should be produced if profits are to be maximised. (8 marks)

QUESTION TWO

The Management Accountant of Almah Ltd. provided the following profit statement for the year ended (a) 31 October 2023:

| | Sh."million" |
|-------------|--------------|
| Revenue | 60 |
| Total costs | (<u>48)</u> |
| Net profit | <u>12</u> |

The contribution sales ratio is 50%.

Required:

- Calculate the break-even sales. (2 marks) (i)
- (ii) Calculate the margin of safety.
- (b) The management of Almah Ltd. in (a) above is considering two options with a view to increase sales in the year 2024.

These options are:

Option one: Increase sales by 30% and incur a sales promotion campaign worth Sh.5 million.

Option two: Increase sales by 20% and reduce the selling price by 10%.

Required:

Advise the management of Almah Ltd. on the better option to implement.

(4 marks)

(2 marks)

(c) Dimax College has been using their own van to transport students to and from college. The new principal feels this may be too expensive for the school. He suggests that the college could lease transport services from Gari WWW Clopicole Ltd. at a cost of Sh.308,000 per month.

The college accountant revealed the following information:

| | Sh. |
|-----------------------------|-----------|
| Cost of the van | 7,000,000 |
| Annual insurance | 790,000 |
| Annual repairs | 440,000 |
| Driver's monthly salary | 90,000 |
| Annual road licence | 100,000 |
| Transport levy per annum | 154,000 |
| Scrap value of the van | 1,000,000 |
| Tyres and tubes annual cost | 126,000 |
| Inspection cost per year | 10,000 |
| Petrol cost per kilometre | 154 |
| | |

Additional information:

The van is estimated to cover 40,000 km per year. It has an estimated useful life of six years. 1.

- 2. A new traffic rule has been issued requiring all passenger vehicles including college vans to be fitted with speed governors and seat belts. This will cost Sh.40,000 per annum.
- 3. Gari Ltd.'s monthly cost of Sh.308,000 is attributed as follows:

| | Sh. |
|-----------------|----------------|
| Van hire | 220,000 |
| Driver's salary | 50,000 |
| Maintenance fee | 38,000 |
| | <u>308,000</u> |

Required:

- (i) Compute the cost per kilometre if the college:
 - Uses its own transport. •
 - Hires transport services.

(ii) Outline **THREE** other factors that the college might consider in choosing the best alternative.

(6 marks)

(3 marks)

QUESTION THREE

- (a) Differentiate between "overhead allocation" and "overhead absorption".
- (b) Maono Ltd. has a budgetary activity level of 50,000 direct hours and budgeted production overheads of Sh.10,000,000. The following information was obtained from its three departments namely; A, B and C.
 - 1. **Department A:** 50,000 direct hours are worked and the actual overheads were Sh.9,400,000.
 - 2. **Department B:** 43,000 direct hours are worked and the actual overheads were Sh.10,000,000.
 - 3. **Department C:** 45,000 direct hours are worked and the actual overheads were Sh.9,600,000.

Required:

(c)

Determine over or under absorption of overheads of each department.

Tamu Ltd. is a company located in the Eastern part of the country and manufactures juices. The company plans to establish a subsidiary in western part of the country to produce mineral water. Tamu Ltd. estimates that the subsidiary can produce 40,000,000 bottles of water in the next one year.

The cost analysis for the subsidiary yielded the following estimates:

| | Sh."000" | Percentage of total annual cost that is variable (%) |
|---------------------|-----------|--|
| Material cost | 1,936,000 | 100 |
| Labour cost | 900,000 | 70 |
| Overhead cost | 800,000 | 64 |
| Administrative cost | 300,000 | 30 |

Additional information:

- 1. The bottled water produced by the subsidiary will be sold by sales representatives who will receive a commission of 8% of the sales price.
- 2. The subsidiary will operate independently in terms of costs and revenue.

Required:

- (i) Compute the sales price per bottle to enable management realise an estimated 10% profits on sales proceeds in the subsidiary. (6 marks)
- (ii) Calculate the break-even point in value for the subsidiary on the assumption that the sales price is Sh.110 per bottle. (4 marks)

(Total: 20 marks)

QUESTION FOUR

(a) Melta Ltd. has just completed its first year in operation. The unit costs and selling price based on absorption costing basis are as follows:

| Standard cost and selling price: | | Sh. |
|----------------------------------|-----------------------------------|-------|
| Direct material | (2 kilograms at 350 per kilogram) | 700 |
| Direct labour | (0.5 hours at Sh.1,600 per hour) | 800 |
| Production overhead: | | |
| Variable overheads | (0.5 hours at Sh.600 per hour) | 300 |
| Fixed overheads | (0.5 hours at Sh.900 per hour) | 450 |
| Standard production cost | | 2,250 |
| Standard profit margin | | 2,750 |
| Standard selling price | | 5,000 |

Additional information:

1. Other budgeted costs during the period in relation to selling and distribution and administration were as follows:

| | Variable costs | Fixed costs (Sh.) |
|--------------------------|----------------|-------------------|
| Selling and distribution | 10% of sales | 9,000,000 |
| Administration | | 12,300,000 |

- 2. During the year, the company had the following activity levels:
 - Actual production was 24,000 units.
 - Units sold were 21,300 units.
- 3. Actual fixed production overheads was Sh.300,000 less than absorbed fixed production overheads.
- 4. Budgeted fixed selling and distribution overheads were Sh.50,000 less than the actual fixed overheads.
- 5. Melta Ltd. used an expected activity level of 24,000 direct labour hours to compute the predetermined

For Solutions/Answers WhatsApp: 0724 962 477

(6 marks)

Required:

Prepare the following operating statements:

| (i) | Absorption costing profit or loss statement. | (6 marks) |
|-------|---|-----------|
| (ii) | Marginal costing profit or loss statement. | (6 marks) |
| (iii) | A reconciliation statement for absorption and marginal profits. | (2 marks) |

(b) Motomoto Ltd. operates standard costing system. The following budgeted information relates to its only product:

| | Quantity | Unit price (Sh.) | Standard cost per unit (Sh.) |
|------------------------|-------------|------------------|------------------------------|
| Direct material A | 3 kilograms | 140 | 420 |
| Direct material B | 2 kilograms | 250 | 500 |
| Direct labour | 2 hours | 105 | 110 |
| Fixed overheads | | | 270 |
| Standard cost per unit | | | <u>1,300</u> |

Budgeted production amounted to 800 units at a unit price of Sh.1,300.

Actual production data for the month of November 2023:

| - | Quantity | Sh. |
|----------------------|-----------------|-----------|
| Sales revenue | 850 units | 1,326,000 |
| Direct material A | 2,410 kilograms | (325,350) |
| Direct material B | 1,000 kilograms | (270,000) |
| Direct labour | 890 hours | (97,900) |
| Fixed overheads | | (229,500) |
| Net profit | | 403,250 |
| Actual output amount | ed to 850 units | |

Actual output amounted to 850 units.

Additional information:

- Budgeted fixed overheads for its product is based on budgeted output of 800 units per month. 1.
- 2. Standard selling price was budgeted as Sh.1,600 per unit.
- 3. There was no opening or closing inventory of direct material.

Required:

Flexible budget profit statement.

(6 marks) (Total: 20 marks)

www.chopi.co.ke

OUESTION FIVE

Major policy decisions in business are based on cost factor and it is important to distinguish between (a) controllable and non-controllable costs in decision making. However, the classification of cost as controllable and non-controllable depends on the point of reference.

Required:

- With reference to the above statement, explain TWO possible uses of cost information to the (i) management. (2 marks)
- By distinguishing between "controllable costs" and "non-controllable costs", discuss how the (ii) classification of cost as controllable and non-controllable depends on a point of reference. (4 marks)
- Activity Based Costing (ABC) attempts to relate the incidence of costs to the level of activities undertaken. (b)

Required:

In relation to the above statement, explain the following hierarchy of activities that are used in activity based costing system:

| (i) | Unit level activities. | (2 marks) |
|-------|---------------------------|-----------|
| (ii) | Batch level activities. | (2 marks) |
| (iii) | Product level activities. | (2 marks) |

(c) ABC Ltd. produces and sells a single product Zed whose standard cost is as follows:

| | Sn. |
|--|------------|
| Direct material (15kgs at Sh.260 per kg) | 3,900 |
| Direct wages (5 hours at Sh.60 per hour) | 300 |
| Fixed production overheads | 500 |
| | 4,700 |

Additional information:

1. The fixed overheads included in the standard cost is based on an expected monthly output of 1,000 units.

CL.

2. Fixed production overheads are absorbed on the basis of direct labour hours.

| 3. | During the month of November 2023, the actual results were as follows: | |
|----|--|-----------------------------------|
| | Production | 890 units |
| | Material | 12,100 units costing Sh.1,835,500 |
| | Direct wages | 4,200 hours worked for Sh.241,500 |
| | Fixed production overheads | Sh.470,000 |
| | | |

Required:

| (ii) | Labour rate variance and labour efficiency variance. | (4 marks) (Total: 20 marks) |
|------|--|--------------------------------|
| (i) | Material price variance and material wage variance. | (4 marks) |

MANAGEMENT ACCOUNTING

TUESDAY: 22 August 2023. Morning Paper.

Time Allowed: 3 hours.

Answer ALL questions. Marks allocated to each question are shown at the end of the question. Show ALL your workings. Do NOT write anything on this paper.

QUESTION ONE

- (a) Explain **THREE** limitations of financial accounting which are addressed by management accounting. (6 marks)
- (b) Distinguish between a "cost centre" and a "profit centre" as used in responsibility accounting. (4 marks)
- (c) The Management Accountant of Unga Safi Millers has presented the following data on machine hour and electricity consumption for the last 6 months:

| Month | Machine Hours ("000") | Electricity expense (Sh."000") |
|-----------|-----------------------|--------------------------------|
| June | 78 | 1,800 |
| July | 78 | 1,500 |
| August | 93 | 1,590 |
| September | 105 | 1,650 |
| October | 129 | 1,740 |
| November | 144 | 2,040 |

Required:

(i) Using High-Low method of cost estimation, develop a predictor equation in the form of Y=a+bx. (4 marks)
 (ii) Determine the total electricity expense at 120,000 machine hours. (2 marks)
 (iii) Explain TWO limitations of adopting High-low method in cost estimation. (4 marks)
 (Total: 20 marks)

QUESTION TWO

- (a) Explain **FOUR** reasons for budgeting in a business.
- (b) Tazam Ltd. is developing a cost accounting system. Initially it has been decided to create four centres: Accommodation deals with guests, Kitchen prepares meals while Tours and Entertainment are internal service recreation centres.

The following overheads details have been estimated for the month of August 2023:

| Type of overhead | Sh."000' |
|----------------------------|----------------|
| Rent and taxes | 75,000 |
| General lighting | 30,000 |
| Indirect wages | 150,000 |
| Petrol and engine oil | 88,500 |
| Depreciation on tour buses | <u>500,000</u> |
| • | 843.500 |

The following information is also available:

| | Total | Accommodation | Kitchen | Tours | Entertainment |
|--------------------------------|-----------|---------------|---------|---------|---------------|
| Direct wages (Sh."000") | 500,000 | 150,000 | 100,000 | 150,000 | 100,000 |
| Floor area (m ²) | 100,000 | 30,000 | 25,000 | 20,000 | 25,000 |
| Value of tour buses (Sh."000") | 1,250,000 | 350,000 | 650,000 | 150,000 | 100,000 |
| Lighting points | 60 | 20 | 15 | 10 | 15 |
| Number of petrol fillings | 150 | 40 | 50 | 60 | - |

(4 marks)

Additional information:

- In August 2023, it is estimated that there will be 20 guest-nights in Accommodation and 480 meals will 1. be served in the Kitchen.
- 2. Secondary allocation of overheads is as follows:

| Cost centre | Accommodation | Kitchen | Tours | Entertainment |
|---------------|---------------|---------|-------|---------------|
| Tours | 60% | 30% | - | 10% |
| Entertainment | 50% | 30% | 20% | |

Required:

- Prepare an overhead analysis statement (OAS) showing primary allocation to each centre. (10 marks) (i)
- Secondary allocation of the internal service recreation centre costs to production departments using (ii) simultaneous method. (4 marks)
- (iii) Calculate the appropriate overhead absorption rates for Accommodation and Kitchen. (2 marks) (Total: 20 marks)

QUESTION THREE

Urembo Lifestyles offers three different types of body grooming and fitness services. These are: salon, gym and (a) barber shop using the same staff. Various estimates for the next year have been made as follows:

| Service | Salon Sh. per client | Gym Sh. per client | Barber shop Sh. per client |
|-------------------------|-------------------------|-----------------------|-------------------------------|
| Service fee | 300 | 390 | 200 |
| Variable material costs | 140 | 180 | 100 |
| Variable labour costs | 60 | 100 | 50 |
| Fixed overhead costs | 90 | 120 | 40 |
| Labour hours per client | 2 hours | 3 hours | 1.5 hours |
| Additional information. | | A10 | |

Additional information:

- Total fixed cost for the next year is expected to be Sh.400,000. 1.
- 2. The budgeted maximum demand of clients for the next year for the services is estimated as follows:

- Salon 3,000 clients
- 1,000 clients Gym •
- Barber shop 1,500 clients
- Urembo Lifestyles has a maximum of 9,900 labour hours available next year. 3.

Required:

- If the business were to offer salon services only, calculate the break-even number of clients. (i) (3 marks)
- (ii) Prepare the limiting factor mix schedule to show the number of clients per service that maximises profitability. (6 marks)
- The maximum net profit achievable based on service mix determined in (a) (ii) above. (iii) (3 marks)
- (b) Sigma Ltd. operates a standard marginal costing system. The following data has been collected for the month of July 2023 for its main product branded "SGM":

| Actual costs incurred: | Sh."000" |
|--|------------------|
| Direct material (1,188 kilograms) | 11,286 |
| Direct labour (5,760 hours) | 41,760 |
| Variable production overheads | 12,096 |
| Fixed production overheads | 48,600 |
| | |
| Variances: | Sh."000" |
| Direct material price variance | 594 Favourable |
| Direct material usage variance | 1,080 Adverse |
| Direct labour rate variance | 1,440 Adverse |
| Direct labour efficiency variance | 2,520 Adverse |
| Variable overhead expenditure variance | 576 Adverse |
| Variable overhead efficiency variance | 720 Adverse |
| Fixed overhead expenditure variance | 900 Favourable |
| Fixed overhead volume variance | 4,500 Favourable |

Additional information:

- 1. Variable production overheads are absorbed based on actual hours worked.
- 2. There was no significant difference in opening and closing work in progress.
- 3. Actual production of product SGM was 1,080 units in the month of July 2023.

Required:

Prepare a standard product cost sheet for one unit of product SGM.

(8 marks) (Total: 20 marks)

QUESTION FOUR

- (a) Explain **THREE** factors that might be considered before choosing a suitable method for labour remuneration. (6 marks)
- (b) Mars Bottlers Ltd manufactures and sells four products. Details of the four products and relevant information are given below for the month of August 2023:

| Product | A01 | B02 | C03 | D04 | Total |
|--|------------------------|------------------------|----------------------|------------------------|-------------------------|
| Output units Machine hours per unit | 1,200 units 4 hours | 1,000 units 3 hours | 800 units 2 hours | 1,200 units 3 hours | 4,200 units 12 hours |
| Production runs | 6 | 5 | 4 | 6 | 21 |
| Requisitions raised | 20 | 20 | 20 | 20 | 80 |
| Orders executed | 12 | 10 | 8 | 12 | 42 |
| Cost per unit: | Sh. | Sh. | Sh. | Sh. | |
| Direct material | 3,300 | 4,125 | 2,475 | 4,950 | |
| Direct labour | 2,310 | 1,980 | 1,155 | 1,815 | |

Additional information:

- 1. Currently production overheads are absorbed based on conventional machine hour basis although the management is proposing the adoption of activity-based costing (ABC) technique.
- The production overheads for the period have been analysed as follows together with ABC cost drivers:
 Cost element Sh. "000" Cost drivers

| Cost element | Sh. "000" | Cost driver |
|-------------------------|-----------|---------------------------|
| Machinery cost centre | 10,430 | Total machine hours |
| Set-up costs | 5,250 | Number of production runs |
| Stores receiving costs | 3,600 | Requisitions raised |
| Inspection costs | 2,100 | Number of production runs |
| Material handling costs | 4,620 | Orders executed |
| - | 26,000 | |

Required:

Compute a budgeted unit cost and total cost using:

| (i) | Conventional technique. | (6 marks) |
|------|---|-----------|
| (ii) | Activity based costing (ABC) technique. | (8 marks) |

QUESTION FIVE

(a) The analysis of total cost into its behavioural elements is essential for effective cost and management accounting.

With reference to the above statement, enumerate **FOUR** cost behaviour patterns. (4 marks)

- (b) Hard Board Ltd. produces a product that passes through three processes. The data about refining process is as follows:
 - 1. Opening work in progress was 900 units at a total cost of Sh.45,000,000. The degree of completion is as follows:
 - Direct material 100%
 - Direct labour 40%
 - Production overheads 60%
 - 2. Data about refining process is as follows:
 - Input of raw materials is 9,100 units for Sh.273,000,000
 - Direct labour is Sh.125,700,000
 - Production overheads is Sh.81,000,000

(Total: 20 marks)

- 3. Finished units transferred to finished stores were 7,800 units.
- 4. Normal scrap loss was 10% of input units and the scrapped units realised Sh.30,000 per unit.
- 5. Units scrapped were 1,200 units with the following degrees of completion:
 - Direct material 100%
 - Direct labour 70%

• Production overheads 70%

- 6. Closing work in progress was 1,000 units with the following degrees of completion:
 - Direct material 100%
 - Direct labour 80%
 - Production overheads 70%
- 7. Hard Board Ltd. uses first in first out (FIFO) method.

Required:

Prepare the following:

| (i) | Statement of equivalent units of production. | (6 marks) |
|-------|--|--------------------------------|
| (ii) | Statement of cost. | (4 marks) |
| (iii) | Statement of valuation. | (3 marks) |
| (iv) | Refining process account. | (3 marks) (Total: 20 marks) |
| | | |

MANAGEMENT ACCOUNTING

TUESDAY: 25 April 2023. Morning Paper.

Answer ALL questions. Marks allocated to each question are shown at the end of the question. Show ALL your workings. Do NOT write anything on this paper.

QUESTION ONE

- (a) Explain **THREE** benefits of maintaining a cost database.
- (b) ABC Ltd. applies joint process costing in the production process of two joint products; AX and AY. The following information was gathered for the two joint products:

| Joint Products | Production | Selling price at split-off point | Separation cost if sold at split-off | Separation costs if processed further |
|-------------------|---------------------|-------------------------------------|--------------------------------------|--|
| | Kgs | (Sh. per kg) | (Sh. per kg) | (Sh. per kg) |
| AX | 322,000 | 435.90 | 125.90 | 42 |
| AY | 600,000 | 350.90 | 44.90 | 28 |
| ABC Ltd. incu | urred the following | joint costs: Sh."000' | , | |
| Conversion co | osts | 125,000 |) | |
| Curing cost | | 80,000 |) | |

Required:

Fermentation cost

Total joint cost

Calculate the total profit or loss per product if joint costs are allocated to product AX and AY on the basis of:

120,000

325.000

- Sales value at split-off point. (i)
 - (ii) Net realisable value at split-off point.
- Digital Television Ltd. manufactures digital televisions. The main component used in making digital televisions is (c) the fluorescent bulbs. For each digital television manufactured, 12 bulbs are required. The company manufactures 15,000 digital televisions per year. It costs Sh.200 each time the bulbs are ordered and the carrying cost are Sh.8 per bulb per year.

Required:

- Determine the economic order quantity of bulbs. (i)
- Calculate the number of times per year the bulbs will be ordered assuming 360 days in a year. (ii) (3 marks) (Total: 20 marks)

OUESTION TWO

- In the context of labour remuneration, highlight FOUR causes of labour turnover. (a)
- (b) Ezekiel Mutinda, a sole trader, prepares three types of cakes branded HBL1, HBL2 and HBL3 in two production cost centres and two service centres. The production centres are mixing cost centre and baking cost centre while the service centres are distribution department and canteen department.

The following is the budgeted production data and production cost for the year ending 31 December 2023: Duaduat

| | | Product | |
|-------------------------------|--------------|--------------|--------------|
| | HBL1 | HBL2 | HBL3 |
| Production | 3,300 units | 7,100 units | 1,650 units |
| | Sh. per unit | Sh. per unit | Sh. per unit |
| Direct material cost | 130 | 150 | 160 |
| Direct labour: | | | |
| Mixing cost centre | 75 | 60 | 50 |
| Baking cost centre | 90 | 50 | 180 |
| Mixing machine hours per unit | 6 | 3 | 4 |
| | | | |

Time Allowed: 3 hours.

(6 marks)

(4 marks)

(4 marks)

WWW Clopicole

(4 marks)

(3 marks)

The budgeted overheads for the year are as follows:

| Department | Mixing | Baking | Distribution | Canteen | Total Sh. |
|--|---------|---------|--------------|---------|---------------------------------|
| Allocated overheads (Sh.) Rent and rates Depreciation of machine | 376,975 | 243,925 | 166,000 | 266,500 | 1,053,400 170,000 300,000 |

Additional information:

The budgeted overheads for the year are to be allocated on the following basis: 1.

| | Department | | Mixing | Baking | Distribution | Canteen |
|----|----------------------------|------------------|------------------|--------------|------------------|---------|
| | Net book value of machine | e (Sh.) | 1,500,000 | 750,000 | 300,000 | 450,000 |
| | Floor space occupied (squa | are metre) | 3,600 | 1,400 | 1,000 | 800 |
| 2. | Secondary reapportionmen | t is allocated u | sing step-wise m | ethod on the | following basis: | |
| | Service department | Mixing | Baking | Distrib | ution Ca | nteen |
| | Distribution | 70% | 30% | - | - | - |
| | Canteen | 55% | 45% | - | - | - |

Required:

| (a) Outline FOUR factors influencing stock levels in inventory management. | | | (4 marks) | | |
|---|-------|--|---|--|--|
| QUESTION THREE | | | | | |
| | (v) | Calculate the budgeted total cost per unit of product HBL1 | (4 marks) (Total: 20 marks) | | |
| | (iv) | A rate expressed as a percentage of direct labour cost for the baking cost centre. | (4 marks) | | |
| | (iii) | A machine hour overhead absorption rate (OAR) for mixing cost centre. | (2 marks) | | |
| | (ii) | Total machine hours for mixing cost centre. | (2 marks) | | |
| | (i) | An overhead analysis sheet (OAS) showing both primary and secondary apportionment. | (4 marks) | | |

- Highlight FOUR purposes of cost estimation to a service company such as a hospital. (b) (4 marks)
- Relei Ltd. is currently following a centralised material storage system. The company is in the process of preparing its (c) cash budget for the second-quarter of the year 2023 and has availed the following data:

| Month | Sales Sh."000" | Material purchases Sh."000" | Production overheads Sh."000" | Selling overheads Sh."000" | Salaries and wages Sh."000" |
|----------|-------------------|-----------------------------------|-------------------------------------|----------------------------------|-----------------------------------|
| January | 144,000 | 50.000 | 12.000 | 11.000 | 20,000 |
| February | 200,000 | 62,000 | 12,300 | 12,400 | 24,000 |
| March | 180,000 | 50,500 | 13.000 | 15,500 | 20,000 |
| April | 150,000 | 60,600 | 17.500 | 18,900 | 36,000 |
| May | 205,000 | 74,000 | 17,700 | 22,000 | 40,000 |
| June | 208,000 | 76,800 | 16,400 | 23,200 | 48,000 |

Additional information:

- Cash sales are 60% of the total sales. The remaining sales are collected equally during the following two 1. months.
- 2. Assets are to be acquired in the month of April 2023 and May 2023. Therefore, provisions should be made for payment of Sh.16,000,000 and Sh.65,000,000 for the same.
- 3. An application has been made to the bank for the grant of a loan of Sh.45,000,000 and it is hoped that the loan will be received in the month of May 2023.
- 4. Creditors for materials purchased are granted one-month credit after month of purchase.
- 5. Monthly production overheads include depreciation of Sh.5,000,000 per month.
- Selling overheads are paid one month after the month in which the overhead occurred. 6.
- 7. Salaries commission at 3% on sales is paid to the salesmen each month.
- 8. Salaries and wages are paid monthly at the end of the month.
- An advance tax of Sh.20,000,000 is due in April 2023. 9.
- 10. The cash balance as at 1 April 2023 is estimated as Sh.144,500,000.

Required:

A cash budget for the second quarter of the year commencing 1 April 2022 to 30 June 2023.

(12 marks) (Total: 20 marks)

CA25 Page 2 Out of 4

QUESTION FOUR

- (a) Discuss **FOUR** limitations that a firm might encounter when operating a marginal costing system.
- (b) Grate Ltd. manufactures and sells a single product branded "GL". The cost data for the product is as follows:

| Variable cost per unit: | Sh. |
|------------------------------|------------------|
| Direct materials | 60 |
| Direct labour | 120 |
| Variable production overhead | 40 |
| Fixed production overhead | 80 |
| Variable selling overhead | 30 |
| - | <u>330</u> |
| Fixed cost per month: | Sh. |
| Fixed production overhead | 2,400,000 |
| Fixed selling overhead | <u>1,800,000</u> |
| - | 4,200,000 |

Additional information:

- 1. The product is sold for Sh.400 per unit.
- 2. Grate Ltd. budgeted to produce and sell 30,000 units per month.
- 3. Actual production and sales units for the months of January 2023 and February 2023 are as follows:

| _ | Production | Sales |
|----------|------------|---------|
| | (units) | (units) |
| January | 30,000 | 26,000 |
| February | 30,000 | 34,000 |

4. There was no opening inventory or work-in-progress as at the start of January 2023.

Required:

Prepare profit or loss statements based on:

- (i) Marginal costing technique.
- (ii) Absorption costing technique.

QUESTION FIVE

(a) Quivo Ltd. manufactures and sells a single product branded "QV". The following information relates to product "QV" for the month of March 2023:

| | Sh. per unit |
|-----------------------------|--------------|
| Materials | 800 |
| Conversion costs (variable) | 600 |
| Selling price | 2,000 |

Additional information:

- 1. The dealer's margin is equivalent to 10% of the selling price.
- 2. The total fixed cost during the period was Sh.25,000,000.
- 3. The sales department indicates that the current sales during the period amounted to 90,000 units.
- 4. The production capacity utilisation is at 60%.

The company has in the recent past faced an acute competition that has negatively affected the sales targets. The Marketing Manager has presented the following two options for increasing sales:

Option A: Reducing sales price by 5%. Option B: Increasing dealers' margin by 25% over the existing rate.

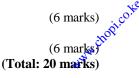

Required:

Recommended the option the company should adopt if the company desires to maintain the present profit. (8 marks)

(b) Dex Ltd. manufactures a single product branded "XV". The company operates a standard marginal costing system.

The following information for the month of March 2023 is availed to you:

- 1. The budgeted production and sales for the month amounted to 6,000 units.
- 2. The standard selling price of product "XV" per unit is Sh.13,200.
- 3. The variable standard manufacturing costs per unit are as follows:

| | | | Sh. |
|----|---|------------------------------|-----------------------------|
| | Direct materials (2.5 kgs at Sh.1,690 per kg) | | 4,225 |
| | Direct labour (1.25 hours at Sh.1,880 per hour) | | 2,350 |
| | Variable production overhead (1.25 direct labour hou | rs at Sh.1,340 per hour) | 1,675 |
| 4. | The actual results for the month of March 2023 were | as follows: | |
| | Production in units | 6,380 | |
| | | Sh."000" | |
| | Sales (5,640 units) | 81,075 | |
| | Direct materials purchased and used (14,730 kgs) | 27,987 | |
| | Direct labour (8,535 hours) | 15,363 | |
| | Variable production overheads | 8,974 | |
| 5. | The variable production overheads are absorbed on the | ne basis of direct labour ho | ours. |
| 6. | The opening and closing inventories of finished goo cost per unit. | ods are valued at the stan | dard variable manufacturing |

Required:

Compute the following variances:

| (i) | Sales price. | (2 marks) |
|-------|----------------------------|--------------------------------|
| (ii) | Sales volume contribution. | (2 marks) |
| (iii) | Direct material price. | (2 marks) |
| (iv) | Direct material usage. | (2 marks) |
| (v) | Direct labour rate. | (2 marks) |
| (vi) | Direct labour efficiency. | (2 marks) (Total: 20 marks) |
| | Chopi.co. | |

MANAGEMENT ACCOUNTING

TUESDAY: 6 December 2022. Morning Paper.

Time Allowed: 3 hours.

(4 marks)

WWW.COOP.CO.KE

Answer ALL questions. Marks allocated to each question are shown at the end of the question. Show ALL your workings. Do NOT write anything on this paper.

QUESTION ONE

- (a) Outline **SIX** benefits that would accrue to an organisation that encourages employees to participate in budget preparation. (6 marks)
- (b) Highlight **FOUR** benefits of continuous stock taking to a company.
- (c) Babu Ltd. places orders for one of the components used in its manufacturing process. The price of the component has been fluctuating thus affecting the production of the final product and hence eroding market confidence of the company's clients. The company's accountant has presented the following quantity ranges and respective price of the component which he believes would result in a cost saving to the company:

| Range number | Quantity range | Prices per unit of the component | |
|------------------|------------------|----------------------------------|--|
| | Units | Sh. | |
| Ι | 1 - 6,000 | 420 | |
| 11 | 6,001 – 10,000 | 380 | |
| 111 | 10,001 - 14,000 | 340 | |
| IV | 14,001 - 18,000 | 310 | |
| V | 18,001 and above | 260 | |
| A 1 1949 1 1 0 4 | • | | |

Additional information:

- 1. The company's annual demand is 60,000 units.
- 2. The ordering cost per order is Sh.50,000.
- 3. The holding cost is 20% of the purchase price
- 4. The company practices continuous stock taking throughout the year.

Required:

Advise the company on the quantity range that would yield the highest cost savings. (10 marks) (**Total: 20 marks**)

QUESTION TWO

(a) Explain the meaning of the following types of inventory costs:

| (i) | Out of pocket costs. | (2 marks) |
|-------|----------------------|-----------|
| (ii) | Set-up costs. | (2 marks) |
| (iii) | Opportunity costs. | (2 marks) |

(b) Lengo Ltd. manufactures and sells two products L and G to a number of customers. The company is currently preparing its budget for the year ending 31 December 2023.

The cost, selling prices and demand units details for its two products are as follows:

| Product | L | G |
|-------------------------------------|-------|-------|
| | Sh. | Sh. |
| Selling price per unit | 2,000 | 2,100 |
| Variable costs per unit: | | |
| Direct material Q (Sh.25 per litre) | 200 | 250 |
| Direct material T (Sh.40 per litre) | 400 | 200 |
| Direct labour (Sh.140 per hour) | 280 | 350 |
| Overhead (Sh.40 per hour) | 160 | 200 |
| Fixed production cost per unit | 400 | 500 |
| | Units | Units |
| Maximum sales demand for the month | 1,000 | 3,000 |

Additional information:

- 1. The fixed production cost per unit is based upon an absorption rate of Sh.200 per direct labour hour and total annual production activity is 90,000 direct labour hours. One-twelfth $(^{1}/_{12})$ of the annual fixed production cost will be incurred.
- 2. In addition to the above costs, non-production overhead costs are expected to be Sh.577,500.
- 3. During the period, the availability of material Q is expected to be limited to 31,250 litres.
- 4. It is the policy of Lengo Ltd not to hold inventory of finished goods

Required:

| (i) | Compute the shortfall in litres for material Q. | (3 marks) |
|-------|---|---|
| (ii) | The optimal production mix based on priority ranking. | (7 marks) |
| (iii) | The net profit at optimal production mix. | (4 marks) (Total: 20 marks) |

QUESTION THREE

(a) TQM Ltd. is a manufacturing company that makes three products namely; T, Q, and M. The data for the period ended 30 November 2022 is given as follows:

| Units produced and sold | T 12,000 | Q 16,000 | M 8,000 |
|-------------------------------|--------------------|--------------------|-------------------|
| Calas miss non unit | Sh. | Sh. | Sh. |
| Sales price per unit | 50 | 70 | 60 |
| Direct material cost per unit | 16 | 24 | 20 |
| Direct labour cost per unit | 8 | 12 | 8 |

| Production overheads costs | Total Sh. | Cost drivers |
|----------------------------|----------------|------------------------------|
| Machining costs | 102,000 | Machine hours |
| Production scheduling | 84,000 | Number of production runs |
| Set-up costs | 54,000 | Number of production runs |
| Quality control | 49,200 | Number of production runs |
| Receiving materials | 64,800 | Number of component receipts |
| Packing materials | 36,000 | Number of customer orders |
| | <u>390,000</u> | |

Information on the cost driver is given as follows:

| | Т | Q | Μ |
|-------------------------------|-----|------|------|
| Direct labour hours per unit | 1 | 11/2 | 1 |
| Machine hours per unit | 1/2 | 1 | 11/2 |
| Number of components per unit | 3 | 5 | 8 |
| Number of component receipts | 18 | 80 | 64 |
| Number of customer orders | 6 | 20 | 10 |
| Number of production runs | 6 | 16 | 8 |

Required:

Using activity-based costing (ABC), determine the cost and gross profit per unit for each product during the period. (10 marks)

Bingwa Ltd. operates a premium bonus system where workers receive a guaranteed basic hourly minimum rate of (b) pay plus a bonus of 50% of the time saved.

The following data is provided for the last week of November 2022:

| Particulars | Bella | Chali | Dan |
|----------------------------|--------------------|--------------------|-------------------|
| Time rate (Sh. per hour) | 300 | 280 | 320 |
| Units produced | 2,500 units | 2,200 units | 2,600 units |
| Time allowed for 100 units | 2 hours 36 minutes | 2 hours 30 minutes | 2 hour 30 minutes |
| Time taken | 55 hours | 58 hours | 54 hours |
| Rejected units | 100 units | 40 units | 200 units |

Additional information:

- No payment is made beyond the time allowed. 1.
- 2. The bonus which is paid at the basic hourly rate is applicable to the accepted output only.
- 3. No penalty is imposed on rejected output.

Required:

From the above information, calculate for each employee:

| (i) | Bonus hours and amount of bonus earned. | (6 marks) |
|------|--|--------------------------------|
| (ii) | Labour cost for each good unit produced. | (4 marks) (Total: 20 marks) |

QUESTION FOUR

- Explain FOUR arguments in favour of marginal costing system. (a)
- Quota Ltd manufactures and sells a single product branded "TT" with a standard cost of Sh.1,100 made up as (b) A WHAR follows:

| | Sh. |
|---|-----|
| Direct materials (15 square metres at Sh.30 per square metre) | 450 |
| Direct labour (5 hours at Sh.100 per hour) | 500 |
| Variable overheads (5 hours at Sh.20 per hour) | 100 |
| Fixed overheads (5 hours at Sh.10 per hour) | 50 |

The standard selling price per unit is Sh.1,300. The monthly budget projects production and sales of 1,000 units.

Actual figures for the month of November 2022 are as follows:

- Sales 1,200 units at Sh.1,320 per unit.
- Actual production 1,400 units. .
- Direct materials 22,000 square metres at Sh.40 per square metre.
- Direct wages 6,800 hours at Sh.110.
- Variable overheads was Sh.110,000.
- Fixed overheads was Sh.60,000.

Required:

| | (i) | Material price variance and material usage variance. | (4 marks) |
|-------------|------------------|--|------------------------|
| | (ii) | Labour rate variance and labour efficiency variance. | (4 marks) |
| | (iii) | Fixed overhead capacity variance and fixed overhead efficiency variance. (Total: | (4 marks) 20 marks) |
| QUES (a) | TION FI Summa | VE arise FOUR salient features of process costing systems. | (4 marks) |
| (b) | Highlig | the SIX benefits that a firm would derive from establishing a good cost accounting system. | (6 marks) |

(8 marks)

(c) Ocean Ltd. is preparing its budget for the year ending 30 June 2023.

It is decided to estimate an equation of the form, Y = a + bx,

Where;

Y is the total maintenance expense at an activity level x.

a is the fixed maintenance expense.

The following information relate to the year ending 30 June 2023:

| | Machine | Maintenance | | Machine | Maintenance |
|----------------|---------|-----------------|---------------|---------|-----------------|
| Month | hours | Cost (Sh."000") | Month | hours | Cost (Sh."000") |
| September 2022 | 400 | 960 | February 2023 | 240 | 640 |
| October 2022 | 240 | 880 | March 2023 | 160 | 560 |
| November 2022 | 80 | 280 | April 2023 | 480 | 1,350 |
| December 2022 | 400 | 1,200 | May 2023 | 320 | 660 |
| January 2023 | 320 | 800 | June 2023 | 160 | 440 |

Required:

(i) Estimate the total cost function using the ordinary least squares method. (8 m

.....

(ii) Determine the total cost if 1,050 machine hours were applied.

(8 marks)

(2 marks) (Total: 20 marks)

CPA PART I SECTION 2

MANAGEMENT ACCOUNTING

WEDNESDAY: 1 September 2021.

Time Allowed: 3 hours.

Answer ALL questions. Marks allocated to each question are shown at the end of the question. Show ALL your workings.

QUESTION ONE

- (a) Identify and explain four types of costs that are irrelevant for decision making. (8 marks)
- (b) Meyton Ltd. reported the following production costs for the 12-month period from 1 January 2020 to December 2020:

| Period | Total production cost (Sh."000") | Level of activity (Units produced) | |
|-----------|-------------------------------------|---|---|
| January | 460 | 30 | |
| February | 300 | 22 | 5 |
| March | 480 | 33 | |
| April | 550 | 39 30 | |
| May | 570 | 22 33 39 41 24 ********************************* | |

| September | 530 | 38 | |
| October | 250 | 15 | |
| November | 700 | 45 | |
| December | 490 | 35 | |

Required:

(i) Using linear regression, establish the production function in the form of Y = a + bx. (8 marks)

(ii) From the equation in (b) (i) above, estimate the production cost that would be incurred on 50 units. (2 marks)

(iii) State any two advantages of regression method of cost estimation. . (2 marks) (Total: 20 marks)

OUESTION TWO

- (a) Examine four limitations of financial accounting that have made organisations introduce management accounting. (8 marks)
- (b) The following details have been recorded for four batches made in the month of June 2021:

| Batch | Α | В | С | D |
|------------------------|-------|-------|-------|-------|
| Output in units | 250 | 60 | 200 | 120 |
| Cost per batch: | Sh. | Sh. | Sh. | Sh. |
| Direct materials | 1,650 | 750 | 2,100 | 900 |
| Direct labour | 9,200 | 1,520 | 6,880 | 2,400 |
| Labour hours per batch | 1,150 | 190 | 860 | 300 |

Additional information:

1. The total production overheads for the month of June 2021 has been analysed as follows:

| | Sh. | | | |
|------------|-----------------------------------|--|--|---|
| | 14,600 | | | |
| | 6,800 | | | |
| | 8,250 | | | |
| | 5,850 | | | |
| | 6,200 | | | |
| | 8,300 | | | |
| es were re | ecorded for the | four batches: | | |
| A | В | С | D | Total |
| 520 | 255 | 610 | 325 | 1,710 |
| 180 | 70 | 205 | 40 | 495 |
| 40 | 21 | 43 | 26 | 130 |
| 18 | 8 | 13 | 8 | 47 |

| 65 | 38 | 52 | 35 | 190 |
| | A 520 180 40 18 12 | $\begin{array}{c} 14,600\\ 6,800\\ 8,250\\ 5,850\\ 6,200\\ 8,300\\ \hline \\ es were recorded for the \\ \hline A & B\\ 520& 255\\ 180& 70\\ 40& 21\\ 18& 8\\ 12& 7\\ \end{array}$ | $\begin{array}{c cccccc} & 14,600 & & \\ & 6,800 & & \\ & 8,250 & & \\ & 5,850 & & \\ & 6,200 & & \\ & 8,300 & \\ \end{array}$ es were recorded for the four batches: A B C 520 255 610 180 70 205 40 21 43 18 8 13 12 7 16 | $\begin{array}{c ccccccccccccccccccccccccccccccccccc$ |

Required:

| (i) | Based on a labour hour overhead absorption rate (OAR), compute t | he batch cost and unit cost |
|-----|--|-----------------------------|
| | using traditional absorption costing system. | (4 hours) |

| (ii) | The batch cost and unit cost using Activity Based Costing (ABC) system. | (8 marks) |
|------|---|-------------------|
| | | (Total: 20 marks) |

QUESTION THREE

2.

(a) FMS Clinix Ltd. operates two hospitals in a remote area; thus subsidising the cost of its services.

The following information relating to the two hospitals over the last one year is provided:

| | Mashariki Hospitał | Kusini Hospitał |
|-----------------------------------|-----------------------|-----------------|
| Number of hospital beds | 780 | 500 |
| Number of in-patients | 23,472 | 8,165 |
| Average stay | $7\frac{1}{2}$ days | ? |
| Number of outpatient visits | 216,500 | 63,920 |
| ? Not recorded but bed occupation | n percentage was 85%. | |

Additional information:

1. The following information was provided by the accountants based on the two hospitals:

| | Masha | Mashariki Hospital | | Kusini Hospitał | |
|--------------------|-------------------|--------------------|------------|-----------------|--|
| | Inpatients | Outpatients | Inpatients | Outpatients | |
| Direct costs: | Sh. | Sh. | Sh. | Sh. | |
| Supplies and drugs | 1,821,520 | 693,600 | 1,551,350 | 285,450 | |
| Medical staff | 8,729,100 | 3,308,950 | 6,832,700 | 1,975,050 | |
| Support services | 2,210,500 | 2,563,700 | 1,845,380 | 1,591,620 | |
| Indirect costs: | | | | | |
| General services | 3,524,470 | 1,721,800 | 1,937,410 | 635,600 | |
| Totals | <u>16,285,590</u> | <u>8,288,050</u> | 12,166,840 | 4,487,720 | |

2. Assume a 365-days year.

Required:

| | | CA22 Page 2 Out of 4 |
|-------|---|-------------------------|
| (iv) | Cost per out-patient attendance for both hospitals. | (4 marks) |
| (iii) | Cost per in-patient day for both hospitals. | (4 marks) |
| (ii) | Bed occupation percentage in Mashariki Hospital | (3 marks) |
| (i) | Average length of stay at Kusini Hospital. | (3 marks) |

(b) Fanaka Enterprises uses economic order quantity (EOQ) model to establish the re-order quantity of raw material "Y". The company hold no buffer stock.

The following information relates to raw material "Y":

| Annual usage | 48,000 units |
|----------------------|---------------------------|
| Purchase price | Sh.80 per unit |
| Ordering costs | Sh.120 per order |
| Annual holding costs | 10% of the purchase price |

The company's supplier of raw material "Y" has offered a discount of 1% of the purchase price if each order placed is for 2,000 units.

Required:

- (i) Economic order quantity (EOQ) of raw material "Y". (1 mark)
- (ii) Advise the management of the company on whether to accept or decline the offer. (5 marks) (Total: 20 marks)

QUESTION FOUR

(a) Evaluate three benefits that would accrue to an organisation that has a cost accounting department (6 marks)

(b) MK Enterprises produces and sells two products branded "M" and "K" which are used as raw materials in production of wall paint. The cost accountant has provided the following monthly data for budgeting purposes:

| Product | Μ | К |
|-----------------------------------|----------------|---|
| Sales level (units) | 2,000 | 1,500 |
| Opening stock (units) | 100 | 200 |
| Materials required: | | |
| Exe (kgs) | 2 | 3 |
| Zed (litres) | 1 | 4 |
| Labour hours required: | | |
| Skilled labour (hours) | 4 | 2 |
| Semi-skilled labour (hours) | 2 | 5 |
| Additional information: | | |
| 1. Material costs are as follows: | | |
| Exe per kg - | Sh.100 | |
| Zed per litre - | Sh.70 | |
| 2. Labour costs are as follows | | |
| Skilled labour per hour | - | Sh.120 |
| Semi-skilled labour per hour | - | Sh.80 |
| 3. Closing stock of materials and | d finished goo | ods will be sufficient to meet 10% of demand. |

4. Opening stocks for material Exe was 300kgs and for material Zed was 1,000 litres.

Required:

Prepare the following budgets:

| (i) | Production budget in units. | (3 marks) |
|-------|--|--------------------------------|
| (ii) | Materials usage budget in kilograms and litres. | (3 marks) |
| (iii) | Materials purchases budget in kilograms, litres and shillings. | (4 marks) |
| (iv) | Labour budget in hours and shillings. | (4 marks) (Total: 20 marks) |

www.clopi.co.ke

QUESTION FIVE

(a) Double B Ltd. manufactures a chemical that passes through three production processes namely; 1, 2 and 3. In the month of June 2021, 6,000 litres of the basic raw materials priced at Sh.240,000 were introduced into process 1.

Subsequently, the following costs were incurred:

| Element of cost | Total | | Process | |
|------------------|---------|--------|---------|--------|
| | | 1 | 2 | 3 |
| | Sh. | Sh. | Sh. | Sh. |
| Direct materials | | | | |
| (additional) | 87,500 | 30,000 | 40,000 | 17,500 |
| Direct labour | 110,000 | 40,000 | 50,000 | 20,000 |
| Direct expenses | 16,900 | 6,000 | 1,600 | 9,300 |

Additional information:

1. Normal output per process was estimated as follows:

| Process | 1 | 90% |
|---------|---|------|
| Process | 2 | 95% |
| D | 2 | 000/ |

| Proc | Process 3 | | | | |
|-----------|-----------|--|---|--|--|
| m1 | | | c | | |

2. The output of each process was as given below:

| | Litres |
|-----------|--------|
| Process 1 | 5,300 |
| Process 2 | 5,000 |

| Process | 3 | 4,700 |
|---------|---|-------|
| | | |

3. The loss in each process represented scrap which could be sold at the following prices:

| | Price per unit (Sh.) |
|-----------|----------------------|
| Process 1 | 20 |
| Process 2 | 44 |
| Process 3 | 65 |

4. There were no stocks of materials or work-in-progress at the beginning or end of the period.

5. The output of each process passes directly to the next process and finally to finished goods.

6. Production overhead is absorbed by each process on a basis of 50% of the cost of direct labour.

Required

| (i) | Process 1 account. | (3 marks) |
|-------|------------------------|-----------|
| (ii) | Process 2 account. | (3 marks) |
| (iii) | Process 3 account. | (3 marks) |
| (iv) | Abnormal loss account. | (2 marks) |
| (v) | Abnormal gain account. | (1 mark) |
| | | |

(b)

Wetu Ltd. makes leather purses. It has drawn up the following budget for its next financial period:

| Selling | price per unit | Sh.11.60 |
|---|-------------------------------------|---------------------|
| Variabl | e production cost per unit | Sh.3.40 |
| Sales co | ommission | 5% of selling price |
| Fixed p | roduction costs | Sh.430,500 |
| Fixed so | elling and administrative cost | Sh.198,150 |
| Sales | - | 90,000 units |
| Requir (i) | ed: Margin of safety percentage. | (5 marks) |
| (ii) The marketing manager has indicated that an increase in the selling price to Sh.12.25 per unit would not affect the number of units sold provided that the sales commission is increased to 8% of the selling price. | | |
| | Required: | |

Determine the new break-even point in units. (3 marks) (Total: 20 marks)

MANAGEMENT ACCOUNTING

WEDNESDAY: 6 April 2022. Morning paper.

Time Allowed: 3 hours.

WWW. CHOP.CO.Ke

Answer ALL questions. Marks allocated to each question are shown at the end of the question. Show ALL your workings. Do NOT write anything on this paper.

QUESTION ONE

(a) Cost accounting uses information provided by financial accounting together with other details of internal operations of an organisation.

With reference to the above statement, describe three similarities between cost accounting and financial accounting. (6 marks)

(b) Rengo ltd. has provided the following data for the financial year 2022:

| Budgeted output for the year Standard details for one unit: | 9,800 units |
|---|--|
| • Direct materials | 40 square metres at Sh.530 per square metre. |
| • Direct labour costs: | 49.1 (91.250) 1 |

- Bonding cost centre 48 hours at Sh.250 per hour
 - Finishing cost centre 30 hours at Sh.190 per hour
- 3. Budgeted costs and hours per annum:

| ٠ | Variable overhead: | Hours | Sh. |
|---|--------------------------|---------|------------|
| | Bonding cost centre | 500,000 | 3,750,000 |
| | Finishing cost centre | 300,000 | 1,500,000 |
| • | Fixed overhead: | | |
| | Production | | 39,200,000 |
| | Selling and distribution | | 19,600,000 |
| | Administration | | 9,800,000 |

Required:

Prepare a standard cost statement of a unit cost showing:

| (i) | Prime cost. | (2 marks) |
|-------|---|-----------|
| (ii) | Variable production cost. | (2 marks) |
| (iii) | Total cost. | (2 marks) |
| (iv) | Selling price per unit at a notion profit of 15% on cost. | (2 marks) |

(c) Jambo Ltd. manufactures bracelets for export trade. The sales revenue is dependent on level of advertising expenditure per month. The company has recorded the following sales information for the past six months:

| Month | Advertising expenditure Sh."000" | Sales revenue Sh. "000" |
|-------|-------------------------------------|----------------------------|
| 1 | 1.5 | 30 |
| 2 | 2 | 27 |
| 3 | 1.75 | 25 |
| 4 | 3 | 40 |
| 5 | 2.5 | 32 |
| 6 | 2.75 | 38 |

The following has also been calculated:

| \sum (Advertising expenditure) | = | Sh.13,500 |
|--|---|------------------|
| $\overline{\Sigma}$ (Sales revenue) | = | Sh.192,000 |
| \sum (Advertising expenditure × Sales revenue) | = | Sh.447,250,000 |
| \sum (Sales revenue ²) | = | Sh.6,322,000,000 |
| \sum (Advertising expenditure ²) | | Sh.32,125,000 |

Required:

Estimate fixed and variable elements of the sales revenue using the least squares regression analysis. (6 marks) (Total: 20 marks)

QUESTION TWO

- (a) Discuss four circumstances under which time-based labour remuneration system is deemed to be more appropriate than the output based system. (8 marks)
- (b) The following data relate to a particular stock item of Magala Ltd. The company's management is in the process of setting its stock levels as a way to address the escalating stock handling costs.

| The following | information | is provided: | |
|---------------|-------------|--------------|--|
|---------------|-------------|--------------|--|

| Normal usage per day | 1,100 units |
|---|--------------|
| Minimum usage per day | 500 units |
| Maximum usage per day | 1,400 units |
| Lead time | 25 - 30 days |
| Economic order quantity (previously calculated) | 50,000 units |
| | |

Required:

Compute the following:

| (i) | Re-order level. | (2 marks) |
|-------|----------------------|--------------------------------|
| (ii) | Maximum stock level. | (4 marks) |
| (iii) | Minimum stock level. | (4 marks) |
| (iv) | Average stock level. | (2 marks) (Total: 20 marks) |

QUESTION THREE

- (a) Discuss four challenges that you are likely to encounter when installing a costing management system. (8 marks)
- (b) The following information is provided in relation to Baridi Kuu Ltd. The annual demand of its product branded 'D' is 30,000 units. The ordering cost per order is Sh.2,500. The holding cost is expressed as a percentage of purchase price at 20%.

The following price ranges are given with their respective quantities:

| Range | Quantities (Units) | Price (Sh.) |
|-------|-----------------------|-------------|
| 1 | 1-3,000 | 21 |
| 2 | 3,001-5,000 | 19 |
| 3 | 5,001-7,000 | 17 |
| 4 | 7,001-9,000 | 15.50 |
| 5 | 9,001-10,000 | 13 |

Required:

Advise the company on the quantity to purchase.

(c) Seek Plastics Ltd. manufactures plastic components for water pumps.

The following budgeted information is available for three of their key plastic components:

| | W Sh. per unit | X Sh. Per unit | Y Sh. Per unit |
|-------------------------|-------------------|-------------------|-------------------|
| Selling price | 200 | 183 | 175 |
| Direct materials | 50 | 40 | 35 |
| Direct labour | 30 | 35 | 30 |
| Units produced and sold | 10,000 | 15,000 | 18,000 |

For Solutions/Answers WhatsApp: 0724 962 477

CA25 Page 2 Out of 4

(6 marks)

Additional information:

1. The total number of activities for each of the three products for the period is as follows:

| | Product | | |
|---------------------------------|--------------|-------|-------|
| | \mathbf{W} | Χ | Y |
| Number of purchase requisitions | 1,200 | 1,800 | 2,000 |
| Number of set ups | 240 | 260 | 300 |

| 2. | Overhead costs have been analysed as follows: | |
|----|---|--------------|
| | Receiving/ inspecting quality assurance | Sh.1,400,000 |
| | Production scheduling/ machine set up | Sh.1,200,000 |

Required:

Determine the budgeted profit per unit of each of the three products using Activity Based Costing (ABC) method. (6 marks)

(Total: 20 marks)

QUESTION FOUR

(a) Distinguish between "marginal costing" and "absorption costing" techniques.

(4 marks)

www.chopi.co.ke

(b) Bahati Limited operates a chemical process which produces four different products namely C, F, T and S from the input of raw materials plus water.

Budget information for the forthcoming financial year is as follows:

| | Sh. "000" |
|-------------------------|-----------|
| Raw materials cost | 268 |
| Initial processing cost | 264 |
| Conversion cost | 200 |

| Product | Output (litres) | Sales (Sh.000) | Additional processing cost (Sh.000) |
|---------|--------------------|-------------------|-------------------------------------|
| С | 400,000 | 768 | 160 |
| F | 90,000 | 232 | 128 |
| Т | 5,000 | 32 | - |
| S | 9,000 | 240 | 8 |

Additional information:

- 1. The company's policy is to apportion the costs prior to the split-off point on a method based on net realisable value (NRV).
- 1. Currently, the intention is to sell product T without further processing, but to process the other three products after the split-off point.
- 2. An alternative strategy is being proposed so as to sell all the four products at the split-off point without further processing. If this were done, the selling prices obtainable would be as follows:

| Product | Selling price per |
|---------|-------------------|
| | litre (Sh.) |
| С | 1.28 |
| F | 1.60 |
| Т | 6.40 |
| S | 20 |

Required:

(i) Budgeted profit statement showing the profit or loss for each product assuming the current processing policy is adopted. (8 marks)

(ii) The profit or loss by product, and in total, assuming the alternative strategy was to be adopted. (8 marks) (Total: 20 marks)

QUESTION FIVE

(a) Smart products Ltd. operates standard costing and budgetary control system.

The following is the company's standard cost card:

| | Sn. |
|---------------------------------|------------|
| Direct materials | 120 |
| Direct labour | 60 |
| Variable overheads | 20 |
| Fixed overheads | <u>30</u> |
| Standard cost per unit | 230 |
| Standard profit per unit | <u>20</u> |
| Standard selling price per unit | <u>250</u> |
| | |

Additional information:

1. Each unit requires 3 kgs of material which cost Sh.40 per kg and 45 minutes of direct labour at a rate of Sh.80 per hour.

CL.

- 2. Variable overheads are recovered on direct labour hour basis.
- 3. Fixed overhead are absorbed on annual production budget of 180,000 units.
- 4. For the year to 31 March 2022, 120,000 units had been manufactured and sold. Contrary to the managements expectation, the company's profit and loss statement reflected a loss of Sh.1,380,000 instead of the expected profit of Sh.3,6000,000 as provided below:

| | (Sh.000) | (Sh.000) |
|-------------------------------|----------|---------------|
| Sales (120,000 units) | | 22,800 |
| Production cost: | | |
| Direct materials (100,000kgs) | 12,000 | |
| Direct labour (52,000 hours) | 3,900 | |
| Variable overheads | 2,880 | |
| Fixed overheads | 5,400 | <u>24,180</u> |
| Profit (loss) | | (1,380) |

Required:

(i) Budgeted profit and loss account for the year ended 31 March 2022. (6 marks)

- (ii) Flexible budget for the production achieved.
- (b) Wasiri Ltd. produces 10,000 units per annum by employing 50% of the total factory capacity.

The selling price per unit is Sh.500 and the total costs are as follows:

| | Sh."000" |
|-----------------|--------------|
| Materials | 1,000 |
| Wages | 2,000 |
| Fixed overheads | 1,000 |
| Fixed Overheads | <u>400</u> |
| Total costs | <u>4,400</u> |

Additional information:

- 1. Variable overheads maintains a constant ratio to the number of units produced.
- 2. The production manager is evaluating acceptance of a special offer of additional 10,000 units at a selling price of Sh.387.50 each.
- 3. The increased volume of purchases will reduce the material price by 2.5%.
- 4. The wage rates will remain constant but due to employment of new workers, there will be a drop in labour efficiency by 5% on all production.

Required:

| (i) | Prepare a statement showing the variation of net profits result | ng from the acceptance of the order. | (6 marks) |
|-----|---|--------------------------------------|-----------|
| | | | |

.....

| (ii) | Advise the management of Wasiri Ltd. on whether to accept the offer. | (2 marks) |
|------|--|-----------|
| | | |

MANAGEMENT ACCOUNTING

FRIDAY: 17 December 2021.

Time Allowed: 3 hours.

(2 marks)

194. Chopi.co.X

Answer ALL questions. Marks allocated to each question are shown at the end of the question. Show ALL your workings.

QUESTION ONE

- (a)
- a) Blade Ltd. manufacturers a range of electronic products. The supplier of component X has informed Blade Ltd. that it will offer a quantity discount of 1% if Blade Ltd. places an order of 10,000 components or more at any time. Details of component X are as follows:

| Cost per component before discount | |
|------------------------------------|--|
| Annual purchases | |
| Ordering costs | |
| Holding costs | |

Sh.20 150,000 components Sh.360 per order Sh.3 per component per annum

Required:

(i) Economic order quantity (EOQ).

- (ii) Annual ordering cost and holding costs of inventory of component X using the economic order quantity (EOQ) computed in (a) (i) above. (4 marks)
- (iii) Advise the management of Blade Ltd. whether the discount should be accepted. (4 marks)

(b) Usenge Products Ltd. manufactures and retails products A. B and C.

The company has 120 workers who work under a group bonus scheme. The workers are categorised into three grades and are paid a bonus of the excess of time allowed over time taken.

The bonus paid is 80% of the workers' base rate and is shared by the workers in the proportion of time spent on the job. The following production data has been extracted from the company's records for the month of November 2021.

| Produc A | t I | U <mark>nits produced</mark> 640 | Time allowed | d per unit (Minutes) 63 | | |
|-------------|------------|-------------------------------------|--------------|----------------------------|----------------------------|-----|
| B | | 1,280 | | 120 | | |
| č | | 2,400 | | 100 | | |
| Grade | of worker | Number of di | rect workers | Basic rate per hour | Hours worked per worker | |
| 1 | | 40 |) | 300 | 30 | |
| 2 | | 16 | | 270 | 64 | |
| 3 | | 64 | ļ | 240 | 50 | |
| Requir | ed: | | | | | |
| (i) | | e of hours saved to | hours taken. | | (3 mark | ks) |
| (ii) | Bonus due | to the group. | | | (3 mark | ks) |
| (iii) | Gross earn | ings due to the gro | oup. | | (4 mar) (Total: 20 mar) | |

QUESTION TWO

(a) (i) Using relevant examples, distinguish between a "joint product" and a "by-product". (4 marks)

(ii) Zaidi Industries Ltd. produces two products branded A and B from the same material. The cost of material is Sh.9.50 per kg and the two products appear after Process I.

CA25 Page 1 Out of 3 Product A can be sold directly to the market but product B requires further processing in Process II.

The following data relate to the month of October 2021:

| | Materials | Labour | Overheads | |
|---------|---------------------|----------------|----------------|-------------------|
| Process | Sh. | Sh. | Sh. | Sh. |
| 1 | 1,440.000 | 210,000 | 150,000 | 1,8 00,000 |
| Н | <u> </u> | <u>100,000</u> | <u>180,000</u> | 280,000 |
| | 1,440,000 | 310,000 | 330,000 | 2,080,000 |
| Product | Quantity sold (Kgs) | Closing s | tock (Kgs) | Sales (Sh.) |
| А | 30,000 | 15, | ,000 | 525,000 |
| в | 45.000 | | - | 1,507,500 |

Additional information:

1. There were no materials on hand at the end of the month of October 2021.

2. The company uses the sales value method of apportionment for joint costs.

Required:

Determine the total cost of Products A and B.

(8 marks)

The following data was provided by the cost accountant of Miradi Ltd. relating to marketing expenses and sales for a period of first eight months of the financial year ending 31 December 2021.

| Month | 1 | 2 | 3 | - 4 | 5 | 6 | 7 | 8 |
|-------------------------------------|-----|-----|-----|-----|-----|-----|-----|-----|
| Total marketing expenses (Sh."000") | 265 | 302 | 222 | 240 | 362 | 295 | 404 | 400 |
| Sales units (000) | 20 | 24 | 16 | 18 | 26 | 22 | 32 | 30 |

Preliminary calculations have established the following analysis using the equation in the form of y = a + bx

| Σ (sales unit) | = | 4,640 million |
|---|---|--------------------|
| Σ (total marketing expenses) ² | = | Sh.809,598 million |
| Σ (total marketing expenses x sales units) | = | Sh.61,250 million |

Required:

Predict the total marketing expenses for the ninth month when planned sales are 44,000 units. (8 marks)

QUESTION THREE

(b)

(a) The Cost Accountant of ABC Ltd. has provided the following information relating to production of a single product branded "Zed":

| | Period 1 | Period 2 | Period 3 |
|---------------------|----------|----------|----------|
| Production (Kgs) | 30,000 | 38,000 | 27,000 |
| Sales (Kgs) | 30,000 | 27,000 | 38,000 |
| Opening stock (Kgs) | - | - | 11,000 |
| Closing stock (Kgs) | - | 11,000 | - |

Additional information:

1. The financial details for one unit of product "Zed", based on a normal activity level of 30,000 Kgs is as follows:

| | Cost per Kg (Sh.) |
|--|-------------------|
| Direct material | 1.50 |
| Direct labour | 1.00 |
| Production overheads (300% of labour) | <u>3.00</u> |
| Total cost | 5.50 |
| The calling union of much at 17 ad? is the O and | . 1 |

2. The selling price of product "Zcd" is Sh.9 per kg

3. Administrative overheads are fixed at Sh.25,000 per period whereas one third of production overheads are fixed.

Required:

Prepare operating statement using:

| (i) . | Variable costing. | (6 marks) |
|-------|---------------------|-----------|
| (ii) | Absorption costing. | (6 marks) |

CA25 Page 2 Out of 3

- (b) Summarise four assumptions of cost-volume profit (CVP) analysis.
- (c) Britkon Ltd. makes a single product branded "P" with a sales price of Sh.100 and a variable cost of Sh.60. Fixed costs are Sh.600,000 per annum.

- (i) Assuming the taxation rate is 40%, determine the number of units to be sold to make a profit after tax of Sh.200,000 per annum. (2 marks)
- As a result of increasing costs, the variable cost is expected to rise to Sh.65 per unit and fixed costs to Sh.700,000 per annum.

Assuming the selling price cannot be increased, determine the number of units required to maintain a profit of Sh.200,000 per annum.

(Ignore inflation).

QUESTION FOUR

- (a) Outline six benefits that might accrue to an organisation as a result of preparing budgets. (6 marks)
- (b) You are in charge of making forecasts and preparing budgets for Kondele Ltd. You have been supplied with the following cost and revenue forecast and details of payments:

Forecast for revenue and costs for half year 2022

| | January Sh."000" | February Sh."000" | March Sh."000" | April Sh."000" | May Sh."000" | June Sh."000" |
|---------------------------|---------------------|----------------------|-------------------|-------------------|-----------------|------------------|
| Direct material purchases | 112,000 | 100,000 | 135,000 | 90,000 | 67,000 | 79.000 |
| Wages | 90,000 | 80,000 | 100,000 | 72,000 | 54,000 | 63.000 |
| Overheads | | | | | | |
| Production | 34,000 | 32,000 | 40,000 | 45.000 | 36.000 | 40,000 |
| Administrative | 22,000 | 20,000 | 27,000 | 24,000 | 25,000 | 27,000 |
| Selling and distribution | 13,000 | 11,000 | 18,000 | 13.000 | 11,000 | 16,000 |
| Sales | 360,000 | 350,000 | 440,000 | 350,000 | 360,000 | 360.000 |

Additional information:

- 1. Cash balance on 1 April 2022 is expected to be Sh.90 million.
- 2. Period of credit allowed by suppliers averages two months.
- 3. Debentures worth Sh.125 million are expected to be issued in May 2022 and the amount will be received in the same month.
- 4. A new machine will be installed in March 2022 at a cost of Sh.150 million and payment is expected in May 2022.
- 5. Sales commission of 3% is payable after one month of sale.
- 6. A dividend of Sh.100 million is to be paid in June 2022.
- 7. There is a delay of one month in the payment of overheads and wages.
- 8. Twenty percent of the debtors pay cash, receiving a eash discount of 4% and seventy per cent of debtors pay within one month and receive 2.5% discount while the remaining debtors pay within two months without a discount.

Required:

| | A cash | budget on a monthly basis for the months of April 2022 to June 2022. (Tota | (14 marks) : 20 marks) |
|-----|--------|---|---------------------------|
| | TION F | | |
| (a) | Descri | be four factors that could influence a company's demand for management accounting information | (8 marks) |
| (b) | Highli | ght four purposes of standard costing. | (4 marks) |
| (c) | Descri | be two advantages and two disadvantages of using activity based costing (ABC). | (4 marks) |
| (d) | Explai | n the following terms: | |
| | (i) | Relevant cost. | (2 marks) |
| | (ii) | Sunk cost. | (2 marks) |
| | | (Tota | : 20 marks) |

PILOT PAPER

MANAGEMENT ACCOUNTING

December 2021.

Time Allowed: 3 hours.

Answer ALL questions. Marks allocated to each question are shown at the end of the question. Show ALL your workings.

QUESTION ONE

| (a) | Distinguish between a cost centre and a cost unit. | (4 marks) |
|-----|---|-----------|
| (b) | Explain the salient features of Economic Order Quantity approach. | (4 marks) |

(c) Sanitize Company Ltd. manufactures a product from raw materials which are purchased at Sh.54 per kg. The company incurs a handling cost of Sh.350 and transport cost of Sh.400 per order.

The carrying cost is Sh.0.50 per kg per month. The investment cost in the raw material is Sh.8. per kg. The annual production of the product is 94,500 units and each kilogramme of raw materials produces two (2) units of the final product.

Required:

| (i) | Calculate the economic order quantity. | (5 marks) |
|-------|--|---|
| (ii) | Advise how frequently orders should be placed for procurement. | (3 marks) |
| (iii) | If the procurement manager proposes to order on quarterly basis, what discont the company is not willing to incur extra costs. | ount should be negotiated if (4 marks) |

| (Total) | 20 | marks) |
|---------|----|---------|
| (10181. | 20 | mai ksj |

QUESTION TWO

(a) Explain the following terms:

| (i) | Material variances. | (3 marks) |
|-------|---------------------|-----------|
| (ii) | Labour variances. | (3 marks) |
| (iii) | Standard costing. | (2 marks) |

(b) To produce a litre of a product, 24 units of materials are required at a standard price of Sh.75 per litre. The actual production for the period is 75,000 units. Records proved that 80,000 units of materials were used at a price of Sh.73 per unit.

Required:

Calculate:

| (111) | Material usuge variance. | (Total: 20 marks) |
|-------|--------------------------|-------------------|
| (iii) | Material usage variance. | (4 marks) |
| (ii) | Material price variance. | (4 marks) |
| (i) | Material cost variance. | (4 marks) |

QUESTION THREE

(a) Countries have development blue prints while other organisations have strategic plans.

Citing challenges in achieving the objectives, explain why it is important for every organisation to have a long-term plan. (6 marks)

For Solutions/Answers WhatsApp: 0724 962 477

CA25 Page 1 Out of 3

- (b) Kasap Ltd. manufactures plastic bottles by mixing materials. The following information was obtained from their management accountant during the month of October 2021:
 - 1. Materials used were 12,000 kg at Sh.13 per kg.
 - 2. 12 employees worked 120 hours each at a rate of Sh.25 per hour.
 - 3. Fixed overheads were absorbed at a rate of 100% of direct labour cost.
 - 4. Actual output was 10,000 units.
 - 5. There was no opening or closing work in progress.
 - 6. The company expects a normal 10% of materials input. There is no waste or scrap in the process.

| (i) | Calculate the expected cost per unit. | (4 marks) |
|-------|---------------------------------------|------------------------|
| (ii) | Process account. | (3 marks) |
| (:::) | | $(2, \dots, 1, \dots)$ |

- (iii) If the normal loss is sold at Sh.10.00/kg what would be the revised cost of produced units. (3 marks)
- (c) Explain the various risks associated with stock and inventory management in manufacturing during the COVID-19 pandemic. (6 marks)

(Total: 20 marks)

WWW COOPLOVE

QUESTION FOUR

- (a) Explain the advantages of linear regression analysis in cost estimation. (4 marks)
- (b) Kalu Ltd. produces masks for sale. The following information was provided for the last 8 months in masks production:

| Month | No. of masks (000) | Total cost (Sh."000") |
|-------|--------------------|-----------------------|
| 1 | 5 | 50 |
| 2 | 6 | 53 |
| 3 | 6.5 | 55 |
| 4 | 6.7 | 59 |
| 5 | 7 | 62 |
| 6 | 7.5 | 64 |
| 7 | 8 | 66 |
| 8 | 9 | 72 |

Required:

(c)

Formulate the cost estimation for the cost of producing 10,000 masks using:

| (i) | High low method. | (3 marks) |
|---------|----------------------------------|-----------|
| (ii) | Simple linear regression method. | (3 marks) |
| Highlig | ght features of process costing. | (2 marks) |

(d) Bibi Ltd. produces food which passes through two processes A and B then to finished products.

Normal loss is estimated at 590 for each process and 10% scrap which realises Sh.80.00 for process A and Sh.200.00 for process B per unit.

The following information is obtained

| | Α | В |
|----------------------------------|--------|--------|
| Materials (units) | 1,000 | 70 |
| Cost of materials per unit (Sh.) | 125 | 200 |
| Wages (Sh.) | 28,000 | 10,000 |
| Other direct expenses (Sh.) | 8,000 | 5,250 |
| Output in units | 830 | 780 |

Required:

Process accounts for the two processes assuming there was no stock or work in progress in the two processes.

(8 marks)

QUESTION FIVE

(a) Short Ltd. maintains separate cost and financial ledgers. The accountant has provided the following information from the trial balance.

Cost ledger opening trial balance:

| | Sh. | Sh. |
|----------------------------------|---------|---------|
| Financial ledger control account | | 250,000 |
| Work in progress control account | 120,000 | |
| Finished goods control account | 110,000 | |
| Stores ledger control account | 20,000 | |
| - | 250,000 | 250,000 |

Additional information:

- 1. Total sales during the period amounted to Sh.430,000.
- 2. Total purchases and other handling costs amounted to Sh.280,000.
- 3. The work in progress and stores ledger had the same values at the closing of the period.
- 4. The closing financial ledger balance was Sh.245,000.

Required:

| (i) | Profit for the period. | (5 marks) |
|------|---------------------------------------|-----------|
| (ii) | Closing trial balance for the period. | (5 marks) |

(b) The management of Kalu Ltd. has produced the following projections for the year 2022:

| | | Sh. | | |
|---------------|--|-----------------|------------|--------------------------------|
| Selling | price per unit | 200 | | |
| Variabl | e cost per unit | 120 | | |
| Fixed c | osts | 4,000,000 | O . | |
| Numbe | r of units produced and sold | 70,000 | N. | |
| | onal information: nagement is considering the follo | wing options: | | |
| 1. | Reducing selling price by 10% | o increase sale | s by 15%. | |
| 2. | Reducing selling price by 20% | o increase sale | s by 20%. | |
| Requir (i) | | | • | (2 marks) |
| (ii) | The best option from the analys | is. | | (8 marks) (Total: 20 marks) |

CPA INTERMEDIATE LEVEL

MANAGEMENT ACCOUNTING

THURSDAY: 4 August 2022. Morning paper.

Time Allowed: 3 hours.

Answer ALL questions. Marks allocated to each question are shown at the end of the question. Show ALL your workings. Do NOT write anything on this paper.

QUESTION ONE

Explain the following terms as used in inventory management system: (a)

| (i) | Perpetual inventory system. | (2 marks) |
|------|-----------------------------|-----------|
| (ii) | Periodic inventory system. | (2 marks) |

- (b) The following information relates to store receipts and issue of material R in a small manufacturing enterprise for the month of April 2022:
 - Opening inventory 4,000 units at Sh100 per unit. April: 1
 - 4 Issued 3,000 units.
 - 5 Purchased 9,000 units at Sh.120 per unit.
 - 9 Issued 3,200 units.
 - 12 Returned to stores 2,000 units (from the issue of 4 April 2022).
 - Purchased 4,800 units at Sh.130 per unit. 15
 - Returned to supplier 400 units out of the quantity received on 5 April 2022. 18
 - Purchased 2,000 units at Sh.140 each. 25
 - 28 Issued 4.200 units.
 - 29 Purchased 2,400 units at Sh.150 per unit.
 - 30 Issued 5,600 units.

It is the company's policy to use the weighted average method when valuing the materials issued.

Required:

Store ledger account for the month of April 2022.

(c) Turkwes Ltd. manufactures men suits for local market. Jobs are allocated to two operators; Njogu and Mabili with bonus paid for hours saved.

In the month of July 2022, Njogu made 100 units while Mabili made 105 units for which the time allowed of 60 standard minutes and 50 standard minutes per unit respectively was credited.

Additional information:

- 1. The basic wage rate was Sh.360 per hour for both employees.
- 2. For every hour saved, a bonus was paid at the rate of 25% of the basic wage rate.
- 3. Hours worked in excess were paid at the basic wage rate plus two thirds.
- 4. Njogu completed his job in 88 hours while Mabili completed his job in 78 hours.
- 5. A basic working week has 80 hours.

Required:

For each operator, determine:

- (i) Amount of bonus payable. (2 marks)
- (ii) Total gross wage payable.
- (iii) Wage cost per unit.

(2 marks) (Total: 20 marks)

(10 marks)

QUESTION TWO

- (a) Distinguish between "flexible budget" and "activity based costing" as used in management accounting. (4 marks)
- (b) Betacare Enterprise produces several products which pass through two production departments in its factory. These two departments are concerned with filling and sealing operations. There are two service departments; canteen and boiler house in the factory.

Additional information:

- 1. Predetermined overheard absorptions rate, based on direct labour hours are established for the two production departments.
- 2. The budgeted expenditure for these two departments for the period just ended, including the appointments of service department overheads was as follows:
 - Filling centre Sh.110,040
 - Sealing centre Sh.53,300
- 3. Budgeted direct labour hours were 13,100 hours for filling cost centre and 10,250 hours for sealing cost centre.
- 4. Service department overheads are apportioned as follows:

| 1 | | Canteen | Boiler house |
|------------------------|----------------|------------|---------------------|
| | | % | % |
| Production department: | Filling centre | 40 | 50 |
| | Sealing centre | 50 | 30 |
| | | Canteen | Boiler house |
| | | % | % |
| Service department: | Canteen | - | 20 |
| | Boiler house | 10 | |
| Total | | <u>100</u> | <u>100</u> |

5. During the period just ended, actual overhead costs and activity were as follows:

| | Sh. | Direct labour hours |
|----------------|--------|---------------------|
| Filling centre | 74,260 | 12,820 |
| Sealing centre | 38,115 | 10,075 |
| Canteen | 25,050 | |
| Boiler House | 24,375 | |

Required:

Reapportion and calculate the overheads absorption rates in each production cost centre using:

| (i) S | Stepwise technique. | | (7 marks) |
|-------|---------------------|--|-----------|
|-------|---------------------|--|-----------|

- (ii) Simultaneous technique. (7 marks)
- (iii) Compute over or under absorption of overheads under (b) (ii) above for filling and sealing production departments. (2 marks)

(Total: 20 marks)

QUESTION THREE

(a) Discuss six benefits that would accrue to a firm that uses break-even charts in making managerial decisions in its operations. (6 marks)

NIE Social Academy conducts an entrance test for every new student whereby a final selection of 100 students is made. The entrance test consists of four key areas and is spread over four days, one examination per day. Being a community based institution, each student is charged a fee of Sh.500 for taking up the test. The following data relates to the two months in the previous holiday:

Statement of net revenue from the entrance tests

| | April | May |
|--|---------------|----------------|
| | Sh. | Sh. |
| Gross revenue (fees collected) | 100,000 | 150,000 |
| Costs: | | |
| Evaluation | 40,000 | 60,000 |
| Question booklets | 20,000 | 30,000 |
| Hire of hall at Sh.2,000 per day | 8,000 | 8,000 |
| Honoraria to chief invigilator | 6,000 | 6,000 |
| Supervision charges (on supervision of every 100 | | |
| candidates at the rate of Sh.500 per day) | 4,000 | 6,000 |
| General administrative expenses | 6,000 | 6,000 |
| Total cost | <u>84,000</u> | <u>116,000</u> |
| Net Revenue | <u>16,000</u> | 34,000 |

| (i) | Budgeted net revenue for 4,000 students. | (8 marks) |
|-------|---|-----------|
| (ii) | Break-even number of candidates. | (4 marks) |
| (iii) | Number of candidates to be enrolled if the net income desired is Sh.200,000 in the following month. | (2 marks) |

QUESTION FOUR

| (a) | (i) | Explain the term "industrial engineering technique" as used in cost estimation. | (2 marks) |
|-----|------|---|-----------|
| | (ii) | Highlight three advantages of the industrial engineering technique. | (3 marks) |

(b) Zigzag Line Coaches Ltd. operates a fleet of executive coaches across the country.

The following information is provided:

| | 30 seater coaches | 50 seater coaches |
|---------------------------------------|--------------------------|-------------------|
| Number of coaches | 5 | 10 |
| Number of drivers | 5 | 10 |
| Weekly wage cost per driver | Sh.12,000 | Sh.12,500 |
| Cost of each coach | Sh.6,000,000 | Sh.9,200,000 |
| Fuel consumption-kilometres per litre | 12.5 | 8.0 |
| Annual licence per coach | Sh.35,000 | Sh.50,000 |
| Annual insurance per coach | Sh.34,000 | Sh.40,000 |

Additional information:

- 1. Annual repairs and maintenance were budgeted at Sh.6,500,000 and are to be apportioned between the coaches in the ratio of their total mileage in kilometres covered.
- 2. Administrative expenses are budgeted at Sh.9,620,000 annually and are to be apportioned to each coach in the ratio of driver's wage costs.
- 3. Each 30 seater coach is kept for 6 years at which it will have a resale value of Sh.2,400,000 while every 50 seater coach will be replaced after 7 years and have a resale value of Sh.2,900,000.
- 4. It is the policy of the company to depreciate the coaches on a straight line basis. Depreciation expense is charged annually.
- 5. It is envisaged that each 30 seater coach will travel 1,000 kilometres per week and each 50 seater coach will travel 800 kilometres per week.
- 6. The cost of the fuel is budgeted at Sh.120 per litre.
- 7. It is budgeted that each coach will be in operation for 50 weeks per year and the drivers will be paid for 52 weeks.

Required:

Cost per kilometer per passenger for:

| (i) | 30 seater coach. | (8 marks) |
|------|------------------|--------------------------------|
| (ii) | 50 seater coach. | (7 marks) (Total: 20 marks) |

QUESTION FIVE

- (a) Describe four uses of management accounting information to a business entity.
- (b) The following information relates to actual output costs and variances for the month of May 2022 for a single product branded "T" manufactured by KK Ltd.:

| Actual production | 36,000 units |
|--|----------------------|
| Actual cost incurred: | Sh. |
| Direct material (300,000 kgs) | 8,400,000 |
| Direct labour (64,000 hours) | 5,440,000 |
| Variable production overheads | 1,520,000 |
| Variances | |
| Direct materials price | 300,000 (Favourable) |
| Direct materials usage | 180,000 (Adverse) |
| Direct labour rate | 160,000 (Adverse) |
| Direct labour efficiency | 320,000 (Favourable) |
| Variable production overhead expenditure | 120,000 (Adverse) |
| Variable production overhead efficiency | 80,000 (Favourable) |

(8 marks)

(Total: 20 marks)

Additional information:

- 1. There was no opening or closing work-in-progress during the period.
- 2. Variable production overhead varies with labour hours worked.
- 3. The company operates the standard marginal costing system.

Required:

Standard cost card for product "T" for the month of May 2022.

(12 marks) (Total: 20 marks)

.....

CPA PART I SECTION 2

MANAGEMENT ACCOUNTING

WEDNESDAY: 19 May 2021.

Time Allowed: 3 hours.

Answer ALL questions. Marks allocated to each question are shown at the end of the question. Show ALL your workings.

QUESTION ONE

(a) Explain the following terms as used in management accounting:

| (i) | Opportunity cost. | (1 mark) |
|-------|---------------------|----------|
| (ii) | Notional cost. | (1 mark) |
| (iii) | Discretionary cost. | (1 mark) |
| (iv) | Incremental cost. | (1 mark) |

(b) Kedren Ltd. manufactures a single product. During the period from January 2021 to March 2021, the following data was recorded:

| Month | Output | Cost |
|----------|---------|---------|
| | (Units) | (Sh.) |
| January | 8,240 | 167,590 |
| February | 8,750 | 173,260 |
| March | 8,100 | 165,772 |

Required:

- (i) Using the high-low method, derive a predictor equation in the form of Y = a + bx for the company. (4 marks)
- (ii) Determine the total cost that would be incurred to produce 8,500 units of the product. (2 marks)

(c) Lengo Ltd. manufactures three products namely; A, B and C

The following data relates to the three products:

| | Product | | |
|---|----------|----------|----------|
| | A Sh. | B Sh. | C Sh. |
| Selling price per unit Production cost per unit: | 250 | 320 | 460 |
| Variable overheads | 16 | 20 | 28 |
| Installation labour | 24 | 32 | 44 |
| Manufacturing labour | 40 | 55 | 70 |
| Raw materials | 70 | 110 | 155 |

Additional information:

- 1. Highly skilled labour is required for installation of the three products in the customer's premises. A maximum of 25,000 hours of highly skilled labour are currently available at Sh.8 per hour during the production period.
- 2. Fixed costs for the production period are Sh.450,000.
- 3. The maximum demand for Products A, B and C is 2,000 units, 3,000 units and 1,800 units respectively.

CA22 Page 1 Out of 4

| (i) | The current shortfall in highly skilled labour at maximum demand. | (4 marks) |
|-------|---|--------------------------------|
| (ii) | The optimal production mix. | (4 marks) |
| (iii) | The resultant profit at the optimal production mix. | (2 marks) (Total: 20 marks) |

QUESTION TWO

(a) Mzalendo Ltd. operates a differential piece rate remuneration scheme for its casual labourers.

The following schedule is applied to determine employees' remuneration:

| Number of units | Wage rate per unit | |
|-----------------|--------------------|--|
| | Sh. | |
| 1 - 250 | 500 | |
| 251 - 500 | 550 | |
| 501 - 1,000 | 600 | |
| Over 1,000 | 650 | |

Rhoda Bidii completed 1,650 units during the month of January 2021.

Required:

Determine the wages payable to Rhoda Bidii for the month of January 2021.

(b) ZigZag Ltd. prepared the following budget for the first five months of the year 2020:

| Month | Sales budget (Units) |
|----------|----------------------|
| January | 10,800 |
| February | 15,600 |
| March | 12,200 |
| April | 10,400 |
| May | 9,800 |

Additional information:

- 1. Inventory of finished goods at the end of every month is to be equal to 25% of sales estimate for the next month.
- 2. On I January 2020, there were 2,700 units of the product on hand.
- 3. There is no work-in-progress at the end of any month.
- 4. The selling price per unit was estimated to be Sh.450 per unit.
- 5. Each unit of the product requires two types of materials in the following quantities:
 - Material A: 4 Kgs.
 - Material B: 5 Kgs.
- 6. The closing stock of materials is equal to half of the requirements of the next month's production.

Required:

For the months of February, March and April 2020, prepare:

| (i) | Sales budget. | (3 marks) |
|-------|----------------------------------|--------------------------------|
| (ii) | Production budget. | (6 marks) |
| (iii) | Materials usage budget in units. | (6 marks) (Total: 20 marks) |

QUESTION THREE

- (a) Describe the three main stages of the Activity Based Costing (ABC) system.
- (b) Bix Ltd. re-apportions the costs incurred in two service cost centres namely; materials handling and inspection to the three production cost centres of machining, finishing and assembly.

For Solutions/Answers WhatsApp: 0724 962 477

CA22 Page 2 Out of 4

(6 marks)

(5 marks)

The following are the overhead costs which have been allocated and apportioned to the five cost centres:

| | Sh. "Million" |
|--------------------|---------------|
| Machining | 400 |
| Finishing | 200 |
| Assembly | 100 |
| Materials handling | 100 |
| Inspection | 50 |

Estimates of the benefits received by each cost centre are as follows:

| | Machining | Finishing | Assembly | Materials Handling | Inspection |
|--------------------|-----------|-----------|----------|--------------------|------------|
| | (%) | (%) | (%) | (%) | (%) |
| Materials Handling | 30 | 25 | 35 | - | 10 |
| Inspection | 20 | 30 | 45 | 5 | - |

Required:

Calculate the charge for overhead to each of the three production cost centres, including the amounts reapportioned from the two service centres using:

| (i) | The continuous allotment (repeated distribution) method. | (7 marks) |
|--------------|--|--------------------------------|
| (ii) | The algebraic method. | (7 marks) (Total: 20 marks) |

QUESTION FOUR

The following information is available for Process II of Winam Fabrications Ltd. for the month of September 2020:

Opening stock: 4,800 units valued at Sh.165,000

| Degree of completion: | Materials | 70% |
|-----------------------|-----------|-----|
| | Labour | 60% |
| | Overheads | 60% |

Additional information:

- Transfer from Process I amounted to 30,600 units valued at Sh.306,000. 1.
- 2. Additional costs incurred in Process II include:

| | Sh. |
|------------------------|------------------|
| Direct materials | 134,400 |
| Direct labour | 394,200 |
| Production overheads | 525,600 |
| The units scranned amo | unted to 2 400 u |

| 3. | The units scrapped amounted to 2,400 units with the following degree of completion: | | |
|----|---|------|--|
| | Materials | 100% | |
| | Labour | 70% | |
| | Overheads | 70% | |
| 4. | The closing stock was 5,400 units with the following degree of completion: | | |

- Materials 60% Labour 40% Overheads 40%
- 5. Transfer to Process III amounted to 27,600 units.
- There was a normal loss of 10% of production in the process. 6.
- 7. The units scrapped were realised at Sh.10 per unit.

Required:

| (c) | Process II account using the First-in-First Out (FIFO) method. | (6 marks) (Total: 20 marks) |
|-----|--|--------------------------------|
| (b) | Cost of equivalent unit for each element of cost. | (6 marks) |
| (a) | Statement of equivalent production. | (8 marks) |

WWW. Clopicoke

QUESTION FIVE

(a) Jeremy Awuor established a fast food business one year ago and has achieved good sales but a small profit. In a recent business networking event, he was advised to consider employing a management accountant to enhance and improve his business.

Required:

- (i) Explain to Jeremy Awuor six changes in the business environment that could have contributed to the growth and importance of management accounting in the recent past. (6 marks)
- (ii) Describe four roles played by a management accountant that would enhance and improve Jeremy Awuor's business. (4 marks)
- (b) Highlight four advantages of maintaining integrated accounting systems in cost bookkeeping. (4 marks)
- (c) Explain three advantages and three disadvantages of implementing a Just-in-Time (JIT) system in an organisation. (Total: 20 marks)

.....

CPA PART I SECTION 2

MANAGEMENT ACCOUNTING

WEDNESDAY: 28 November 2018.

Time Allowed: 3 hours.

Answer ALL questions. Marks allocated to each question are shown at the end of the question. Show ALL your workings.

QUESTION ONE

(a) "A budgetary control system could prove successful only when certain conditions and essentials exist".

With reference to the above statement, highlight six conditions and essentials for an effective budgetary system.

(6 marks)

WWW. CHOP.CO.KE

(b) Nduro Ltd. has two production departments; MM and NN and two service departments; PP and QQ. For the month of August 2018, the budgeted hours and costs were as follows:

| Department | Hours | Cost (Sh.) |
|------------|-------|------------|
| MM | 1,800 | 45,000 |
| NN | 5,400 | . 54,000 |

Additional information:

1. The service department costs are apportioned to the production departments as follows:

| | Department | | | |
|----|------------|-----|-----|-----|
| | MM | NN | PP | QQ |
| PP | 50% | 20% | - | 30% |
| QQ | 40% | 40% | 20% | - |

2. The overheads of the production departments are absorbed into product cost using a rate per hour.

3. During the month of August 2018, the actual activity levels and costs were as follows:

| Department | Hours | Costs (Sh.) |
|------------|-------|-------------|
| MM | 1,980 | 43,200 |
| NN | 6,120 | 52,200 |
| PP | | 10,800 |
| QQ | | 7,200 |

Required:

(i) The overheads to be charged to the production departments.

(ii) The amount of under or over absorption in each production department.

QUESTION TWO

- (a) Explain four assumptions of break-even analysis.
- (b) Kuni Limited are distributors of two cooking gas cylinders; "Meko" and "13C". "Meko" weighs 6 kgs while "13C" weighs 13 kgs.

CA22 Page 1 Out of 4

(6 marks) (Total: 20 marks)

(8 marks)

(8 marks)

The following information relates to the company's projection for the year ending 30 June 2019:

| Product "Meko" | Sh."000" |
|---|---|
| Sales (43,800 units) | 49,056 |
| Fixed costs | (9,811.2) |
| Variable costs | <u>(29,433.6)</u> |
| Operating profit | <u>2,811.2</u> |
| Product "13C" Sales (71,175 units) Fixed costs Variable costs Operating profit | 142,350 (79,716) (42,705) 19,929 |

Required:

- (i) Determine the break-even point of "meko" and "13C" in both units and shillings. (6 marks)
- (ii) Given that customers refill "meko" three times for every two times they refill "13C", compute the composite unit contribution margin. (4 marks)
- (iii) Determine the break-even sales in shillings assuming that "meko" and "13C" are normally purchased in the ratio of one to one.
 (2 marks)
 (Total: 20 marks)

QUESTION THREE

(a) Kiz Ltd. manufactures a single product branded "zuri" whose standard cost card is given below:

| | | Sh. |
|------------------------|--------------------------------------|------------|
| Selling price per unit | | <u>100</u> |
| Direct materials | 7 kilogrammes at Sh.2 per kilogramme | 14 |
| Direct labour | 2 hours at Sh.8 per hour - | 16 |
| Fixed overheads | 2 hours at Sh.16 per hour | <u>32</u> |
| Total cost | | 62 |

Additional information:

1. As at 1 October 2018, the opening balances for the cost ledgers were as follows:

| | Sh. |
|------------------|---------|
| Direct materials | 15,000 |
| Work-in-progress | 120,000 |
| Finished goods | 72,000 |

2. The following transactions took place during the month of October 2018:

| | Sh. |
|---|---------|
| Direct material purchases | 89,000 |
| Materials issued to production | 90,000 |
| Direct labour paid | 102,000 |
| Indirect labour paid | 56,000 |
| Production overhead cost incurred | 159,000 |
| Sales (6,500 units) | 650,000 |
| Goods transferred to finished goods stock | 385,000 |

3. As at 31 October 2018, closing stock balances were as follows:

| | Sh. |
|------------------|---------|
| Direct materials | 14,000 |
| Work-in-progress | 135,000 |
| Finished goods | 54,000 |

| (e) | A statement showing profit or loss. | (4 marks) (Total: 20 marks) |
|-----|---------------------------------------|--------------------------------|
| (d) | Production overheads control account. | (4 marks) |
| (c) | Finished goods control account. | (4 marks) |
| (b) | Work-in-progress control account. | (5 marks) |
| (a) | Direct materials control account. | (3 marks) |

QUESTION FOUR

(a) Englech Ltd. manufactures castings which are transferred to the machine shop of the same company at standard prices.

A standard costing system is applied. Basic standards in regard to materials stock are as follows:

| 1. | Standard mixture | 70% Ingredient Y 30% Ingredient X |
|----|------------------|--------------------------------------|
| 2 | Standard prices | Ingredient X Sh 480 per ka |

| 4. | Standard prices | ingredient A Sh.480 per kg. |
|----|-----------------|-----------------------------|
| | | Ingredient Y Sh.130 per kg. |

3. Opening and closing stock of ingredients X and Y for the month of October 2018 are as follows:

| Opening stock | Ingredient Ingredient | X 100 kgs Y 60 kgs |
|---------------|--------------------------|-----------------------|
| Closing stock | Ingredient Ingredient | X 110 kgs Y 50 kgs |

4. Total purchases for ingredients X and Y are as follows: Ingredient X 300 kgs at Sh.146,500 Ingredient Y 100 kgs at Sh.12,500

5. The mixtures melted amounted to 400 kgs while castings produced were 375 kgs.

6. Standard loss is 10% of input.

Required:

| (i) | Material price variances. | (4 marks) |
|-------|---------------------------|-----------|
| (ii) | Material mix variances. | (4 marks) |
| (iii) | Material yield variances. | (4 marks) |

(b) The following information was obtained from the books of Brickmast Ltd., a company making bricks for sale to contractors in the construction industry:

| 1. | Materials : N | М | 1,800 tonnes at Sh.40 per ton. |
|----|---------------|---|--------------------------------|
| | 1 | N | Sh.45,640 |
| | | | |

- 2. Labour : Direct Sh.25,560 Indirect Sh.8,640
- 3. Overheads: Works 25% of direct costs Office 20% of prime cost and works overhead cost
- 4. Sales Sh.7,400,000. Sales per brick amount to Sh.400.
- 5. Royalties are paid at the rate of Sh.0.5 per 1,000 bricks.
- 6. The production is in batches of 1,000 bricks.

7. Stock of finished bricks: Opening 800,000 Closing 600,000 www.dopi.co.ke

(i) Batch cost statement.

(ii) Profit per 1,000 bricks.

(2 marks) (Total: 20 marks)

QUESTION FIVE

t

| (a) | Evalı | ate four benefits that might accrue to an organisation from using computers in cost and man | agement accounting. (4 marks) |
|-----|-------|---|------------------------------------|
| (b) | Sumr | narise four functions of a budget committee. | (4 marks) |

CPA PART I SECTION 2

MANAGEMENT ACCOUNTING

WEDNESDAY: 23 May 2018.

Answer ALL questions. Marks allocated to each question are shown at the end of the question. Show ALL your workings.

QUESTION ONE

- (a) Describe four limitations of management accounting.
- (b) XYZ Ltd. manufactures a component branded "zed" at the rate of 4,000 units per week. Demand for the component is 2,000 units per week while the production set up cost is Sh.50 per batch. The accountant has provided the holding cost per unit per annum as Sh.0.001.

Assume a 50-week year.

Required:

- (i) Economic Batch Quantity (EBQ) for the company.
- (ii) Determine the relevant costs for the EBQ in (b) (i) above.
- (c) Louise Njambi has taken a lease on a stall from the county government at a down payment of Sh.50,000. The annual rental payment amounts to Sh.50,000. If the lease is cancelled, the initial payment of Sh.50,000 is forfeited. Louise plans to use the stall in selling women's clothes and the estimated operation costs for the next 12 months are as follows:

| | Sh. | Sh. |
|--|---------|-----------|
| Sales | | 1,150,000 |
| Value added tax (VAT) | | (150,000) |
| Net sales | | 1,000,000 |
| Cost of goods sold | 500,000 | |
| Wages and casual labour | 120,000 | |
| Rent including the down payment | 100,000 | |
| Rates, heating, lighting and insurance | 130,000 | |
| General expenses | 20,000 | (870,000) |
| Net profit | | 130,000 |

Additional information:

- 1. No provision has been made for Louise Njambi's salary but it is estimated that half of her time will be devoted to the business.
- 2. She has an option of subletting the stall to a friend at a monthly rent of Sh.5,500 if she does not use the stall herself.

Required:

(i) Explain using relevant examples from the situation depicted above; sunk costs and opportunity costs.

(4 marks)

(ii) Using a cost analysis statement, advise Louise Njambi on whether to use the stall herself or sublet it.

(6 marks) (Total: 20 marks)

QUESTION TWO

(a) Classification of cost based on function involves classifying costs on the basis of the purpose for which costs are incurred.

With reference to the above statement, explain three types of costs classified by function.

(6 marks)

CA22 Page 1 Out of 4

0

(4 marks)

Time Allowed: 3 hours.

(3 marks)

(3 marks)

(b) The administrator of Chebatok Hills Hospital would like to establish a cost formula linking the administrative costs involved in admitting patients to the number of patients admitted during the month. The admissions department's costs and the number of patients admitted during the last eight months for the year 2017 are given below:

| Month | Number of patients admitted | Admission department's Cost "Sh." |
|-----------|--------------------------------|--------------------------------------|
| May | 1,800 | 14,700 |
| June | 1,900 | 15,200 |
| July | 1,700 | 13,700 |
| August | 1,600 | 14,000 |
| September | 1,500 | 14,300 |
| October | 1,300 | 13,100 |
| November | 1,100 | 12,800 |
| December | 1,500 | 14,600 |

Required:

- (i) Using the high-low method, estimate the fixed and variable components of admission costs. (4 marks)
- (ii) Using the least squares method, estimate the relationship between number of patients admitted and the admission costs in the form of Y = a + bx. (8 marks)
- (iii) Using the relationship obtained in (b) (ii) above, estimate the admission costs incurred in January 2018 if admission was 2,000 patients. (2 marks)

(Total: 20 marks)

QUESTION THREE

(a) Savanah Company is highly automated and uses computers to control manufacturing operations. The company uses job order costing system and applies manufacturing overhead costs to products on the basis of computer hours.

The following estimates were used in preparing predetermined overhead rates at the beginning of the financial year ended 31 March 2018.

| | 85,000 Sh.1,275.000 Sh.3.0 in cutting back production and a buildup of inventory in the sclosed the following actual costs and operating data for the |
|----------------|---|
| Computer hours | 60,000 |
| | Sh |

| | Sh. |
|------------------------------|-----------|
| Manufacturing overhead costs | 1,350,000 |
| Cost of goods sold | 2,800,000 |
| Inventories at the year-end: | |
| Raw materials | 400,000 |
| Work-in-progress | 160,000 |
| Finished goods | 1,040,000 |

Required:

| (i) | Compute the compan | y's predetermined | d overhead absorption rate fo | r the year. | (3 marks) |
|-----|--------------------|-------------------|-------------------------------|-------------|-----------|
| | | | | | |

- (ii) Compute under-applied or over-applied overhead cost for the year.
- (iii) It is the policy of the company to allocate any under or over-applied overheads to cost of goods sold.

Determine the cost of goods sold to be charged to the income statement.

(3 marks)

(4 marks)

(b) Better Designs Ltd. manufactures a single product using a single grade of labour. Its sales budget and finished goods inventory budget for the third quarter of the year 2018 are as follows:

| | Units |
|------------------------------------|-------|
| Sales | 7,000 |
| Opening inventories finished goods | 500 |
| Closing inventories finished goods | 700 |

For Solutions/Answers WhatsApp: 0724 962 477

CA22 Page 2 Out of 4

Additional information:

- The goods are inspected only when production work is completed and it is budgeted that 10% of finished 1. work will be scrapped.
- 2. Standard direct labour hours per unit is 3.
- 3. The budgeted productivity ratio for the direct labour is only 80% (which means that labour is working at 80% efficiency).
- 4. The company employs 18 direct employees who are expected to average 1,440 working hours each for the quarter.

Required:

| (ii) | Direct labour budget. | (4 marks) |
|-------|---|-------------------|
| (iii) | Calculate the shortfall in direct labour hours. | (2 marks) |
| | | (Total: 20 marks) |

QUESTION FOUR

Summarise four advantages of value chain analysis in cost management. (a) (8 marks)

(b) Karibu Cottages Ltd. operates three types of suites for its customers namely; Standard, Deluxe and Luxury.

The following information is provided:

1. The number of suites of each type are:

| Standard | 100 |
|----------|-----|
| Deluxe | 30 |
| Luxury | 20 |

WWW. Chopicolte The rent of Deluxe suite is to be fixed as 11/2 times the standard suite and that of Luxury as twice the standard 2. suite.

| 3. | The occupancy | level | for each | suite | is as | follows: |
|----|---------------|-------|----------|-------|-------|----------|
| | | | | | | |

Furniture and fixtures

Air conditioners

| | Peak season | Off peak season |
|-----------------|-------------|-----------------|
| Standard suites | 90% | 50% |
| Deluxe suites | 80% | 20% |
| Luxury suites | 60% | 20% |

4. The expenses are as follows:

Room attendant wages per day when occupied:

| Suite | Peak season | Off peak season | | |
|----------|-------------|-----------------|--|--|
| | Sh. | Sh. | | |
| Standard | 20 | 30 | | |
| Deluxe | 30 | 45 | | |
| Luxury | 40 | 60 | | |

Lighting, heating and power for full month, when occupied is as follows: 0

| | Suite | Lighting (Sh.) | Power (Sh.) | |
|---|----------------|-----------------------|-------------------------------------|------|
| | Standard | 400 | 200 | |
| | Deluxe | 600 | 300 | |
| | Luxury | 800 | 400 | |
| 0 | Other costs (| (annual): | Sh. | |
| | Staff salaries | | 2,200,000 | |
| | Repairs and r | enovations | 420,000 | |
| | Linen and lau | ındry | 450,000 | |
| | Interior decor | rations | 500,000 | |
| | Sundries | | 315,500 | |
| 0 | Annual depre | ciation is charged or | n a straight line basis as follows: | |
| | Asset | | Cost of asset (Sh.) | Rate |
| | Building | | 14,000,000 | |

1,000,000

2,000,000

e per annum (%) 5

> 10 10

> > CA22 Page 3 Out of 4

- 5. Peak season is assumed to be 7 months and off-peak season 5 months in a year. One month is taken to have 30 days.
- 6. Profit including interest on investment is 25% on cost.

Advise on the amount of rent to be charged for each type of suite per day.

QUESTION FIVE

(12 marks) (Total: 20 marks)

(4 marks)

- (a) Distinguish between "interlocking accounting systems" and "integrated accounting systems" as used in cost bookkeeping. (4 marks)
- (b) Highlight two advantages of marginal costing.
- (c) The standard cost card for production of a component "Wye" is as follows:

| Materials | l kg at Sh.4 per kg per unit |
|--------------------|---------------------------------------|
| Labour | 25 hours (100 units) at Sh.8 per hour |
| Variable overheads | Sh.48,000 for budget period |
| Fixed overheads | Sh.120,000 for budget period |
| Output | 24,000 units |

Details for a production of 2,000 units are as follows:

| Materials issued Actual production | 2,000 kgs at Sh.3.50 per kg 1,800 units |
|---------------------------------------|--|
| Actual wages | 480 hours at Sh.8.50 per hour |
| Actual variable overheads | Sh.4,000 |
| Actual fixed overheads | Sh.10,600 |
| Required: | |

| | ••••••••••••••••••••••••••••••••••••••• | |
|-------------------|---|-------------------|
| | | (Total: 20 marks) |
| (iv) | Fixed overheads volume variance. | (3 marks) |
| (iii) | Variable overheads efficiency variance. | (3 marks) |
| (ii) [·] | Labour rate variance. | (3 marks) |
| (i) | Materials usage variance. | (3 marks) |

MANAGEMENT ACCOUNTING

WEDNESDAY: 29 November 2017.

Time Allowed: 3 hours.

www.dopico.ke

Answer ALL questions. Marks allocated to each question are shown at the end of the question. Show ALL your workings.

QUESTION ONE

| (a) | Explain four purposes of cost accounting. | (8 marks) |
|-----|---|-----------|
| | | |

(b) Mazuri Ltd., a manufacturing company, has three production departments and two service departments. Overheads for the departments for a specific period were as follows:

| Production departments | Sh. "000" |
|------------------------|--------------|
| Production departments | |
| х | 2,500 |
| Y | 2.000 |
| Z | 1,500 |
| Service departments | |
| А | 1,000 |
| В | 780 |
| Total | <u>7,780</u> |

Additional information:

1. A technical assessment for the apportionment of the service department costs were as follows:

| Department | X | Y | Z | Α | В |
|------------|-----|-----|-----|-----|-----|
| Α | 30% | 30% | 20% | - | 20% |
| В | 40% | 30% | 20% | 10% | - |

2. Output for the production departments during the period are provided below:

| Department | Units of outputs |
|------------|------------------|
| Х | 200,000 |
| Y | 100,000 |
| Z | 50,000 |

Required:

The total overheads chargeable to the production departments using:

| (i) | Continuous allotment method. | (6 marks) |
|-------|---|--------------------------------|
| (ii) | Simultaneous equation method. | (4 marks) |
| (iii) | Overhead cost per unit for each department. | (2 marks) (Total: 20 marks) |

CA22 Page 1 Out of 4

QUESTION TWO

(a) XYZ Ltd. manufactures a product branded "Zed". The company has a production capacity of 1,000 units of Zed per day.

The following information relates to one unit of the product:

| | Sh. |
|--------------------|-----|
| Materials | 120 |
| Labour | 40 |
| Variable overheads | 40 |
| Fixed overheads | 100 |
| Selling price | 400 |

Required:

- (i) Calculate the Break-Even-Point (BEP) of sales at the current selling price for 1,000 units. (3 marks)
- (ii) The marketing manager intends to reduce the selling price by either 10% or 20% for the 1,000 units without affecting the total profit.
 - Advise the marketing manager on the required sales volumes under the two options. (8 marks)
- (b) BRK Ltd. orders a raw material graded "Exe" for its manufacturing purpose. The following information is available from the production manager:

| Annual consumption of Exe (units) | 200,000 |
|-----------------------------------|---------|
| Ordering cost per order (Sh.) | 18,750 |
| Carrying cost per unit (Sh.) | 3 |

Required:

- (i) The Economic Order Quantity (EOQ) for material "Exe". (2 marks)
 (ii) The number of orders to be placed per year. (1 mark)
- (iii) The production manager has proposed to increase the current Economic Order Quantity (EOQ) to 100,000 units. Justify how this would increase the total cost of inventory thus not profitable. (6 marks)
 (Total: 20 marks)

QUESTION THREE

(a) Mitambani Manufacturers Ltd. are in the initial process of adopting a Just-in-Time (JIT) inventory control system:

Required:

- (i) Highlight four objectives of a JIT inventory control system. (4 marks)
- (ii) Describe four benefits that would accrue to the company from using JIT inventory control system. (4 marks)
- (b) Summarise three limitations of accounts analysis as a method of cost estimation.
- (c) Jundi Ltd. maintains separate cost and financial ledgers. The Accountant has provided the following opening trial balance in the cost ledger:

| | Cost ledger opening trial balance | |
|--|-----------------------------------|---------|
| | Sh. | Sh. |
| Financial ledger control account | | 249,520 |
| Work-In-Progress (WIP) control account | 125,210 | |
| Finished goods control account | 85,150 | |
| Stores ledger control account | _39,160 | |
| | 249,520 | 249,520 |

Additional information:

- 1. During the period, total sales amounted to Sh.375,290.
- 2. Total purchases, wages and overheads amounted to Sh.292,860.
- 3. At the end of the period, the stores ledger and Work-In-Progress (WIP) control accounts had the same values as in the opening trial balance above.
- 4. The closing balance on the financial ledger control account was Sh.212,420.

| Required: | | |
|-----------|---------------------------------------|--------------------------------|
| (i) | The profit for the period. | (5 marks) |
| (ii) | Closing trial balance for the period. | (4 marks) (Total: 20 marks) |

QUESTION FOUR

Income statement extracts:

- (a) In the context of management accounting, distinguish between "discrete costs" and "imputed costs". (4 marks)
- (b) The following information was extracted from the financial statements of ABC Ltd. and XYZ Ltd. in respect of the year ended 31 December 2016:

| | ABC Ltd. Sh. "000" | XYZ Ltd. Sh. "000" |
|-------------------------------------|-----------------------|-----------------------|
| Sales | 497,000 | 371,000 |
| Cost of sales | <u>(357,840)</u> | (296,800) |
| Gross profit | 139,160 | 74,200 |
| Operating expenses | (70,460) | (44,520) |
| Interest | (19,000) | |
| Net profit | 49,700 | _29,680 |
| Statement of financial position ext | tracts: | |
| | ABC Ltd. | XYZ Ltd. |
| | Sh. "000" | Sh. "000" |
| Non-current assets | 142,000 | 92,000 |
| Current assets: | | |
| Inventory | 100,000 | 87,000 |
| Accounts receivable | 46,000 | 42,000 |
| Cash at bank | 40,000 | 44,000 |
| Current liabilities | 98,000 | 108,000 |
| Long-term loans | 33,000 | - |
| Shareholder funds | 197,000 | 157,000 |

Required:

Assuming a 365 day year, evaluate the performance of the two firms using the following financial performance measures:

| (i) | Profitability. | (4 marks) |
|-------|----------------|-------------------------------|
| (ii) | Liquidity. | (4 marks) |
| (iii) | Activity. | (4 marks) |
| (iv) | Gearing. | (4 marks) Fotal: 20 marks) |
| | | |

QUESTION FIVE

(a) Megspa Ltd. manufactures a single product branded "Wye".

The following data relates to its operations for the month of October 2017:

| Sales Production | Budget Units 60,000 60,000 | Actual Units 58,000 60,000 |
|---------------------|-------------------------------------|-------------------------------------|
| | Sh. | Sh. |
| Sales | 840,000 | 823,600 |
| Direct materials | 240,000 | 246,000 |
| Direct labour | 300,000 | 288,000 |
| Fixed overheads | 135,000 | 140,000 |
| Net income | 165,000 | 149,600 |

Required:

A flexed budget for the month of October 2017 for the actual sales of 58,000 units.

(6 marks) CA22 Page 3 Out of 4

www.chopi.co.ke

(b) Tegemeo Ltd. manufactures a product which yields three joint products namely; H, N and T. The joint products are then processed further in a common process which consists of two consecutive stages.

The data below relate to the month of August 2017:

| | Process 1 | Process 2 |
|---|-----------|-----------|
| | Sh. | Sh. |
| Direct materials (30,000 units at Sh.20 per unit) | 600,000 | - |
| Conversion costs | 765,000 | 2,262,000 |
| Scrap value of normal loss per unit | 5 | 20 |

Additional information:

- 1. The output in Process 1 is transferred to Process 2 and amounted to 26,000 units.
- 2. The output in Process 2 consists of three joint products as follows:

| Product | H N | | Т | |
|------------------|--------|-------|-------|--|
| Quantity (units) | 10,000 | 7,000 | 6,000 | |

3. The normal loss for both Process 1 and Process 2 is 10%.

- 4. The unit selling prices for H, N and T are Sh.180, Sh.200 and Sh.300 respectively.
- 5. All joint products are sold as soon as they are produced.
- 6. Sales value method of joint costs apportionment is used.

Required:

| (i) | Process 1 account. | (4 marks) |
|-------|--|--------------------------------|
| (ii) | Process 2 account. | (6 marks) |
| (iii) | Income statement for the joint products. | (4 marks) (Total: 20 marks) |
| | | |

MANAGEMENT ACCOUNTING

WEDNESDAY: 24 May 2017.

Answer ALL questions. Marks allocated to each question are shown at the end of the question. Show ALL your workings.

QUESTION ONE

- Explain four challenges that could be encountered when installing a cost accounting system. (a) (4 marks)
- Evaluate three benefits of the balanced scorecard. (b)
- (c) Baraka Ltd. manufactures a single product which is meant for the local market only. The monthly demand for the product varies from one month to the other.

During the month of April 2017, 500 units were produced incurring the following expenses:

| | Sh. |
|---|---------|
| Direct materials | 70,000 |
| Direct labour | 60,000 |
| Rent (Fixed) | 35,000 |
| Electricity (30% Fixed) | 25,000 |
| Property taxes and rates (70% variable) | 60,000 |
| Technical support (Fixed) | 35,000 |
| | 285,000 |

Required:

Using the account analysis method, formulate a predictor equation in the form of Y = a + bx. (i)

(8 marks) chonicol (ii) Baraka Ltd. intends to produce 700 units during the month of June 2017. Estimate the costs to be incurred.

> (2 marks) (Total: 20 marks)

Time Allowed: 3 hours.

(6 marks)

QUESTION TWO

The following financial data relate to Chestar Manufacturing Ltd. for the year ended 31 March 2017:

| | Sh. |
|------------------------------------|-----------|
| Opening Stock: | |
| Finished goods (875 units) | 74,375 |
| Work-in-progress | 32,000 |
| Direct labour | 450,000 |
| Raw materials consumed | 780,000 |
| Factory overheads | 300,000 |
| Goodwill | 100,000 |
| Closing stock: | |
| Finished goods (375 units) | 41,250 |
| Work-in-progress | 38,667 |
| Sales (14,500 units) | 2,080,000 |
| Rent received from godowns | 18,000 |
| Interest received (net) | 45,000 |
| Selling and distribution overheads | 61,000 |
| Bad debts | 12,000 |
| Dividends paid | 85,000 |
| Administration overheads | 295,000 |
| | |

Additional information:

1. Factory overheads are absorbed at 60% of direct wages.

2. Administration overheads are recovered at 20% of factory cost.

> CA22 Page 1 Out of 4

- 3. Selling and distribution overheads are charged at Sh.4 per unit sold.
- 4. Opening stock of finished goods is valued at Sh.104 per unit.
- 5. The company values work-in-progress at factory cost for both financial and cost profit reporting.

- (a) Statements of income for the year ended 31 March 2017 showing profit as per financial records and as per costing records. (12 marks)
- (b) A statement reconciling the profit as per costing records with the profit as per financial records. (8 marks) (Total: 20 marks)

QUESTION THREE

- (a) Outline four causes of material usage variances.
- (b) ABC Ltd. plans to use activity-based costing to determine its product costs. Currently, it uses a single plantwide factory overhead rate for allocating factory overheads to products, based on direct labour hours.

The total factory overhead cost is as follows:

| Department | Factory overheads | |
|-------------------------------------|-------------------|--|
| | Sh. | |
| Production support | 1,225,000 | |
| Production (factory overheads only) | 175,000 | |
| Total cost | 1,400,000 | |

The company has determined that it performs four major activities in the production support department.

These activities along with their budgeted costs are as follows:

| Production support activities | Budgeted cost | |
|-------------------------------|---------------|--|
| | Sh. | |
| Set-up | 428,750 | |
| Production control | 245,000 | |
| Quality control | 183,750 | |
| Materials management | 367,500 | |
| Total | 1,225,000 | |

ABC Ltd. has estimated the following activity-based usage quantities and units produced for each of its three products:

| Product | Number of units | Direct Labour hours | Set-ups | Production _ orders | Inspections | Material requisitions |
|-----------|--------------------|------------------------|------------|------------------------|-------------|-----------------------|
| Product K | 10,000 | 25,000 | 80 | 80 | 35 | 320 |
| Product L | 2,000 | 10,000 | 40 | 40 | 40 | 400 |
| Product M | <u>50,000</u> | 140,000 | 5 | 5 | _0 | 30 |
| Total | <u>62,000</u> | 175,000 | <u>125</u> | 125 | <u>75</u> | <u>750</u> |

Required:

Determine the factory overhead cost per unit for each product using:

| (i) | Single plantwide factory overhead rate method. | (4 marks) |
|------|--|-----------|
| (ii) | Activity-based costing. | (8 marks) |

(iii) Giving reasons, advise the management of ABC Ltd. on the most accurate method of product costing. (4 marks) (Total: 20 marks)

QUESTION FOUR

(a) A value chain is a set of activities that a firm operating in a specific industry performs in order to deliver a valuable product or service for the market.

Required:

In line with the above statement, summarise the six stages of value chain of a manufacturing firm. (6 marks) CA22 Page 2

CA22 Page 2 Out of 4

(4 marks)

(b) Blacky Ltd. manufactures three products namely; A, B and C. The management is reviewing the profitability of the product line.

You are given the following budgeted data relating to the company for the coming year:

| Product | Α | В | С |
|------------------|----------------|--------------|---------------|
| Sales (units) | 100,000 | 120,000 | <u>80,000</u> |
| | Sh. "000" | Sh. "000" | Sh. "000" |
| Revenue | <u>1,500</u> | <u>1,440</u> | <u>880</u> |
| Costs: | | | |
| Material | 500 | 480 | 240 |
| Labour | 400 | 320 | 160 |
| Overhead | <u> 650</u> | 600 | <u>360</u> |
| Total cost | <u>1550</u> | <u>1400</u> | <u>760</u> |
| Profit or (loss) | (50) | <u>40</u> | <u>120</u> |

The management is concerned about the loss on Product A and it is considering ceasing its production and switching the spare capacity of 100,000 units to Product C.

Additional information:

- All units produced are sold. 1.
- 25% of the labour cost for each product is fixed in nature. 2.
- Fixed administration overheads of Sh.900,000 in total have been apportioned to each product on the basis of 3. units sold and are included in the overheads above. All other overhead costs are variable in nature.
- 4. Ceasing production of Product A would eliminate the fixed labour charge associated with it and one sixth $(\frac{1}{6})$ of the fixed administration overheads apportioned to Product A.
- 5. Increasing the production of Product C by 100,000 units would mean that the fixed labour cost associated with WWW.Chopi. Product C would double, variable labour cost would rise by 20% and its selling price would decrease by Sh.1.50 in order to achieve the increased sales.

Required:

Advise the management of Blacky Ltd. on whether production of Product A should cease.

QUESTION FIVE

- (a) Examine four purposes of cost classification.
- (b) Maramat Ltd. manufactures a single product branded "PQ". The budgeted sales for the month of June 2017 amount to 10,000 units at a selling price of Sh.2,000 per unit.

Additional information:

One unit of "PQ" requires two components namely; X and Y as follows: 1.

| Component | Number | Unit cost of each component |
|-----------|--------|-----------------------------|
| | | Sh. |
| Х | 5 | 20 |
| Y | 3 | 10 |
| a | | |

- 2. Stocks at the beginning of the month are budgeted as follows:
 - 4,000 units of finished goods at a unit cost of Sh.1,050
 - Component X: 16,000 units at a unit cost of Sh.20
 - Component Y: 9,600 units at a unit cost of Sh.10
- 3. Production cost of each unit requires the following labour hours:

| Department | Hours per unit | Labour rate per hour |
|------------|----------------|----------------------|
| | | Sh. |
| Production | 4 | 100 |
| Finishing | 2 | 140 |

CA22 Page 3 Out of 4

(Total: 20 marks)

(4 marks)

(14 marks)

- 4. Factory overhead is absorbed into unit cost on the basis of direct labour hours. The budgeted overhead for the month is Sh.1,920,000.
- 5. Administration, selling and distribution overheads for the month are budgeted at Sh.5,500,000.
- 6. The company plans a reduction of 50% in quantity of finished goods at the end of the month and an increase of 25% in the quantity of each input component.

For the month of June 2017:

| (i) | Sales budget. | (1 mark) |
|-------|-----------------------------------|--------------------------------|
| (ii) | Production quantity budget. | (2 marks) |
| (iii) | Material usage budget. | (2 marks) |
| (iv) | Material purchase budget. | (3 marks) |
| (v) | Direct labour budget. | (2 marks) |
| (vi) | Budgeted profit and loss account. | (6 marks) (Total: 20 marks) |
| | | |

KASNEB

CPA PART I SECTION 2

MANAGEMENT ACCOUNTING

WEDNESDAY: 23 November 2016.

Answer ALL questions. Marks allocated to each question are shown at the end of the question. Show ALL your workings.

QUESTION ONE

- Describe six skills that a management accountant should possess. (a) (6 marks)
- (b) Summarise four perspectives which the balanced scorecard focuses on.
- The production manager of Tamuh Sugar Company is concerned about the apparent fluctuations in efficiency and (c) work done by employees which are related to the volume. A twelve week research was undertaken and the following were the outcomes:

| Week | Machine hours | Indirect labour cost Sh. |
|------|---------------|-----------------------------|
| 1 | 68 | 1,190 |
| 2 | 88 | 1,211 |
| 3 | 62 | 1,004 |
| 4 | 72 | 917 |
| 5 | 60 | 770 |
| 6 | 96 | 1,456 |
| 7 | 78 | 1,180 |
| 8 | 46 | 710 |
| 9 | 82 | 1,316 |
| 10 | 94 | 1,032 |
| 11 | 68 | 752 |
| 12 | 48 | 963 |

Required:

Using the ordinary least squares (OLS) method:

| | (i) | Formulate the cost function for the above relationship. | (8 marks) |
|-------------|---|---|---|
| | (ii) | Compute the indirect labour cost associated with 120 machine hours. | (2 marks) (Total: 20 marks) |
| QUES (a) | TION T In the o | WO context of a Just-In-Time (JIT) inventory system, explain the following terms: | |
| | (i) | Backflush costing. | (2 marks) |
| | (ii) | Batch sizes of one unit. | (2 marks) |
| (b) | The fol Ac Bu Sta Ac Requin | td. operates a standard overhead absorption costing system. The standard fixed overlowing data relate to the month of October 2016: ctual hours worked 8,250 udgeted hours 9,000 andard hours of actual production 7,800 ctual fixed overheads expenditure (Sh.) 211,000 red: 9 e month of October 2016, compute: | rhead rate per hour is Sh.25. |
| | (i) | The fixed overheads volume variance. | (2 months) |
| | (i) (ii) | The fixed overheads expenditure variance. | (2 months) (2 months) CA22 Page 1 Out of 4 |

Time Allowed: 3 hours.

(4 marks)

www.dopi.co.ke

(c) Exam-Companion Academy (ECA) offers expert training to candidates on four subjects. The budget for the financial year ending 30 June 2017 is as follows:

| | | 1 | Subject area | |
|------------------------------|------------|----------|--------------|-----------|
| | Accounting | Taxation | Auditing | Economics |
| Expected training hours | 2,500 | 3,000 | 3,500 | 1,000 |
| Charge per hour (Sh.) | 400 | 500 | 450 | 350 |
| Variable cost per hour (Sh.) | 100 | 150 | 90 | 100 |

. . .

The fixed costs for the year are expected to be Sh.1,986,000.

.

Required:

| (1) | Assuming the above mix of training hours, advise the management on total number break-even. | of hours required to (5 marks) |
|-------|---|--------------------------------|
| (ii) | The contribution from each subject and in total at break-even. | (4 marks) |
| (iii) | Total hours required to earn a profit of Sh.1.324,000. | (3 marks) (Total: 20 marks) |

QUESTION THREE

| (a) | Outline four causes of labour turnover in an organisation. | (4 marks) |
|-----|--|-----------|
| (b) | Describe four functions of a budget committee. | (4 marks) |

(c) Rabuor Ltd. manufactures a range of products. The company absorbs production overheads using a rate of 200% of the direct wages. This rate was calculated from the following budgeted figures:

| | Sh."000" |
|--------------------------|----------|
| Variable production cost | 6,400 |
| Fixed production costs | 9,600 |
| Direct labour cost | 8,000 |

The management is faced with the following decision making problems:

Problem 1

The normal selling price per unit of product EXEM is Sh.220 while the unit production cost is as follows:

| | Sh. |
|----------------------|-----|
| Raw materials | 80 |
| Direct labour | 40 |
| Production overheads | 80 |
| | 200 |

There is a possibility of supplying a special order for 2,000 units of product EXEM at Sh.160 each. If the order is accepted, the normal budgeted sales would not be affected and the company has the necessary capacity to produce the additional units.

Problem 2

The cost of making component BEE, which forms part of product WYE is given below:

| | Sh. |
|----------------------|------------|
| Raw materials | 40 |
| Direct labour | 80 |
| Production overheads | <u>160</u> |
| | 280 |

Component BEE could be bought from an outside supplier for Sh.200.

Fixed production costs will not be affected.

Required:

- (i) Advise the management on whether to accept the special order under Problem 1. (6 marks)
- (ii) Evaluate whether the company should continue to make component BEE or buy it from an outside supplier under Problem 2. (6 marks)

(Total: 20 marks) CA22 Page 2 Out of 4

QUESTION FOUR

Pwani Ltd. operates a chemical process which produces four different products namely; A, B, C and D from the input of one raw material. Budget information for the forthcoming financial year is as follows:

| | | Sh."000" | |
|--------------------|------------------|-------------------|---|
| Raw materials cost | | 268 | |
| Initial proce | essing cost | 464 | |
| Product | Output in litres | Sales Sh."000" | Additional processing costs Sh."000" |
| А | 400,000 | 768 | 160 |
| В | 90,000 | 232 | 128 |
| С | 5,000 | 32 | - |
| D | 9,000 | 240 | 8 |

Additional information:

- 1. The company's policy is to apportion the costs prior to the split-off point on a method based on net sales value.
- 2. The current intention is to sell product C without further processing but to process the other three products after the split-off.
- 3. The alternative strategy would be to sell all the four products at the split-off point without further processing. If this was to be done, the selling prices obtainable would be as follows:

| Product | Price per litre (Sh.) |
|---------|-----------------------|
| А | 1.28 |
| В | 1.60 |
| С | 6.40 |
| D | 20.00 |

Required:

| (a) | Budgeted profit statement showing the profit or loss for each product and in total if the current intention is a | dopted. |
|-----|--|-----------|
| (b) | Determine the profit or loss by product and in total if the alternative strategy was to be adopted. | (6 marks) |
| (c) | Recommend what should be done and why assuming there is no more profitable alternative use for the plant | (4 marks) |

(Total: 20 marks)

QUESTION FIVE

The following information has been extracted from the books of Wazi Enterprises Ltd., a company dealing with manufacture of plastic containers.

The sales budget for the first six months of the financial year ending 31 December 2016 was as follows:

| Month | January | February | March | April | May | June |
|---------------|---------|----------|--------|--------|--------|--------|
| Sales (units) | 10,000 | 12,000 | 14,000 | 15,000 | 15,000 | 16,000 |

Additional information:

- 1. Finished goods inventory at the end of each month is expected to be 20% of budgeted sales quantity for the following month.
- 2. Finished goods inventory was 2,700 units on 1 January 2016.
- 3. There would be no work in progress at the end of any month.
- 4. Each unit of finished product requires two types of raw materials as follows:
 - Material X : 4 kgs at Sh.10 per kg
 - Material Y: 6 kgs at Sh.15 per kg
- 5. Materials on hand on 1 January 2016 was 19,000 kgs of material X and 29,000 kgs of material Y.
- 6. Monthly closing stock of material is budgeted to be equal to half of the requirements of next month's production.
- 7. Budgeted direct labour hour per unit of finished product is ³/₄ hour.
- 8. Budgeted direct labour cost for the first quarter of the year 2016 is Sh.1,089,000.

 9. Actual data for the quarter ended 31 March 2016 is as follows: Actual production quantity: 40,000 units Direct material cost (Purchase cost based on materials actually issued to production) Material X: 165,000 kgs at Sh.10.20 per kg Material Y: 238,000 kgs at Sh.15.10 per kg Actual direct labour hours worked: 32,000 hours Actual direct labour cost: Sh.1,312,000

| Requi (a) | red: (i) | Monthly production quantity for the quarter ended 31 March 2016. | (4 marks) | |
|---------------------|----------------------------------|---|--------------------------|--|
| | (ii) | Monthly raw material consumption quantity budget for the four months from January 2016 to Apr | | |
| | (iii) | Materials purchase quantity budget for the quarter ended 31 March 2016. | (4 marks) | |
| (b) | Compute the following variances: | | | |
| | (i) | Material price variance. | (2 marks) | |
| | (ii) | Material usage variance. | (2 marks) | |
| | (iii) | Direct labour rate variance. | (2 marks) | |
| | (iv) | Direct labour efficiency variance. (Total | (2 marks) : 20 marks) | |

CPA PART I SECTION 2

MANAGEMENT ACCOUNTING

WEDNESDAY: 25 May 2016.

Time Allowed: 3 hours.

Answer ALL questions. Marks allocated to each question are shown at the end of the question. Show ALL your workings.

QUESTION ONE

(a) The following information has been made available from the records of Keni Automotives Ltd., a company dealing with the manufacture of spare parts:

| Direct materials | Price per unit |
|--------------------|----------------------------|
| | Sh. |
| Х | 800 |
| Y | 600 |
| Direct wages | · · · · |
| x | 12 hours at Sh.50 per hour |
| Y | 8 hours at Sh.45 per hour |
| Variable overheads | 150% of direct wages |
| Fixed overheads | Sh.750,000 |
| Selling price | Sh. |
| Х | 2,500 |
| Y | 2,000 |

The directors of the company have sought your advice on the following alternative sales mix in the budget for the next period: 1. 2,500 units of X and 2,500 units of Y

2,500 units of X and 2,500 units of Y.
 4,000 units of Y only.
 4,000 units of X and 1,000 units of Y.

IV. 1,500 units of X and 4,000 units of Y.

Required:

Advise the management of the company on which of the alternative sales mix you would recommend. Justify your answer. (12 marks)

(b) A company intends to start selling a new pair of hand held pliers in the upcoming financial year. The company wishes to establish how many hand held pliers should be sold in order to break even on this investment. The chief accountant has provided the following data:

| Fixed costs | Sh. |
|--------------------------|-----------|
| Metal molding machine | 1,000,000 |
| Plastic grip molder | 250,000 |
| Sander | 50,000 |
| Variable cost (per unit) | Sh. |
| Packaging material | 400 |
| Raw materials | 700 |
| Grip metal | 200 |
| Shipping | 75 |

Additional information:

- 1. The marketing department estimates that they could sell the new pair of hand held pliers for Sh.1,500 per unit and that projects' sales will average 16,000 units per month.
- 2. The company wishes to break even and start to earn profit within the first month.
- 3. The target profit level at the end of the first month is Sh.250,000.

CA22 Page 1 Out of 4

|-------|--|-----------|
| (ii) | The labour cost variance. | (4 marks) |
| (iii) | Reconciliation of standard and actual costs in (a)(i) and (a)(ii) above. | (4 marks) |

(b) Talde Ltd., a manufacturing company, is concerned about the variation in its total manufacturing costs. The production manager has therefore requested you to estimate a predictable cost pattern to be used in future cost prediction.

Based on judgement, the plant manager has classified each manufacturing cost as fixed, variable, or part fixed and part variable. He has provided you with the following information for the month of April 2016 when 10,000 units were produced:

| Details of cost | Cost | Cost behaviour |
|---------------------|---------|----------------|
| | Sh. | |
| Direct materials | 420,000 | Variable |
| Direct labour | | Variable |
| Depreciation | 80,000 | Fixed |
| Telephone | 2,000 | Fixed |
| Other utilities | 40,000 | 20% fixed |
| Supervisors salary | 200,000 | 80% fixed |
| Equipment repairs | 60,000 | 10% fixed |
| Indirect materials | 4,000 | Variable |
| Factory maintenance | 60,000 | 90% fixed |

Required:

(i)

- Using the accounts analysis method, estimate the fixed cost per month and the variable cost per unit.
 - (7 marks)

CA22 Page 2 Out of 4

⁽ii) Based on your answer in part (b)(i) above, compute the incremental cost of producing 2,000 units. (1 mark) (Total: 20 marks)

QUESTION THREE

나는 아이들은 가지 않는지?

(6 marks)

www.chopi.co.

(a) Describe six cost accounting tasks that could be routinely undertaken by using computers.

(b) QFX Ltd. uses batch costing in cost analysis. The following information is provided:

| | | | | | | | | 1.00 |
|------------------------|--------|--------|--------|--------|----|-----|-------------------------------|--------------|
| Batch | P | Q | R | S | | | | |
| Output in units | 2,500 | 600 | 2,000 | 1,200 | • | | $(\sigma_{i}) \in [0,\infty)$ | $d = -i_{A}$ |
| | | | | | | | | |
| Cost per batch | | | | | | 100 | | A |
| Direct labour (Sh.) | 92,000 | 15,200 | 68,800 | 24,000 | ۰. | | the space | |
| Direct materials (Sh.) | 16.500 | 7,500 | 21,000 | 9.000 | | | 1 1 L | |
| | | | | | | | | |
| Labour hours per batch | 11,500 | 1,900 | 8,600 | 3,000 | | | | |
| • | | | | | | | | |

The following data relates to the total production overheads for the period ended 31 March 2016:

| Particulars | Cost (Sh.) | Cost driver |
|-----------------------|----------------|------------------------|
| Stores | 82,500 | Number of requisitions |
| Inspection | 58,500 | Number of inspections |
| Set-up | 62,000 | Number of set-ups |
| Engineering support | 83,000 | Engineering hours |
| Machine related costs | 146,000 | Machine hours |
| Materials dispatch | 68,000 | Materials movements |
| | <u>500,000</u> | |

Corresponding cost driver volumes for the batches were as follows:

| | P | Q | R | S | Total |
|--------------------|-------|-------|-------|-------|--------|
| Requisitions | 400 | 210 | 430 | 260 | 1,300 |
| Inspections | 180 | 80 | 130 | 80 | 470 |
| Setups | 120 | 70 | 160 | 80 | 430 |
| Engineering hours | 650 | 380 | 520 | 350 | 1,900 |
| Machine hours | 5,200 | 2,550 | 6,100 | 3,250 | 17,100 |
| Materials movement | 1,800 | 700 | 2,050 | 400 | 4,950 |

Required:

Compute the batch cost and unit cost using:

| (i) | Traditional costing based on a labour hour overhead absorption rate. | (6 marks) |
|------|--|--------------------------------|
| (ii) | Activity based costing (ABC) system. | (8 marks) (Total: 20 marks) |

. . .

QUESTION FOUR

.

Mark Ltd. operates a budgetary control system. The following is the company's income forecast for the four months period ending 31 August 2016:

| | | 2016 | | |
|---|-------------------|-------------------|------------------|-------------------|
| | May | June | July | August |
| | Sh. "000" | Sh. "000" | Sh. "000" | Sh. "000" |
| Sales | 45,000 | 55,000 | 75,000 | 50,000 |
| Cost of sales | (<u>21,000</u>) | (<u>28,000</u>) | <u>(42,000</u>) | (<u>22,000</u>) |
| Gross margin | <u>24,000</u> | <u>27,000</u> | <u>33,000</u> | <u>28,000</u> |
| Selling and administration expenses: | | | | |
| Selling expenses | 7,000 | 8,400 | 11,200 | 7,300 |
| Administration expenses | 5,500 | 5,900 | <u>6,900</u> | 5,200 |
| Total selling and administration expenses | 12,500 | <u>14,300</u> | 18,100 | 12,500 |
| Net operating income | <u>11,500</u> | <u>12,700</u> | <u>14,900</u> | <u>15,500</u> |

e de Maria de Jacobiero de La Constante de La C Constante de La C CA22 Page 3 Out of 4

Additional information:

- 1. Administration expenses include depreciation of Sh.1,800,000 each month.
- 2. 20% of the sales are on cash basis.
- 3. Credit sales are collected over a 3-month period with 20% collected in the month of sale, 65% in the month following the month of sale, and 15% in the second month following sale.
- 4. Sales for the months of March 2016 and April 2016 totalled Sh.27 million and Sh.33 million respectively.
- 5. Inventory purchases are paid for within 15 days. Therefore, 50% of a month's inventory purchase are paid for in the month of purchase and the remaining 50% paid for in the following month. Accounts payable for inventory purchases as at 30 April 2016 totaled Sh.11.1 million.
- 6. The company maintains its ending inventory levels at 25% of the cost of the merchandise to be sold in the following month. The merchandise inventory as at 30 April 2016 amounted to Sh.5.25 million.
- 7. Land costing Sh.4.3 million will be purchased in May 2016.
- 8. Dividends of Sh.1.3 million will be declared and paid in July 2016.
- 9. The cash balance on 30 April 2016 amounted to Sh.8.4 million and the company must maintain a cash balance of at least this amount at the end of each month. In case of any deficit, a bank overdraft is obtained.

Required:

| (a) | Debtors collection schedule. | ne an | | (6 marks) |
|-----|------------------------------|---|----|--|
| | | | | |
| (b) | Creditors payment schedule. | | | (6 marks) |
| | | | | $(\mathbf{r}_{i}) = (\mathbf{r}_{i}) + ($ |
| (c) | Cash budget. | | | (8 marks) |
| | | • • | 1. | (Total: 20 marks) |
| | | , | | |

(6 marks)

(b) Describe three factors to be considered by an organisation when undertaking performance measurements. (6 marks)

(c) Discuss four requirements for the proper operation of Just-in-time (JIT) system in an organisation. (8 marks) (Total: 20 marks)

MANAGEMENT ACCOUNTING

PILOT PAPER

September 2015.

Time Allowed: 3 hours.

Answer ALL questions. Marks allocated to each question are shown at the end of the question. Show ALL your workings.

QUESTION ONE

New Colour Limited manufacturers two joint products Exe and Wye. A by product Zed is also produced. Output from (a) Process One is transferred to Process Two where the joint products emerge. The following information is available for July 2015:

| | 1. | Process One cost data: | |
|-----|--------|--|---|
| | | Raw material inputs (40,000 kgs) | Sh.9,620,000 |
| | | Direct wages | Sh. 7,650,000 |
| | | Overheads | Sh. 11,050,00 |
| | | Output: | |
| | | Transferred to Process Two | 30,000 Kgs. |
| | | By product Zed | 2,000 Kgs. |
| | | Closing work in progress (50% complete as to conversion cos | sts) 8,000 Kgs. |
| | 2. | By product Zed retails at Sh.75 per kg. Additional selling cos July 2015. | sts amount to Sh.15 per kg. 500 kgs. were sold in |
| | 3. | Process Two cost data: | A.C. |
| | 5. | Additional direct materials | Sh.3,852,500 |
| | | Direct wages | Sh.6,099,609.5 |
| | | Overheads | Sh.3,828,750 |
| | | Output: | Sii.5,020,000 |
| | | Finished goods (Exe and Wye) | 28,000 Kgs. |
| | | Losses in the process | 2,000 Kgs. |
| | 4. | The output is produced in the ratio of 2:3 for products Exe and | |
| | 5. | Normal loss in the process is 2.5%. Scrap value per unit is Sh. | |
| | 6. | The selling price per unit of each product is as follows: | |
| | | Exe. Sh.2,000 per Kg. | |
| | | Wye Sh.1,218.75 per Kg. | |
| | 7. | Joint costs are allocated on the basis of sales revenue at separa | ation point |
| | 7. | John costs are anocated on the basis of sales revenue at separa | ation point. |
| | | Required: | |
| | | (i) Statement of production for Process One. | (8 marks) |
| | | (ii) Process Two account. | (8 marks) |
| (b) | In the | e context of service costing, explain the main features of a service | ce. (4 marks) |
| | | | (Total: 20 marks) |
| | | | |
| QUE | | N TWO | |
| (a) | Expla | ain six requirements of an effective budgetary control system. | (6 marks) |
| | | | • |

A limited company operates a system of standard costing. The following information is available for the month of July (b) 2015:

| 1. | Actual cost data: | Sh. |
|----|---|-----------|
| | Direct materials purchased (36000 Kgs.) | 1,890,000 |
| | Direct wages (6800 hours) | 2,210,000 |
| | Variable production overheads | 620,000 |
| | Fixed production overheads | 1,880,000 |
| | | |

CA22 Pilot Paper Page 1 Out of 3

- 2. Output during the period was 3500 units of product Y.
- 3. The standard production units were budgeted at 4800 units.
- 4. The standard cost data per unit is as follows:

| | Sh. |
|---|------------|
| Direct materials purchased (Sh.500 per Kg.) | 500 |
| Direct wages (2 hours) | 600 |
| Variable production overheads | 200 |
| Fixed production overheads | <u>400</u> |
| | 1700 |

5. Labour records show 6200 hours were worked. 600 hours were recorded as idle time due to machine breakdown.

OI

| | Requ | ired: | |
|-----|---------------|---|--------------------------------|
| | (i) | Direct material cost, price and usage variance. | (4 marks) |
| | (ii) | Labour cost, rate, efficiency and idle time variance. | (6 marks) |
| | (iii) | Variable overheads cost variance. | (2 marks) |
| | (iv) | Fixed overhead expenditure variance. | (2 marks) (Total: 20 marks) |
| OUE | STION THR | EE | |
| (a) | | ways in which a company could achieve cost reduction. | (4 marks) |
| (b) | Distinguish I | between "cost centre", "profit centre" and "investment centre". | (6 marks) |
| (c) | Explain the t | erm "balanced scorecard". | (2 marks) |
| (d) | Describe fou | r perspectives of balanced scorecard giving two measures of performance that co | uld be used. |

QUESTION FOUR

Alpha Limited manufactures three products in two production departments; machining and finishing. It also has two (a) service departments, a canteen and machine maintenance departments. The following are the budgeted cost data for the coming year:

| Department | Machining | Finishing | Canteen | Maintenance |
|--|------------------------|-----------|----------|-------------|
| Allocated overheads (Sh.) | 3,502,000 | 1,748.000 | 800.000 | 400,000 |
| No. of employees | 15 | 9 | 2 | 6 |
| Maintenance orders | 52 | 13 | - | - |
| Products | Benta | Centa | Denta | |
| Production (units) | 3000 | 4500 | 2000 | |
| Direct material cost per unit (Sh.) Direct labour hours per unit: | 120 | 150 | 170 | |
| Machining (Sh.60 per hour) | 3 | 2 | 1.6 | |
| Finishing (Sh.50 per hour) | 4 | 2 2 | 1.5 2 | |
| Machine hour per unit: | | | | |
| Machining | 2 | 4 | 3 | |
| Overheads are absorbed on machine boy | urs in machining and b | - | - | |

Overheads are absorbed on machine hours in machining and labour hour in finishing.

Required:

Calculate the budgeted cost per unit for each product.

(14 marks)

(8 marks)

(Total: 20 marks)

CA22 Pilot Paper Page 2 Out of 3

(b) The finishing department of a factory has the following payroll data for the month of August 2015:

| | Direct employees | Indirect employees |
|----------------------------|------------------|--------------------|
| Total attendance time | 19800 hours | 7050 hours |
| Normal working hours | 18000 hours | 6400 hours |
| Productive time | 18850 hours | - |
| Non productive time | | |
| - Due to poor supervision | 400 hours | - |
| - Normal machine repairs | 550 hours | - |
| Basic hourly rate per hour | Sh.150 | Sh.150 |

Overtime is paid at a premium of 40% of base rate. 40% of the overtime for both categories was worked to meet specific request of a customer. A general bonus of Sh.625,000 was paid to all the employees.

Required:

Wages control account to show the wages allocation for the period.

QUESTION FIVE

Omega Manufacturers Limited has just acquired new production facilities to produce product Omega. The product will be produced in two departments, crushing and filtering.

Additional information:

- 1. The product will retail at a price of Sh.500 per litre.
- 2. Variable production costs are as follows:

| 5- | Crushing | Filtering |
|-------------------------------|----------|-----------|
| Direct materials | Sh. 50 | - |
| Direct labour | Sh.150 | Sh.40 |
| Variable production overheads | Sh. 40 | Sh.20 |
| | | |

3. Fixed production overheads amount to Sh.5,000,000 for both departments.

The Crushing department is currently operating at full capacity with available labour hours being 10,000. 4.

Each unit of Omega requires 0.25 hours in the Crushing department. 5.

Required:

(a)

- (i) Break-even point in units and revenue.
- (ii) Margin of safety in units.
- (iii) Current budgeted profit.
- A customer has offered to purchase 2000 units of product Alpha, another product that Omega Manufacturers Limited (b) can produce with the new production facility:

Cost data is as follows for product Alpha:

Cost per unit (i)

| | Crushing | Filtering |
|-----------------------------------|-----------------------|------------|
| Direct materials | Sh. 250 | - |
| Direct labour | Sh. 300 | Sh.80 |
| Variable production overheads | Sh. 50 | Sh.20 |
| Each unit of Alpha requires 0.5 h | anna in amachina dana | utura cust |

(ii) Each unit of Alpha requires 0.5 hours in crushing department. (iii) The customer has offered a price of Sh.1500 per unit of Alpha.

(iv) Incremental fixed costs associated with the offer amount to Sh.1,000,000.

Required:

Advise the company on whether to accept the offer.

The management is considering a proposal to establish a new market in a neighbouring country for product Omega. (c) This will require expansion of the production facility.

| The proposal will increase costs as follow | s: | |
|--|------------|---|
| | . . | ~ |

| Advertising expenses | 10% of revenue. |
|----------------------------|--------------------|
| Travelling expenses | 10% of prime cost. |
| Fixed production overheads | Sh.2,500,000 |
| | |

1.8

Target annual sales volume will be 10,000 units in the new market at a price of Sh.900 per unit.

Required:

| Advise the company on whether it should market product Omega in the new country. | (6 marks) |
|--|-------------------|
| | (Total: 20 marks) |

CPA PART I SECTION 2

MANAGEMENT ACCOUNTING

TUESDAY: 24 November 2015.

Answer ALL questions. Marks allocated to each question are shown at the end of the question. Show ALL your workings.

QUESTION ONE

Describe three benefits of management accounting. (a) (6 marks)

- Highlight four purposes of performance measurements. (b)
- The net profit of Pine Ltd., a manufacturing concern for the year ended 30 September 2015 as shown by the financial (c) accounts amounted to Sh.257,510. The cost accounts for the same period disclosed a net profit of Sh.344,800.

Ch.

On examination of both sets of accounts, the following facts were discovered:

| | | 50. |
|----|---|--------|
| 1. | Production overheads under-recovered in cost accounts | 6.240 |
| 2. | Administrative overheads over-recovered in cost accounts | 3,400 |
| 3. | Depreciation charged in financial accounts | 22,400 |
| 4. | Depreciation recovered in cost accounts | 25,000 |
| 5. | Interest on investments not included in cost accounts | 16,000 |
| 6. | Obsolescence loss charged in financial accounts | 11,400 |
| 7. | Income tax provided for in financial accounts | 80,600 |
| 8. | Bank interest and dividends received in financial accounts | 2,450 |
| 9. | Loss due to depreciation in stock value charged in financial accounts | 13,500 |

Required

A reconciliation statement between the net profit as per cost accounts and as per financial accounts. (10 marks) (Total: 20 marks)

OUESTION TWO

- Describe four advantages of budgetary control in an organisation. (a)
- (b) Tarvol Ltd. manufactures and sells a single product. The company's contribution format income statement for the year ended 31 October 2015 is given below:

| | Total Sh. | Per unit Sh. | Percentage of sales |
|----------------------|-------------------|-----------------|---------------------|
| Sales (20,000 units) | 1,200,000 | 60 | 100% |
| Variable expenses | 900,000 | <u>45</u> | _? |
| Contribution margin | n 300,000 | 15 | ? |
| Fixed expenses | (240,000) | | |
| Net income | <u> 60,000</u> | | |

The management of the company is anxious to increase the company's profit and has asked for analysis of a number of items

Required:

| (i) | Compute the company' | 's contribution margin ratio and | variable expense ratio. | (4 marks) |
|-----|----------------------|----------------------------------|-------------------------|-----------|
|-----|----------------------|----------------------------------|-------------------------|-----------|

- (ii) Compute the company's break-even point both in units and in shillings. (4 marks)
- (iii) Compute the increase in net operating income of the company assuming that sales will increase by Sh.400,000 in the next financial year and the cost behaviour patterns will remain unchanged. Use the contribution margin ratio obtained in (b) (i) above to compute your answer. (2 marks)
- (iv) Refer to the original data. Assume that in the next financial year, the management targets the company to earn a profit of at least Sh.90,000. Compute how many units would have to be sold to meet this target profit. (2 marks)

(8 marks)

QUESTION THREE

- (a) Explain three purposes of cost classification by behaviour.
- (b) Kena Stores provided the following information in respect of their operations for the month of July 2015:

| | Receipts | | Issues |
|---------|----------------------|---------|-------------|
| Date | | Date | |
| 3 July | 600 units at Sh.60 | 5 July | 1,600 units |
| 7 July | 1,000 units at Sh.70 | 12 July | 400 units |
| 18 July | 2,400 units at Sh.80 | 20 July | 1,200 units |
| • | | 29 July | 600 units |
| | | 31 July | 200 units |

Additional information:

- 1. Materials in store as at 30 June 2015 were 2,000 units at Sh.50.
- 2. On 9 July 2015, part of the materials issued on 5 July 2015 amounting to 200 units were returned.
- 3. On 15 July 2015, 100 units were returned to Kena Stores.
- 4. On 21 July 2015, there was materials wastage of 500 units.
- 5. Returns from a June 2015 issue of 100 units at Sh.45 was received on 25 July 2015.
- 6. On 28 July 2015, there was shortage of stock of 20 units.
- 7. Kena Stores uses the first in first out (FIFO) method to value its inventory.

Required:

A stores ledger card for Kena Stores for the month of July 2015.

QUESTION FOUR

(a) Respor Ltd. manufactures three products namely; A, B and C. The company has four departments namely; W, X, Y and Z. The following information relates to Respor Ltd. for the year ended 30 June 2014:
 Sh."000"
 Rates
 25,000
 Depreciation: Buildings
 45.000

| | e i | Sh."000" |
|---------------|------------------------|----------|
| Rates | | 25,000 |
| Depreciation: | Buildings | 45,000 |
| * | Machinery | 20,000 |
| Maintenance o | fbuildings | 15,000 |
| Insurance: | Buildings | 5,000 |
| | Machines | 4,000 |
| | Inventory | 12,000 |
| | Workman's compensation | 4,000 |
| Electricity: | Lighting | 20,000 |
| 2 | Power | 24,000 |
| Supervision | | 60,000 |
| A | e keeping and payroll | 40,000 |
| Canteen expen | | 12,000 |
| * | | 286,000 |

| Departmental information: | | | | |
|------------------------------------|---------|---------|--------|--------|
| | W | Χ | Y | Z |
| Area (square metres) | 4,000 | 2,000 | 3,000 | 1,000 |
| Value of machines (Sh."000") | 80,000 | 60,000 | 60,000 | - |
| Running of machines | 15,000 | 7,000 | 8,000 | - |
| Average inventory value (Sh."000") | 20,000 | 15,000 | 15,000 | 10,000 |
| Wages paid (Sh."000") | 120.000 | 170,000 | 80,000 | 30,000 |
| Number of employees | 15 | 20 | 10 | 5 |

Required:

Overhead analysis sheet.

(14 marks)

(Total: 20 marks)

Qui Ltd. manufactures a single product branded "Q". The standard selling price and variable cost per unit of product (b) "Q" are as follows:

| | | Sh. |
|---------------|-------------------------------------|-----|
| Selling price | | 136 |
| Materials | 2 kilograms at Sh.10 per kilogramme | 20 |
| Labour | 3 hours at Sh.24 per hour | 72 |

Additional information:

The budgeted sales for the month of October 2015 were 38,000 units. 1.

| 2. | The actual results for the month of | October 2015 were as follows: |
|----|-------------------------------------|-------------------------------|
| | Production and sales | 36.000 units |
| | Selling price per unit | Sh.134 |
| | Materials (76.000 kilogrammes) | Sh.754,000 |
| | Labour (114.000 hours paid) | Sh.2.656.000 |

The company operates a standard costing system and a just-in time (JIT) purchasing and production system. 3.

Required:

Showing applicable variances, prepare a statement that reconciles the budgeted contribution with the actual contribution for the month of October 2015. (10 marks)

QUESTION FIVE

- (a) Highlight six assumptions of cost volume profit (CVP) analysis.
- (b) Computech has two fully automated machines M1 and M2 through which metal is passed to produce stands. There are production constraints and Computech has decided to produce only one of the three stand models P, Q and R during the next financial year.

The forecasts for the next financial year are as follows:

| | | Р | 0 | R |
|-----------------------|------------|-------|--------|--------|
| Maximum sales (units) | | 7,400 | 10.000 | 12.000 |
| Stand unit data: | | | | |
| Selling price (Sl | h.) | 900 | 800 | 1.000 |
| Machine time: | M1 (hours) | 0.25 | 0.15 | 0.3 |
| | M2 (hours) | 0.2 | 0.225 | 0.25 |

Additional information:

- 1. Maximum operating hours for machine M1 is 1,700 hours while for machine M2 is 1,920 hours.
- 2. Maximum quantity of metal available amounts to 17,000 metres.
- 3. Each stand requires 2 metres of metal.
- 4. The cost of metal amounts to Sh.50 per metre.
- 5. Variable machine overheads for machine M1 and machine M2 are Sh.500 per hour and Sh.600 per hour respectively.
- 6. Production capacity is dedicated to the stands only.

Required:

Advise the management of Computech on which stand to produce and sell indicating the number of units and resulting contribution. (14 marks)

QUESTION ONE

(a)

(b)

Mejwa Ltd. is a manufacturing firm operating in the textile industry. The company recorded the following transactions in relation to product BT during the month of January 2020:

| Date | Purch | ases | Si | ales |
|------------|----------|------------|----------|--|
| | Quantity | Unit price | Quantity | Unit price |
| | (Units) | Sh. | (Units) | Sh. |
| January: 1 | 12,000 | 150 | | |
| 3 | 8,000 | 160 - | | |
| 7 | | | 12,000 | 200 |
| 8 | 10,000 | 155 | | |
| 13 | | | 5,000 | 210 |
| 17 | | | 8,000 | 205 |
| 20 | 12,000 | 140 | | NO |
| 23 | 7,000 | 152.5 | | . 00.1 |
| 25 | | | 11,000 | 200 200 |
| 27 | | | 10,000 | 200 202.5 m ⁴ .000 ¹ .01 ² 212 m ⁴ .00 |
| 31 | | | 200 | 212 3 |
| | | | | |

Additional information:

- 1. The opening inventory of product BT on 1 January 2020 comprised of 9,500 units purchased at a cost of Sh.135 per unit.
- 2. On 9 January 2020, the company reported a shortage of 300 units.
- 3. On 19 January 2020, 600 units of the units sold on 17 January 2020 were returned by the customer.

Required:

- (i) A store ledger account for the month of January 2020 using first in first out (FIFO) method of inventory valuation. (10 marks)
- (ii) The value of the closing stock.

(2 marks)

Ujenzi Company specialises in the manufacture of building blocks used in the construction industry. The cost accountant of the company has prepared a schedule of estimated overhead cost on the assumption that production will be 170,000 blocks.

Overhead costs have been classified as fixed and variable costs by the company's cost accountant as indicated below: Overheads Amount

| | Sh. "000" |
|------------------------|------------------------|
| Indirect materials | 5,700 (all variable) |
| Indirect labour | 4,100 (all variable) |
| Rent and rates | 2,800 (all fixed) |
| Machinery depreciation | 1,700 (all fixed) |
| Maintenance | 5,200 (3,100 variable) |
| Technical support | 1,620 (all fixed) |
| Storage cost | 4,300 (4,100 variable) |
| Heat and light | 3,100 (1,000 fixed) |
| Water bill | 1,700 (650 fixed) |
| Transport | 2,900 (900 fixed) |
| Supplies | 4,000 (all variable) |
| | C1 |

CA22 Page 1 Out of 4

Required:

Using accounts analysis method, determine a cost estimation equation in the form of Y=a+bX taking the number of blocks to be the only cost driver. (8 marks)

(Total: 20 marks) **OUESTION TWO**

(a) Discuss four objectives of budgetary control system in an organisation. (8 marks)

(b) A company uses two methods to remunerate its casual workers as follows:

Piece rate with guaranteed time rate

The company pays its casual workers Sh.25 for every good output produced by them. Any spoilt output is paid at the rate of Sh.10 and a penalty of 8% is charged based on the rate of the good production. The employees are guaranteed a minimum monthly pay of Sh.8,000.

Differential piece rate

An employee is compensated on piece rate basis and the following schedule is applied to determine his or her remuneration:

| Number of units | Rate of wages per uni | | |
|-----------------|-----------------------|--|--|
| | Sh. | | |
| 1 - 250 | 15 | | |
| 251 - 500 | 20 | | |
| 501 - 1,000 | 25 | | |
| Over 1,000 | 30 | | |

Spoilt units are deducted from the first production, paid at the rate of Sh.10 per unit and a penalty of 8% applied at the differential rate of the first production.

| Three employees of the company produced the following number of units during the month of March 2020: | | | | | |
|---|--------------------------|--------------|--|--|--|
| Employee | Number of units produced | Spoilt units | | | |
| Amboga | 2,000 | 200 | | | |
| Banyala | 1,800 | 100 | | | |
| Charlie | 1.650 | 50 | | | |

Required:

- (i) Determine the wages payable to each employee under the two labour remuneration methods. (9 marks)
- (ii) Advise each employee on the best labour remuneration method to accept based on your computations in b (i) above. (3 marks) (Total: 20 marks)

QUESTION THREE

- (a) Describe four limitations of management accounting in an organisation.
- (b) A manufacturing firm produces three products namely; X, Y and Z.

The following information relates to the production of the three products:

| | Product | | | |
|----------------------------|----------|-----|-----|--|
| Details: | Х | Y | Z | |
| | Sh. | Sh. | Sh. | |
| Unit selling price | 250 | 460 | 320 | |
| Variable production cost p | er unit: | | | |
| Raw materials | 70 | 155 | 110 | |
| Labour | 24 | 44 | 32 | |
| Overheads | 56 | 98 | 75 | |
| | | | | |

Additional information:

1. The total fixed production cost for the three products amounted to Sh.400,000.

Labour hours are currently limited to 25,000 hours paid at an hourly rate of Sh.8 during the production period. 2.

The maximum demand for product X, Y and Z are 2,000 units, 1,800 units and 3,000 units respectively. 3.

Required:

The current shortfall in labour hours at maximum demand. (i)

(ii) The optimal product mix and the resultant profit. (4 marks)

(12 marks) (Total: 20 marks)

(4 marks)

QUESTION FOUR

Zaidi Merchants is a newly established manufacturing enterprise that uses standard costing in its operations. The firm manufactures a product branded "MX" which has a standard selling price of Sh.120 per unit. Inventory is valued at standard cost.

The standard variable cost of one unit of MX is as follows:

| | Sn. |
|--|-----------|
| Direct materials | 20 |
| Direct labour (6 hours at Sh.8 per hour) | 48 |
| Production overhead | 24 |
| Total | <u>92</u> |

Additional information:

The budgeted and actual activity levels for the month of April 2020 were as follows: 1.

| | Budgeted units | Actual units |
|------------|----------------|--------------|
| Sales | 25,000 | 25,000 |
| Production | 25,000 | 26,000 |

The actual sales and variable costs for the month of April 2020 were as follows: 2.

| | Sn. |
|---------------------------------------|-----------|
| Sales | 2,995,000 |
| Direct materials (purchased and used) | 532,800 |
| Direct labour (150,000 hours) | 1,221,000 |
| Variable production overhead | 614,000 |
| | |

Required:

purchasing models.

QUEST (a)

(b)

Calculate the following cost variances for the month of April 2020: (a)

| | | (i) | Total direct materials cost variance. | (2 marks) (2 marks) |
|---|--------|----------|---|--------------------------|
| | | (ii) | Total variable production overheads variance. | (2 marks) |
| | | (iii) | Direct labour rate variance. | (2 marks) |
| | | (iv) | Direct labour efficiency variance. | (2 marks) |
| | (b) | A recon | ciliation statement between actual and budgeted profit or loss for the month of April 2020. | (8 marks) |
| | (c) | Explain | two factors to be taken into account in deciding whether or not to investigate individual va- | (4 marks) |
| | | | (Total: | 20 marks) |
| Г | ION FI | | costs classification, explain three types of costs based on behaviour. | (6 marks) |
| | | four rea | isons that would lead a cost accountant to prefer Just-in-Time (JIT) purchasing over co | onventional (4 marks) |

BIX Feeds Ltd. operates several production processes involving the mixing of ingredients to produce bulk animal (c) feedstuffs. Its main product branded "HW" undergoes two processes; Process 1 and Process 2.

The following information relates to Process 2 for the period under consideration: Sh. **Costs incurred** 18,770,400 Transfers from Process 1 4,797,200 Raw materials cost 6,317,600 Conversion costs 300,900 Opening work-in-progress

> CA22 Page 3 Out of 4

| Production: | Units |
|---|---------|
| Opening work-in-progress | 1,200 |
| (100% complete, apart from Process 2 conversion costs | |
| which were 50% complete) | |
| Transfers from Process 1 | 112,000 |
| Completed output | 105,400 |
| Closing work-in-progress | 1,600 |
| (100% complete apart from Process 2 conversion costs | |
| which were 75% complete) | |

Additional information:

1. Normal wastage of materials (including product transferred from Process 1), which occurs in the early stages of Process 2 (after all materials have been added), is expected to be 5% of input.

2. Process 2 conversion costs are all apportioned to units of good output.

3. Wastage materials have no saleable value.

Required:

Process 2 account for the period, using the First-in-First-Out (FIFO) method.

(10 marks) (Total: 20 marks)

> CA22 Page 4 Out of 4

CPA PART I SECTION 2

MANAGEMENT ACCOUNTING

THURSDAY: 28 November 2019.

Time Allowed: 3 hours.

Answer ALL questions. Marks allocated to each question are shown at the end of the question. Show ALL your workings.

QUESTION ONE

(a) Examine three challenges that young medium-sized organisations might face when introducing cost accounting system into their operations. (6 marks)

(b) Dilica Ltd. makes and sells a single product called "Delicious". It is currently operating at 80% of full capacity, producing 112,000 units per month. The total monthly costs at the current level of operation are Sh. 611,000. At 100% capacity, total monthly costs would be Sh.695,000 while fixed costs would be the same per month at all levels of capacity between 80% and 100%.

Additional information:

- 1. At the normal selling price of the product, the contribution to sales ratio is 60%.
- 2. A new customer has offered to buy 25,000 units of the product each month at 20% below the normal selling price.
- 3. Dilica Ltd. estimates that for every five units that it sells to this customer, it will lose one unit of its current monthly sales to other customers.

Required:

- (i) The variable cost per unit of product "Delicious" and the total fixed cost per month. (5 marks)
- (ii) The current normal sales price per unit, and the contribution per unit at this price. (4 marks)
- (iii) Advise the management of Dilica Ltd. on whether the offer from the new customer should be accepted. (5 marks)
 - (Total: 20 marks)

Sh.

(6 marks)

QUESTION TWO

- (a) Explain three types of standards as used in standard costing.
- (b) The following information has been provided to you by the cost accountant of Lela Ltd. for the month of September 2019:

| Balances at the be | eginning of the month: | |
|---------------------|---|---------|
| Stores ledger conti | rol account | 241,750 |
| Work-in-progress | control account | 192,100 |
| Finished goods co | ntrol account | 341,640 |
| Prepayments of pr | oduction overheads brought forward | 21,000 |
| Transactions dur | ing the month: | |
| Materials purchase | ed | 761,500 |
| Materials issued: | To Production | 263,500 |
| | For Factory maintenance | 32,800 |
| Total wages paid: | Direct | 220,100 |
| | Indirect | 42,320 |
| Direct wages charge | ged to production | 141,100 |
| Recorded non-pro | ductive time of direct wages | 52,300 |
| Direct wages incu | rred in production of capital equipment | 26,700 |
| Selling and distrib | ution overheads incurred | 52,400 |
| | | |

CA22 Page 1 Out of 4

| | Sh. |
|---|---------|
| Other production overheads incurred | 122,000 |
| Sales | 754,000 |
| Cost of finished goods sold | 598,300 |
| Cost of goods completed transferred to finished goods account | 621,300 |
| Value of work-in-progress at the end of the month | 243,600 |

Additional information:

Production overheads absorption rate is 150% of direct wages and it is the policy of the company to include a share of production overheads in the cost of capital equipment constructed in the factory.

Required:

Prepare the following accounts for the month of September 2019:

| (iii) | Work-in-progress control account. | (3 marks) |
|-------|--------------------------------------|--------------------------------|
| (iv) | Finished goods control account. | (2 marks) |
| (v) | Production overhead control account. | (3 marks) (Total: 20 marks) |

QUESTION THREE

(a) Explain the meaning of the following terms as used in cost estimation:

| (i) | Cost allocation. | (2 marks) |
|-------|------------------|-----------|
| (ii) | Cost centre. | (2 marks) |
| (iii) | Cost driver. | (2 marks) |
| (iv) | Cost pool. | (2 marks) |

(b) Supreme Ltd. is a company that specialises in making high quality furniture to customers orders. The company has three production departments and two service departments.

Budgeted overhead costs for the year ending 30 April 2020 are as follows:

| | Sh. "000" |
|--------------------------------|-----------|
| Rent and rates | 12,800 |
| Machine insurance | 6,000 |
| Telephone charges | 3,200 |
| Depreciation | 18,000 |
| Production supervisor's salary | 24,000 |
| Heating and lighting | 6,400 |
| | 70,400 |

The three production departments A, B and C and the two service departments X and Y are housed in new premises, the details of which, together with other statistics and information are provided below:

| | Department | | | | |
|--|------------|-------|-------|-----|-----|
| | Α | В | С | X | Y |
| Floor area occupied (square metres) | 3,000 | 1,800 | 600 | 600 | 400 |
| Machine value (Sh. "000") | 240 | 100 | 80 | 40 | 20 |
| Direct labour hours ("000") | 3,200 | 1,800 | 1,000 | - | - |
| Labour rate per hour (Sh.) | 380 | 350 | 340 | 300 | 300 |
| Allocated overheads specific to each | | | | | |
| department (Sh. "000") | 2,800 | 1,700 | 1,200 | 800 | 600 |
| Service department X costs apportioned | 50% | 25% | 25% | | |
| Service department Y costs apportioned | 20% | 30% | 50% | | |

CA22 Page 2 Out of 4

Required:

- (i) Overheads analysis sheet showing the overhead costs budgeted for each department and the basis of apportionment used. (8 marks)
- (ii) Two pieces of furniture are to be manufactured for customers. The following information relates to the two pieces of furniture:

| | | Job 123 | Job 124 |
|-----------------------------|---|---------|---------|
| Direct materials (Sh.) | | 15,400 | 10,800 |
| | | Hours | Hours |
| Direct labour - Department: | Α | 20 | 16 |
| | В | 12 | 10 |
| | С | 10 | 14 |

Required:

The total production cost for each job.

(4 marks) (Total: 20 marks)

(6 marks)

OUESTION FOUR

Explain three differences between job costing and process costing. (a)

(b) Granite City Works (GCW) Ltd. is a manufacturer of cemetery headstones and architectural granite slabs. The company excavates blocks of granite from its joint processes of Quarry and Cutting. Two joint products; Cemetery monuments and Architectural granite are produced along with a by-product called "grit".

Cemetery monuments are cut, polished and engraved in a variety of standard shapes, sizes and patterns and sold to funeral homes. Architectural granite slabs are special-ordered by contractors for office buildings. These slabs are cut and polished to the exact customer's specifications. The small pieces of granite resulting from the cutting process are crushed and sold to farm-supply outlets as poultry grit. www.chopi.co.

")

Additional information:

1. GCW Ltd. has provided the following output and cost information:

| Process | Output (Tons) | Cost (Sh. "000" |
|---------------|---------------|-----------------|
| Quarry | 100,000 | 350,000 |
| Cutting | 90,000 | 250,000 |
| Monuments | 25,000 . | 300,000 |
| Granite slabs | 60,000 | 400,000 |
| Grit | 5,000 | 10,000 |
| | | , |

2. A local distributor purchases all of the grit that is produced at a price of Sh.40,000 per ton.

3. Assume that the company uses the physical units method to allocate joint costs.

Required:

The cost per ton of monuments and granite slabs, assuming that the grit is accounted for as:

- (i) Other income. (8 marks)
- (i) By-product revenue deducted from the main product cost.

OUESTION FIVE

Summarise four disadvantages associated with Just-In-Time (JIT) inventory management system. (a)

(b) Solhut Ltd. manufactures a product branded "PQ" which is sold at Sh.800 per unit. The variable costs per unit of product "PQ" are provided below:

Sh

| | | ~ · · · · |
|-------------------------|------------------------|-----------|
| Direct materials: M1 (2 | 2 Kgs at Sh.20 each) | 40 |
| Direct materials: M2 (| 3 Kgs at Sh.20 each) | 60 |
| Labour (| 2 hours at Sh.35 each) | 70 |
| Variable overheads at | Sh.40 per hour | 80 |

The management of Solhut Ltd. have estimated that for the first six months of the year ending 30 June 2020, the following quantities will be sold on credit:

| Month: | January | February | March | .April | May | June |
|------------------|---------|----------|-------|--------|-------|-------|
| Quantity (Units) | 3,920 | 2,940 | 3,430 | 4,410 | 4,900 | 4,410 |

(6 marks)

(4 marks)

(Total: 20 marks)

Additional information:

- 1. Customers will be allowed one month's credit.
- 2. The closing inventory for each month is equal to 10% of the next month's sales of product "PQ".
- 3. Production takes place in the month of sale.
- 4. Materials are purchased one month before use and are paid for two months after purchase.
- 5. Labour and variable overheads are paid for in the month of production.
- 6. Fixed overhead per month are expected to be Sh.300,000 and includes depreciation of Sh.35,000. The fixed overheads are payable in the month in which they are incurred.
- 7. The opening cash balance as at 1 February 2020, is expected to be Sh.2,500,000.

Required:

For the months of February 2020 to April 2020, prepare:

(i) Production budget in units.

(6 marks)

(ii) Cash budget.

(10 marks) (Total: 20 marks)

.....

CPA PART I SECTION 2

MANAGEMENT ACCOUNTING

WEDNESDAY: 22 May 2019.

Time Allowed: 3 hours.

Answer ALL questions. Marks allocated to each question are shown at the end of the question. Show ALL your workings.

QUESTION ONE

(a) Financial accounting is the branch of accounting that organises accounting information for presentation to interested parties outside the business.

Management accounting on the other hand uses information provided by both financial accounting and cost accounting with the purpose of providing information to managers for policy formulation, planning and decision making.

Required:

With regard to the above statement, describe four differences between management accounting and financial accounting. (8 marks)

(b) (i) Highlight four advantages of regression method of cost estimation.

(ii) The following data relates to the total costs incurred by Makini Garage Ltd. in a period of eight weeks:

| Week | Number of cars repaired | Total costs incurred Sh. "000" |
|------|-------------------------|-----------------------------------|
| 1 | 90 | 5,200 |
| 2 | 100 | 6,000 |
| 3 | 120 | 6,200 |
| 4 | 150 | 3,530 |
| 5 | 160 | 3,850 |
| 6 | 220 | 4,300 |
| 7 | 300 | 5,870 |
| 8 | 340 | 7,150 |

Required:

Using regression analysis method, formulate an equation in the form of Y = a + bx that could be used to estimate the total costs incurred. (8 marks)

(Total: 20 marks)

(4 marks)

QUESTION TWO

(a) Baraka Distributors Ltd. purchases and sells a single product branded "M".

The following information is provided for product M:

- 1. Annual demand for the product is 30,000 units.
- 2. The ordering cost per order is Sh.2,500.
- 3. The holding cost is expressed as 20% of the purchase price.
- 4. A new supplier in the market has presented Baraka Distributors Ltd. with a proposal for the following range of quantities and respective price per unit:

| Range of quantities | Price (Sh.) |
|---------------------|-------------|
| 1 - 3,000 | 21 |
| 3,001 - 5,000 | 19 |
| 5,001 - 7,000 | 17 |
| 7,001 – 9,000 | 15.50 |
| 9,001 - 10,000 | 13 _ |

Required:

Advise the management of Baraka Distributors Ltd. on the range of quantities to purchase.

(b)

Pendo Ltd. makes three types of metallic doors; security, house and office which are made from the same basic materials (steel bars and iron sheets).

The standard unit costs and selling prices of the three types of doors are as provided below:

| | | Door type | |
|--------------------|----------|-----------|--------|
| | Security | House | Office |
| | Sh. | Sh. | Sh. |
| Direct materials: | | | |
| Steel bars | 3,500 | 1,960 | 4,200 |
| Iron sheets | 10,920 | 11,760 | 10,500 |
| Direct labour: | | | |
| Machining | • 2,100 | 1,400 | 2,660 |
| Spraying | 980 | 560 | 840 |
| Unit selling price | 24,500 | 26,040 | 26,600 |

Additional information:

1. The sales for the month of December 2018 are as follows:

| Door type | Units |
|-----------|-------|
| Security | 200 |
| House | 200 |
| Office | 160 |

2. Owing to an industrial dispute, suppliers of the iron sheets have estimated that only 5,124 square metres of iron sheets are available for the period. The iron sheets cost Sh.1,000 per square metre.

Required:

Advise the management of Pendo Ltd. on the most profitable mix of the three types of doors. (12 marks)

OUESTION THREE

(a) The choice of an overhead absorption base is a matter of personal judgement.

Explain the extent to which you agree or disagree with the above statement.

(b) Machakato Ltd. makes three main products using the same equipment. Total overheads amounting to Sh.720,000 were charged for the last quarter of the financial year ended 31 December 2018.

Details of the three products for the months of September 2018 to December 2018 are as follows:

| | Product | | |
|------------------------------|---------|-------|--------|
| | Α | В | С |
| Labour hours per unit | 2 | 3 | 1 |
| Machine hours per unit | 3 | 2 | 5 |
| Material cost per unit (Sh.) | 45 | 28 | 52 |
| Volume (Units) | 1,500 | 2,400 | 11,000 |

Additional information:

- 1. Direct labour costs are Sh.14 per hour.
- 2. Production overheads are absorbed on a material cost percentage basis.
- 3. The machine rate for the period under consideration is Sh.56 per machine hour.
- 4. Further analysis shows that the total production overheads could be apportioned as follows:
 - Cost relating to set-ups 20%
 - Cost relating to materials movement 35%
 - Cost relating to inspection 45%

CA22 Page 2 Out of 4

(8 marks)

For Solutions/Answers WhatsApp: 0724 962 477

(Total: 20 marks)

(4 marks)

5. The following activity volumes are associated with the product line for the period:

| | | | Total activities for the period | | | |
|----------|---|----------------------|---------------------------------|-----------------------|--|--|
| | | Number of set-ups | Number of material movements | Number of inspections | | |
| Product: | Α | 78 | 12 | 140 | | |
| | В | 112 | 21 | 170 | | |
| | С | <u>460</u> | <u>82</u> | <u>640</u> | | |
| | | <u>650</u> | <u>115</u> | <u>950</u> | | |

Required:

Cost per unit for each product using:

- (i) Traditional method.
- (ii) Activity Based Costing (ABC).

QUESTION FOUR

- (a) Highlight four purposes of costs classification in an organisation.
- (b) The following information was obtained from the books of Mambo Yote Ltd., a manufacturing company based in a coastal town for the month of April 2019:

| Opening inventory (Units) | 50,000 |
|---------------------------|-----------|
| Valuation | Sh. |
| Materials | 250,000 |
| Labour | 100,000 |
| Overheads | 250,000 |
| Units introduced | . 200,000 |
| Cost incurred | Sh. |
| Materials | 1,000,000 |
| Wages | 750,000 |
| Overheads | 700,000 |

Additional information:

- 1. During the month of April 2019, 150,000 units were completed and transferred to process II.
- 2. Closing inventory amounted to 100,000 units with the following degrees of completion:

Materials100%Labour50%Overheads40%

- 3. Due to the nature of the production process, no losses are anticipated.
- 4. The company uses the average cost method to value work-in-progress.

Required:

| (1) | Statement of equivalent production. | | (4 marks) |
|-----|-------------------------------------|---|-----------|
| | | • | |

- (ii) Statement of apportionment of cost.
- (iii) Process I account.

QUESTION FIVE

(a) Limu Processing Company Ltd. manufactures a standard product branded "LM". Currently, it is operating on a normal activity level of 70% with an output of 6,300 units.

The sales director believes that a realistic forecast for the next budget period would be at an activity level of 50%.

The following data relates to the forecasted costs of the product for different levels of activity:

| | 60% | 70% | 80% |
|------------------------------------|----------------|----------------|----------------|
| · · | Sh. | 、 √Sh. | Sh. |
| Direct materials | 151,200 | 176,400 | 201,600 |
| Direct wages | 64,800 | 75,600 | 86,400 |
| Production overheads | 150,400 | 164,800 | 179,200 |
| Administration overheads | 126,000 | 126,000 | 126,000 |
| Selling and distribution overheads | 169,200 | <u>176,400</u> | 183,600 |
| Total cost | <u>661,600</u> | <u>719,200</u> | <u>776,800</u> |

Profit is 20% of selling price.

Required:

(i) Flexible budget based on a 50% level of activity.

- (ii) State three problems which might arise from such a change in the level of activity.
- (b) Biashara Ltd. uses standard costing. The following information relates to actual results for the period ended 30 April 2019:

| Units produced | 7,200 |
|--|--------------------|
| | Sh. |
| Materials used (420kgs) | 8,450 |
| Labour costs (9,100 hours) | 35,280 |
| Various overheads | 34,200 |
| Fixed costs | 28,500 |
| Direct material price variance | 370 (favourable) |
| Direct material usage variance | 252 (favourable) |
| Direct labour rate variance | 1,120 (favourable) |
| Direct labour efficiency variance | 1,040 (favourable) |
| Variable overhead expenditure variance | 2,350 (adverse) |
| Variance overhead efficiency variance | 910 (favourable) |
| Fixed overhead variance | 500 (adverse) |

Additional information:

- 1. The standard cost card and the budget for the period were misplaced and could not be recovered.
- 2. The accountant recalls that the budgeted output was 7,000 units.

Required:

Using variance analysis, derive the following:

(i)Standard cost card for the period ended 30 April 2019.(5 marks)(ii)Budget for the period ended 30 April 2019.(5 marks)(Total: 20 marks)(5 marks)
